I. INDIAN CULTURE

A History of Indian Literature, by M Winternitz, Ph D Translated into English from the original German by Mrs S Ketkai and revised by the Author The only authorised translation into English

This monumental work of the late Prof Winternitz is too well-known to need any introduction to the public. In order to make it accessible to those interested in Indian Literature but not well-versed in German, the Calcutta University undertook the publication of an English version. In order to bring the work up to date the author revised the whole work for the English translation. Many chapters have been re-written entirely, smaller changes, corrections and additions have been made almost on every page and the more important publications of the last twenty years have been added to the references in the Notes. Thus the English translation is at the same time a second, revised and improved edition of the original work.

- Vol I Introduction, the Veda, the National Epics, the Puranas and the Tantias Demy 8vo pp 653
 Rs 10-8
- Vol II Buddhist Literature and Jama Literature Demy 8vo pp 673 Rs 12-0

Vols I and II are the translations of the original German works with notes revised by the author and published during his lifetime. The sections of Indian Literature not covered by the two volumes already published will be dealt with in a separate volume which is under preparation.

Sino-Indica, by Prabodhchandra Bagchi, M.A., D.Lit.

Di Bagchi has undertaken a series of publications called Sino-Indica The work is a study of Chinese documents relat ing to India As the researches were begun in France the volumes had to be written in French

Vol I Le Canon Bouddhique en Chine, Tome I (In French) Royal 810 pp ln+436 Rs 15-0

It is the first systematic work which deals with the history of translations of Buddhist texts into Chinese and their trans-The work contains the biographies of all Indian, Iranian Sogdian and other monks who went to China in the early centunes of the Christian era A history of their activities, as preserved in the Chinese documents, is given The first part covers a period of six hundred years, first century A D to sixth century (589) A D

Le Canon Bouddhique en Chine, Tome I—" The author has brought together everything he could on the biographical notices of the translators and gives a register of their works. The large number of references to the literature that might come in question is to be specially congratulated. This assiduous work will have the recognition everywhere which it deserves. (Translated from German - Orientalistische Literaturzeitung, 1929, 2)

- "His important work does honour to him and his teachers a fresh proof of the eminent talents of the Bengali race" (From French— $Revu\epsilon$ Bibliographique, 1923, October, Bruxelles)
- "An important contribution There are some of the important informations from this historical study with which it is full " (From French -Revue des Sciences Philosophiques)
- "Work of great value that makes an important contribution to the history of Chinese Buddhism" (From French—Chronique o'Histoire des Religions)
- "He has been able to bring out this first volume of a magnum opus which vindicates once more the importance of Buddhism in the history of India and

testifies to the sound preparation of the author

This is a schematical history of the spread of Buddhism and, with it, of Indian culture into China One of the best achievements of Buddhistic scholarship, the first contribution of young India to the systematic and comparative study of Buddhism "—Prof G Tucci (Indian Historical Quarterly, Vol 2)

Vol II Deux Learques Sanskrit-Chinois, Tome I Double Crown 810 pp 336 Rs 15-0

It is a critical edition of two ancient Sanskrit-Chinese lexicons of the sixth and seventh centuries AD, compiled by a Ser-Indian monk, Li-yen, and a Chinese monk, the famous In-tsing The work has been enriched with notes added by Prof Paul Pelliot, Membre de l'Institut de France, Professor in College de France

Vol III Deux Lexiques Sanskrit-Chinois, Tome II Double Crown 8vo pp 204 Rs 15-0

The second part of the Duea Leaques Sanshut-Chinois contains a detailed study of five Sanskrit-Chinese dictionaries which have been preserved in the Chinese Tripitaka. These are—the Fan yu tsa ming of Li-yen, the Fan yu ts'ien tscu wen of Yi-tsing, the T'ang fan wen tscu of Ts'iuan-tchen, the Fan T'ang siao si and the T'ang fan leeng yu chouang touch tsi, all of which were compiled in the seventh and eighth centuries A D Dr Bagchi has discussed the problems raised by these vocabularies, their authenticity, the biography of the authors, the Prakritic, Iranian, and Central Asiatic elements in the vocabulary, the method of Chinese transcription, etc. A detailed Chinese-Sanskrit index containing more than two thousand words supplies the basis for future Sino-Sanskrit lexicographical works

This work is of capital interest to students of Buddhism, of Indian history, to Sinologists, to linguists and to all those who are interested in the early history of cultural exchange between China and India

Vol IV Le Canon Bouddhique en Chinc, Tome II Royal 8vo pp 306 Rs 15-0

It contains a history of the Chinese Buddhist literature from the seventh to the thirteenth century AD

The work will be completed with detailed indexes in a separate volume which is now in the press

The Evolution of Indian Polity, by R Shama Sastii, B A Ph D, M R A S, Cuiator, Government Oriental Library, Mysore Demy 8vo pp 192 (Slightly damaged) Reduced price Rs 4-8

Contains a connected history of the growth and development of political institutions in India, compiled mainly from the Hindu Sastras The author being the famous discoverer and translator of the Kautiliya Arthasastra, it may be no exaggeration to call him one of the authorities on Indian Polity

Contents I Tubal State of Society II Elective Monarchy III The Origin of the Kshattiyas IV The People's Assembly V The Duties and Prerogatives of the Kings and Priests VI The Effect of Jainism and Buddhism on the Political Condition of India VII The Empire-building policy of the Politicians of the Kautilya Period VIII Espionage IX Theocratic Despotism X The Condition of the People Intellectual, Spiritual and Economical

The titles of the lectures will indicate the vealth of information contained in them. Some of the facts mentioned by Mr. Santri will be an eye opener to most people, who are fond of imagining that Indians have always been "vain dreamers of an empty day, occupying themselve with things of the Great Beyond, supremely contemptions of mundanc about regarding them as Maya illusion.—All desirous of thosing the conditions of life in Ancient India should read circfully the faction volume, which is one more evidence of the splendid work that the Post Griduate teachers of the Calcutta University are doing." Hindusthan Receive

Social Organisation in North-East India in Buddha's Time, by Richard Fick (translated by Sisukumar Maitia, MA PhD) Demy 800 pp 390 Rs 7-8 (Out of print)

Dr Fiel's Die Sociale Gielderung im Nordostlichen Indian zu Buddhas Zeit has, for many years, been of invaluable assistance to all interested in the social and administrative history of Buddhist India. But those ignorant of German were unable to make use of that book and their varing gratitude will be extended to Dr. Maitra for his eminertly readible translation. The book is too well known to need any review, suffice it to say that the translation is worthy of the book. Now that this echolarly work is made available in Figlish, it should find a larger enculation."—Hindusthan Review

Rationalism in Practice (Kamala Lectures), by Dr R P Paranjpye Demy 8vo pp 99 Re 1-8

The lectures briefly discuss certain questions of general interest and are only intended to provoke thought in the younger generation

Evolution of Hindu Moral Ideals (Kamala Lectures), by Sir P S Sivaswamy Aiyer, K C S I, C I E, LL D Demy 8vo pp xix + 242 Rs 2-8

The thesis deals with the evolutionary character of the moral ideals of Hindus as embodied and reflected in their sacred laws, customs, social life and conduct He shows that the moral rules and ideals which have obtained among them have not been immutable and stationary, but have changed, and are bound to change, in the course of time in accordance with their social and economic environments. The need for such adaptation is stressed as an essential condition of life in the modern The author examines the defects and merits of Hinduism and the value of the contribution of Hindu thought to moral culture He discusses the influence of the doctrine of Karma, the question of moial progress, the effect of the impact of Western ideas and culture upon Hindu ideals, the drift modern forces and tendencies and their bearing upon the future outlook of Hindu society The subject is treated throughout in the light of comparative thought and in a spirit of detachment The author enforces his points by numerous references to parallel conceptions and practices in Western countries

J H Murhead (Editor, Library of Philosophy) "I have read sufficient to appreciate its value for the understanding of the very interesting subject with which it deals. I have found the comparisons which the author makes between Hindu and Christian standards and practices particularly instructive. It seems to me extremely well written by one who has spared no pains to master the literature, both Eastern and Western, on the subject and I congratulate the press of Culcutta University on the production of so scholarly a work"

E Westermarck (Finland) "I have read it with great interest and profit, it is a gem which I am very happy to possess"

A Bernedale Keith (University of Edinburgh) "It is marked not merely by knowledge of Indian and western ethics, and critical judgment, but also by a sanity and humanity of judgment, which reveals how little in essentials we of the west and you of the east differ from one another. I am very glad that Indian ethics have received treatment by so admirably qualified hands"

Havelock Ellis "I am in entire sympethy with all your main arguments (in the list chapter) They coincide with the opinions I have myself long held"

Mahamahopadhyay Dr Ganqanath Jha (Allahabad) "The lectures are, of course, excellent and should be read with interest and benefit by all interested in the well being of the country. It will dispel a great deal of misconception"

The Rt Honble Sir Tei Bahadur Sapiu "Su Sivaswamy Iyer is one of the most thoughtful writers and anything coming from hippen is bound to attract considerable attention. I have read considerable portions of this book since it arrived and admired the presentation of the subject a great deal."

The Times Literary Supplement (London) "The thesis is full of interest and is treated with the knowledge of affairs and in the liberal spirit which Sir Siviswamy has often displayed on public platforms and in the Legislative Assembly"

Vedanta Kesan (Madius) "He sheds the light of a mature and scholarly mind on many intricate and vexed problems of Hindu ethics and has as ably defended the fundamental principles of Hindu morality from the charges of ignorant foreign critics as he has rescued it from the zeal of rigid orthodoxy."

I sof Franklin Edgerton (Vale University) "I have found the book interesting and stimulating. It shows sound and deep learning, and at the same time a spirit of broad and intelligent tolerance worthy of India's rest traditions. I should think its influence would be profoundly beneficial, and I heartly wish that it may enjoy the greatest possible popularity."

The History of Pre-Buddhistic Indian Philosophy, by B M Barua, M A (('al), 1) Lit (London) Royal 810 pp 468 Rs 10-8

The book gives a clear exposition of the origin and growth of Indian Philosophy from the Vedas to the Buddha, and seeks to evolve order out of chaos to systematise the teachings of the various pre-Buddhistic sages and seers, scattered in Vedic literature (Vedas, Brahmanas, Upanishads) and in the works of the James, the Apvikas and the Buddhists

Prof Sir Sarvapalli Radhakrishnan "The only book of its kind No student of the Philosophy of Upanishads can afford to neglect it The book shows accurate scholarship and deep insight on every page"

Sakti or Divine Power, by Sudhendukumaı Das, MA, PhD (Lond) Demy 8vo pp 310 Rs 3-0

An attempt has been made to trace the origin of the idea of Sakti as Divine Power from Jnan or the 'Mother-Goddesses' of the Vedas and show how it developed through the speculations of the Brahmanas and the Upanishads and finally culminated into the Svetasvatara conception of full-bodied philosophical principle of 'Supreme Divine Sakti' belonging to God Himself, hidden in His own qualities. It is an historical study based on original Sanskrit texts. It contains for the first time a thorough discussion on the philosophy of the Kashmere Trika School and that of the Lingayat School of Southern India from the texts both published and unpublished

Sri Aurobindo and the Future of Mankind, by Adharchandia Das, MA Double Crown 16mo pp 143

Re 1-0

The author has interwoven into a connected statement the contents of a number of articles contributed by Sri Aurobindo Ghosh, on the true meaning of Vedanta Philosophy and has presented his book in a very interesting and attractive manner

- "Mr Adharchandra Das in the Four Chapters of his book gives us a sound and clear account of Aurobindo's main views, and points out incidentally that they are based on the central principles of Indian culture. We are all grateful to him for bringing together in a brief and accessible form the main teachings of Aurobindo Ghosh "—Foreword, Sir S Radhakrishnan
- "The book is well-written and though quite small in size, gives a re markably clear and comprehensive account of Mr Ghosh's views"—Hindu
- "Mr Das has made a close study of Aurobindo's writings and has published a remarkable book"—Advance
- 'This little book deserves a careful reading masmuch as it proposes to appreciate and criticize Sri Aurobindo's philosophy, which, so far as we are aware, has not yet been attempted by any "—Prabhuddha Bharata or Awakened India
- "Mr Das's simple and clear exposition is an aid to the study of modern Indian philosophy with occasional side glimpses into the thought-currents of contemporary west. Mr Das is the first to drive his plough on the virgin soil and he silently fingers at its growth. He is congratulated on the way he has accomplished his task he set for himself."—4 B Patrika
- "This little book of 130 pages is a competent study of the leading ideas of the well known Indian philosopher and Yogi Sri Aurobindo"—Aryan Path
- 2 1362B

'It is a valuable contribution to the history of thought of present day India and gives a clear and systematic account of the work of one of the great thinkers of our time "—Dr. H. von Gla chagy, Königsburg, Germany

Sanskrit Buddhism in Burma, by Nihananjan Ray, M A (Cal), Dr Lett et Phil (Leiden), Dip Lib (Lond)
Royal 8vo pp xv + 116 Profused illustrated Rs 2-0

Attempts have been made in this book to explain one of the many aspects of the culture-complex of early Indo-Burmese history, at the same time it seeks to initiate another chapter in the history of the expansion of Indian religions and culture outside India's natural geographical boundaries

The subject is but little known, and very little has so far been done to elucidate the vague general ideas that exist today amongst scholars about it. A large number of original sources and source-materials have here been brought to light for the first time, there will be found many instances where new interpretations of old materials have been put forward. Thus the author has been able to infer the prevalence of the Sarvastivada in Old Prome, the definite existence of Mahayanist and Tantrik

texts in the monastic libraries of Upper Burma, and of litherst unrecognised representations of gods and goddesses belonging to the Mahayana and its allied pantheons

- your work is far in advance of mine "-G E Harvey, I C S (retd), Professor of Burmese, Oxford University, and author of History of Burma
- has by a thorough and reliable rescarch laid a solid foundation for our knowledge of and insight into the position of Buddhism in Burma in relation to that in Indo China and Indonesia "-N J Krom, Professor of Indo Javanese History and Archwology, Leiden University
- " a conscientious and well informed scholar you have shown in it a marked ability for historical research above all you have shown a remarkable degree of judgment and caution in driving your conclusions your book may be regarded as an important contribution to our knowledge "—

- Paninya-Siksa or the Siksā-Vedānga ascribed to Pānini. edited by Manomohan Ghosh, MA, Kavvatritha Demy 8vo pp lxvi+90 Rs 3-0

This text being the most ancient work on Vedic (Indo Aryan) phonetics (Siksā) has been critically edited in all its five recensions with an introduction, translation and notes together with its two commentaries. In the introduction the editor discusses among other things briefly the evolution of the six branches of auxiliary Vedic studies known as the six Vedāngas and has treated in full the origin and development of the study of Phonetics (Siksā) which has been considered one of the important branches of modern Linguistics. Besides this the editor discusses here the antiquity of Pānini and throws some fresh light on the date of this great grammarian who is supposed to be the author of the Siksā

E J Thomas, Under Librarian, Cambridge University Library "I find the book an extremely useful one, both because it makes accessible an important collection of inscriptions, and also for the great amount of learning and research which the authors have embodied in it

"The work constitutes a long step forward both as regards our actual knowledge of the inscriptions, as well as in the grammatical analysis and the palaeographical studies"

H U1, of the Tohokv Imperial University, Japan "In the work the inscriptions are critically investigated, accurately explained and well arranged, so that the work is highly important for the study of the paleographical and linguistical development and specially the history of early Buddhism"

F Washburn Hopkins, of the Yale University "I have gone care fully through the volume of Dr Benimadhab Barua and regard it as a most useful contribution well worthy of publication. The arrangement of the inscriptions in accord with their subject matter is a great convenience and the explanatory notes are all that can be desired."

Art and Archæology Abroad

Prof Dr F O Schrader, of Kiel " This is a useful publication full of interesting details on which both its authors and the University may be congratulated The printing too is admirably done"

Prof Hermann Jacobi "many students will be thankful for the various informations in Section III, pailly reproduced from different sources and partly supplied by the Editors themselves"

The author who had been invited by the International Educational Institute (under the Carnegie Foundation, New York) to deliver a course of lectures on Indian Art and Archæology during 1930-31 visited the important centres of Europe and America and studied the special arrangements and provisions for the collection and co-ordination of the data of arts and archæology as well as the methods of teaching of those subjects in some of those places. The outcome of these studies undertaken by him is this useful report which is of immense help to the students as well as the teachers of this branch of Indology.

Brahmanical Gods in Burma (A chapter of Indian Art and Iconography), by Nihamanjan Ray, MA (Cal), Di. Lett, el Phil (Leiden), Dip Lit (Lond) Royal 8vo pp 106, with 23 plates Rs 2-4

This monograph is an outcome of the studies and researches made by the author in the domain of Burmese Art, Archaeology and History. The materials were collected by him during the archæological tours that he had made throughout. Burma in 1927 and 1929. He has made a detailed analytical study of the numerous Brahmanical images scattered all over the Peninsula and has tried to bring out fully their reonographic significance and their bearing upon early Indo-Burmese historical and cultural relations.

- He describes images of Visnu Siva, Brahma, Ganesa and Surya, and the well-reproduced photographs are all the more valuable through his descriptions being based upon the actual objects. In particular his chapter on the art and historical background is vell worthy of study—

 Journal of the Royal Isiatic Society (Landon)
- "Burma is professedly Buddhist, but in this monograph the author examines bow far, in spite of its Buddhism Burma has been affected by its contiguity with India, and to what extent it has submitted to the powerful pressure of Brahmanism. Despite the scanty harvest gleaned with such industry in this field of study the work was well worth undertaking, and the author has dealt competently with his material and advances reasons why Brahmanism, which had success in Further India, failed to make itself felt nearer at hand. There is likely to be little disagreement with the general conclusions which are presented clearly and succintly "—Times Literary Supplement (London)
- "The book is the first of its kind written by an Indian scholar, and we can well say that he has performed his task creditably. Is certainly a successful attempt at elucidating an important aspect of early cultural relations between India and Burma"—The Indian Historical Quarterly (Calcutta)

- "He has collected an amount of important facts hitherto ignored and scattered, and dealt with them in a critical and thoughtful manner, which deserves the highest appreciation"—M Louis Finot (Paris)
- The book is not only a valuable contribution to our knowledge of Indian Art and Iconography, but it is also historically important as showing the influence of Hindu religion and Hindu culture in Burma in mediaeval times "—E J Rapson (Cambridge)
- "It seems to me to be a very good and enlightening piece of original research which breaks new ground "—L D Barnett (British Museum, London)
- "I have found it to be a very creditable and useful work that adds great deal to our knowledge of Indo Burmese Art and Archaeology I request you to convey to the learned author my sincere compliments on the

- "The book deals with an almost untrodden subject. It deals not only with the images of gods and goddesses from iconographical point of view but also throws a great deal of light on the nature and spiead of Bialmanism in that country. The author has gone into the subject very deeply and his treatment seems to be exhaustive and complete. It is a welcome addition to our knowledge about the progress of Bialmanical religion outside. Folk Art of Bengal, by Ajitcoomai Mookeijee, Ciown 4to pp 50 Illustrated with numerous photographs, maps and coloured plates Rs 3-8

In this work which is the flist of its kind on the subject is given an account of the folk ait and culture in Bengal. The specimens included as illustrations in this book bear a close resemblance to the heritage of ancient ait and culture to which the Western Asiatic and the Indus Valley civilization belongs. The aits and crafts which are of folk origin reveal the antiquity of the Bengalis and throw an interesting sidelight on ethnological problems. Besides its significance as a study of an important aspect of Bengal's artistic and cultural life, it is valuable also as a contribution to the general science of anthropology.

IV HISTORY AND SOCIOLOGY

1. ANCIENT INDIA

Chronology of Ancient India (From the times of the Rig-Vedic King Divodāsa to Chandragupta Maurya, with glimpses into the Political History of the period), by Sitanath Piadhan, M Sc., Ph D., Birhaspati Royal 8vo pp. 291+30 Rs. 6-0

In this extremely interesting and eludite work on the Chronology and Political History of Vedic and Buddhist India, enormous masses of evidence derived from Vedic, Epic, Puranic, Buddhistic, Jain, Epigraphic and other sources have been collected, compared and contrasted. The late Dr. Pradhan discovered the long-expected thread through the bewildering labyrinth of Vedic Chronology and handled the question of Nanda-Sisunāga-Pradyota-Bimbisārian Chronology and political history perhaps with the most accurate critical skill and precision. This proneer work, completed in 1921, was submitted to the University of Calcutta as his Doctorate thesis and contains entirely new findings in almost every page of the book and the criticisms of the positions of Pargiter, Macdonell, Keith, Tilak, K. P. Jayaswal, Abinash Chandra Das, D. R. Bhandarkar, Bankim Chandra Chatterjee, Fleet, etc., reflect a high credit on the author. It is an invaluable and indispensable companion and guide to all students, professors and lovers of Ancient Indian History and Culture

Str Asutosh Mookerjee 'An erudite thesis,' of no small credit,' of much excellence,' of special excellence,' extremely gratifying to note,' such a learned thesis,' has thrown unexpected yet welcome light on the political history of the Pie Asokan Period,' original research of unquestionable merit,' appraised by the investigators of the first rank,' etc, etc

MM Ganganath Jha, MA, DLitt "It is refreshing to find that the writer has not been slow to strike out new lines for himself and examine theories which had hitherto been regarded as almost sacrosanct"

M Winternitz, Ph D The ancient chionology of India is a thorny subject, and the book will, no doubt, evoke much criticism. But the author has brought together valuable data from a vast amount of literature which will remain useful, even if the chronology may not be accepted by scholars in many cases."

T Jolly, Professor of Sanshrit, Wurzburg, Germany "This is a very learned work, abounding in new theories and discussions of old ones and in original Sanskrit quotations. The author has found that most of the Kings and Rishis of the Rigveda are mentioned in the Epics and the Puranas, etc., as well, and has based a new chronology of the Rigvedic Period on this observation. His genealogies of Indian dynasties are very interesting."

L D Barnett, Ph D "Mr Pradhan's object is to collect and as far as possible to bring into synchronistic connection the ancient pedigrees of Kings and others which are handed down in Vedic, Epic and

Puranic literature He deals accordingly with the Vedic Divodāsa, his contemporaries, the Aiksvāka Dašaratha, etc., and he then essays to determine the succession in Magadha from Bimbisāra to Chandragupta On the basis of these conclusions and reckoning an average of 28 years for a generation he fixes the Mahābhārata war at c 1152 B C confirming the result by astronomical calculations and makes c 1500 B C the starting point of the later Vedic period. He moreover demolishes the Vedic Chronology of Dr. A. C. Das and even criticizes unfavourably the astronomical arguments set forth by the late Lokamanya Tilak in his Orion—which shows much courage and independence. His work shows immense industry and ingenuity and there is certainly 'something in it'. The attempt to adjust and harmonise the traditional pedigrees is worth making and Mi Pradhan's essay is an energetic step in that direction'.

European savant working in a first class European university. The honour of writing the first scientific book on Vedo Puranic Chronology belongs to you and not to Pargitei. I note with great pleasure your happy identification of the Rigvedic Rishi Mudgala (Rv. X, 102) with the husband of Indiasenā, the daughter of King Nala of Nisadha, and of Divodāsa, King of Kāsi with Atithigva Divodāsa of the Vedas, who together with the Arksvāka Dasaratha, quelled the Dāsa King Sambara, your resolution of the Iksvāku dynasty from Daśaratha downwards, into two branches pointing out that kings mentioned just after Hiranyanābha Kausalya, were the descendants of the Siāvasti King Lava is a masterpiece in the reconstruction of Ancient Indian History, your determination of the date of the great Bhārata battle at about the middle of the twelfth century B C and of events of the Rāmāyana as occurring about three hundred years earlier would provide the future historian with sources to build up ancient Indian Chronology. Your assignment of Vedic Janaka and Yājāvavalkya to five generations after Siīkrishna and Arjuna seems beyond challenge. Your attempt to prove that a portion of the Deccar was occupied by the Rigvedic Aryans, and that Anga, Kośala, Magadha, Videha, etc., were colonized by them rather early, your explanation of the mythology of Ahalyā and Indra, your emendation of not a few individual errors in some of the names of Puranic kings, notably in the name 'Abhijit,' your bold and well established finding that the Harivamsa does contain wrong synchronism about Brahmadatta and Piatipa, and that the Pui nas are wrong in making Krta of Dvimīdha's line the pupil of Hiranyanābha Kausalya—these and many other points will be of absorbing interest to scholars. I immensely enjoy your courageous refutation of 'the Orion' as well as of Mr. A. C. Das's geological antiquity of the Rigvedic period which might be based on N. B. Pavjee's book 'Aryavatite Home'. In the post Vedic period, your identification of Siśunāga with Nandivardhana and

Political History of Ancient India (From the Accession of Parikshit to the Extinction of the Gupta Dynasty), by Prof Hemchandia Raychaudhuri, MA, PhD Fourth Edition, Revised and Enlarged Royal 810 pp xxiii + 582 with maps and charts Rs 7-8

Di Ravchaudhuii's work in the domain of Indology is characterised by a rare sobriety of judgment and by a constant reference to original sources and this makes his contributions specially valuable. We have here probably the first attempt on scientific lines to sketch the political history of India including the pie-Buddhistic period from about the ninth century BC and the work is one of great importance to students of Indian history. The revised edition embodies the results of the most recent researches in the subject. An interesting feature of this work is the insertion in certain chapters of introductory verses from literature to show that poets and sages of Ancient India were not altogether unmindful of the political vicissitudes through which their country passed

Professor W Geiger, Munchen (Geimany) "I highly appreciate Mr Raychaudhuri's work as a most happy combination of sound scientific method and enormous knowledge of both Brahmanical and non Brahmanical hierature. The work is written in lucid style in spite of its intricate subject and affords a mass of valuable evidence throwing much light on the whole period of Indian History dealt within it. I see with special pleasure and satisfaction that we are now enabled by the author's penetrating researches to start in Indian Chronology from the 9th instead of the 6th or 5th century BC."

Professor Hultzsch Halle (Germany) 'The Political History of An ient India is the outcome of extensive researches and throws much light on the darkest and most debated periods of Indian history''

Prof J Jolly, Wurzbury (Germany) " What an enormous mass of evidence has been collected and discussed in this work, an important feature of which is the quotation of the original texts along with their translation which makes it easy to control the conclusions arrived at The incient geography not less than the ancient history of India has been greatly furthered by your researches and much new light has been thrown on some of the most veved problems of Indian Archaeology and Chronology

 $Prof\ F\ Otto\ Schrader\ (Germany)$ 'I have read the book with increasing interest and do not hesitate to say that it contains a great many details which will be found useful by later historians ''

Prof A Berriedale Keith (Edinburgh) 'The work may justly be deemed a mot valuable contribution to the subject matter of which it treats''

Studies in Indian Antiquities, by Prof Hemchandra Raychaudhuri, MA, PhD Demy 8vo pp vvi+212 Rs 2-8 This little volume is, in the main, a collection of essays which is intended to serve as an introduction to the study of the epics and the geographical cautos of the Pinanas. The dissertations on the epics have won the approbation of scholar-like Washburn Hopkins. Winternity and Jacobi, the last of whom congratulated the author on the verification of the Bhāgayata credo in the Besnagai inscription of the second century B C. In the geographical sections the author discusses, the vexed problems of Indo-Aryan inigration and expansion and the location of Vanga and examines critically the Puranic conception of the world and the theories regarding the island continents group-mountains, etc., adumbrated in the Bhurana Kosha There are also some interesting notes on the higher and chronology of Bhoja of Kanauj and the Senas of Bengal

Prof E J Rapson (Cambridge) ' Dr Ravchaudhur e- avs on Indian History and Antiquities are always well informed thoughtful and suggestive "

Prof F I Thomas (JRAS) 'The study which Di Raychaudhuri has already devoted to ancient Indian history is cell known. He has shown that Indian historical scholarship is proceeding on cound line of its own and ichieving independent results.'

Professor H Jacobi (Germans) "The verification of the Phagasate credo in the Besnagar Inscription is a find on which you may be congratulated"

System, by U N Ghoshal MA Ph D Royal 810 pp v11+313 Rs 5-8

This work gives for the first time a comprehensive account of the origin and development of the Ancient Indian Revenue It is based on exhaustive and critical study of the relevant data culled from the technical literature from foreign evidence and from epigraphic and other sources relating to the history of Northern India from c 300 BC to 1200 AD author has endeavoured to arrange his facts as far as possible in then historical sequence. Copious use has been made of the references in the general Sanskirt and Sanskirtic literature Besides tackling the difficult problem of interpreting sundiv obscure texts and observations of foreign travellers, the author has sought to discover the precise meanings of a large array of technical terms A survey like the present is indispensable not only for forming a balanced estimate of Ancient Indian Civilisation on its material plane but also for tracing many institutions of mediaeval and even of modern India to then roots in past

 $Prof\ E\ J\ Rapson$ "It is a valuable contribution to the Economic History of Ancient and Mediæval India The widely scattered evidence contained in the inscriptions and in copper-plate land grants of Northeir India has never before been so carefully collected and discussed"

- Prof A B Keith —"It is a very valuable contribution to our know ledge of the subject by reason of its objectivity and the effort made to clucidate the Kautiliya Arthasastra by examination of the other evidence, in special that of inscriptions bearing on the topic. On the points examined the comparison of different records often throws admirable light."
- Prof M Winternitz —"This is a very important work on an interesting subject that to my knowledge has hitherto not yet been treated at all, and certainly not so fully and in such a scholarly manner. It is a valuable contribution to the history of Ancient Indian politics and economics."

Prof Sylvain Levi —"I wish to express my very high appreciation of this work — I know of very few books lately published which can in my opinion, compare with it"

Sir Jadunath Sarkar in a notice of the book in the "Modern Review" writes —"The author who is a practised writer on Hindu polity and ad ministration has carried our knowledge of the subject a good deal forward by concentrating light from the inscriptions by means of painstaking synthesis, while his knowledge of French and German has enabled him to utilize the latest published researches of European Orientalists. His 'Glossary of fiscal terms' will be particularly helpful not only to students of Ancient Indian polity, but also to epigraphists and Sanskritists in general. The author's wide outlook and far ranging comparisons will demand careful consideration of his theories on the part of his critics, even when they diffe from him"

Dr E J Thomas —"I much admire the mastery with which the ruthor has treated the great mass of his material and the sobnety and insight with which he has treated the subject"

The Times Literary Supplement —"The Hindu revenue system, on the history of which Professor Ghoshal speaks with high authority, is to be reckoned as one of the political achievements of the human race. The chief authorities are the Smritis, the Leviticus of Hindu scripture, and the famous Arthasāstra, or Book of Government, by Kautīlya, a Westein Indian of about the third century AD. The rules and maxims of these authorities, says Professor Ghoshal, 'surpass the achievements of classical antiquity and tend to approach the ideas of European thinkers in the 18th and early 19th centuries' This estimate seems fully warranted'

Dr L D Barnett in The Journal of the Royal Asiatic Society of Great Britain and Ireland —" His treatment is scholarly and judicious and he has thrown much light on the obscure problems of ancient Indian revenue administration — I heartly agree on essentials with him"

American Economic Review -" This is an important and scholarly contribution to the history of public finance in India"

Di Wilhelm Geigei in Zeitschrift für Indologie und Iranistik — "I have lead both works (Hindu Revenue System and Agrarian System) with the greatest interest and I am sure to receive the assent of all my colleagues if I thank the author for his excellent work. The performance is clear and rests upon a thorough knowledge of politico economic subjects and abundant use of literature. The author is very discreet in his judgment and in his inferences. I would specially refer to the chapter Summary and Conclusion in the Contributions (p. 271 ff.), where the ruling tendencies in the development of the Indian finances are clearly set forth and are also related to the analogies in the economic life of other people of later times. Very praiseworthy is also the Glossary of Fiscal terms annexed to the Contributions. In my opinion, not only we Indianists, but also the Political Economists who pay attention to history and its teachings, will derive plentiful advantage from the study of Ghoshal's writings." Agrarian System in Ancient India (Readership Lectures) by U. N. Ghoshal, M.A., Ph.D. Demy 810, pp. 136 Rs 2-8

This work is a supplement to the author's Contributions to the History of the Hindu Revenue System—In the first lecture, the author traces the beginnings of the Ancient Indian Agrarian system and its development in the literature of Law and Policy. The three following lectures offer for the first time a historical account of the land-system in Northern India from the period of early Buddhist literature to the Muslim conquest. The fifth and last lecture discusses exhaustively the vexed problem of ownership of the soil in Ancient India. Interesting parallels are drawn in this work between the land-system of Ancient India on the one hand and those of Anglo-Saxon England and primitive Germany on the other

Prof A B Keith —" It is an excellent work manifesting once more the author's wide reading and knowledge of things both Indian and of the

would beyond and his power of drawing sound and illuminating conclusions from evidence carefully collected, carefully sifted, and effectively adduced It forms a notable and welcome addition to our knowledge"

The Times Literary Supplement —" Another of Dr Ghoshal's valuable studies in ancient Indian culture and politics"

Prof E J Rapson —"I have read the book with great interest and with much admiration for the patience and the good judgment which the author has shown in collecting and discussing the widely scattered information which may be gleaned from literature and inscriptions as to the nature of the land tenures in Mediæval Northern India"

Journal of the Royal Asiatic Society of Great Britain and Ireland — "The four lectures comprised in this book are an able and on the whole an instructive survey of the relations of the Crown to the land in ancient India Some very interesting and important developments are made clear in the course of these studies such as the gradual extension of assignments and the system of Chiefs estates introduced under the Rajput dynasties"

English Historical Review —On the veved issue of the land question Miss Timmer's discussion may be compared with the fuller treatment of the whole subject in the valuable, though brief, work of Di U N Ghoshal Of special interest is the discussion of the theory of royal ownership of land Di Ghoshal avoids the error of Di Jayaswal (Hindu Polay, 11, 17983) who denies the reality of the doctrine, he insists instead that it is not known in Vedic times, and was always consistent with a quite clear admission that ownership proper (svāmya) as opposed to regal rights (rājya) rested with the cultivators save as regards the domain lands of the king—In this regard the testimony of the Mīmāmsā School, though incidental, is of special value and importance"

Orissa in the Making, by Bijaychandia Majumdai, B L With an introductory Foreword by Sii Edward A Gait, MA, KCSI Croun 800 pp 247 Rs 4-8

This work, which has no rival in the field, presents a mass of new facts relating to the early history of Orissa, and sets out the hitherto unnoticed course of events which culminated in the emergence of Orissa as a distinct national and linguistic unit. How the author has executed this work successfully after having been engaged for many years in his research work in Orissa, has been noticed by Sir Edward A. Gait in the introductory Foreword spoken of above

The Literary Times of London—'In Mi Mazundai's scholarly treatise on the making of Orissa we are introduced to an exactly opposite tendency the tendency namely, of Hinduism to absorb and modify aboriginal tribes and cults without entirely obliterating them. Orissa is not known to the average reader of Indian history, though the great temple of Jagannath at Puri, on the coast, is the scene of those car festivals which gave rise to the familiar but quite maccurate phrase now current in the English language. The geographical position of Orissa, with a chain of hills almost shirting the sea and much wild country in the hinter land, doubtless protected it from invasion, and the character of its inhabit ants, coupled with their poverty, which held out little hopes of adequate plunder, offered no inducement to undergo the necessary hardships. The conquest of Kalinga by Asoka is one of the outstanding facts of early Indian history, but after that time we hear little of this fract which seems to have been left to the Hindus as a play-ground to fight out their quarrels and their ambitions. It was not until 1568, when the Mogul dynasty was firmly estab lished, that Orissa fell under the sway of the Muhammadans, and even then part of it seems to have remained under Hindu princes. And since Hindus did not write history Mr. Mazumdai has been compelled to reconstruct his story from engraphic and similar records. He has shown commendable patience in this task and has written a useful book.

The Journal of the Royal Asiatic Society London—" The work is marked by wide erudition and contains much that is instructive we cannot withhold a tribute of admiration for the extraordinary intellectual energy with which he combats his physical disability"

L E B Cobden-Ramsay, Esq, CIE, retired Political Agent, Orissa Feudatories—"It is a work which merits careful reading. May I be permitted to offer you my sincere admiration for the deep scholarship and research you display in your work, the result of years of laborious research and study?"

The State man __" As M1 Mazumdar had no predecessors, he has had to undertake an extensive original study of inscriptions and public records"

Administrative System of the Marathas (from original sources), by the same author Second Edition (Revised and Enlarged) Demy 8vo pp 730 Rs 10-0

It is an exhaustive account of the polity that prevailed during the centuries of Maratha domination. Di Sen has closely studied the available original sources and this work is undoubtedly the most valuable contribution on Maratha administrative system that has yet appeared in English

Prof A Bernedale Kesth—" It contains a very large amount of interesting information, carefully put together, and rendered illuminating by comparison with the description of early Hindu institutions derived from the Dharmasastra literature. It undoubtedly sheds much light on the course of administration prior to the advent of British supremacy, and the impartiality and good sense of such personal judgments as you express deserves recognition."

Prof Jules Bloch (in the "Journal Asiatique")—"C'est un ouviage solide et important, qui fait honneur a l'auteui et a l'école ou il se iattache"

The Hon ble Justice C A Kincaid—"It is full of erudition and should long remain the classic text on the subject. I do not fancy any one else would have the industry, as well as the learning, to write another such bool I congratulate you warmly on your great achievement."

in the pre British period

"The value of his litest work seems to us to he in its impartiality and in its careful avoidance of extreme diction in cases where the author's views differ from those already expressed by both English and Indian writers. He treats Grant Duff and Ranade with equal impartiality, and does not hesit ite to point out their errors of deduction, he appreciates fully the good features of Shivan's institutions, but is equally explicit as to their shortcomings and he devotes a distinct section of his work to explaining by carefully chosen quotations and examples that much of Shivan's administrative machiners was not a new product of his unquestionably resourceful mind, but had its roots deep down in ancient Hindu lore

As to the actual facts disclosed in Dr Sen's work, their number is so many and they are so interesting that it is hardly possible to deal with them in the brief compass of a review

In conclusion, let it suffice to remark that Dr. Sen has produced an admirable work of reference for students of the history of the Deccan in the seventeenth and eighteenth centuries."

The Times Literary Supplement, Thursday, May 10, 1923—" As in the case of the Great Napoleon, Shivan the Conqueror has always been more attractive to historians than Shivan the Administrator, and less than justice has been done to his constructive ability. Dr. Surendranath Sen has vritten a scholarly analysis of the Maratha administration under Shivan and the Peshwas, and in spite of a natural bias in favour of his own countrymen he can claim to have proved that Maratha Government will at least bear favourable comparison with, and was in some respects superior to, those of contemporary Europe"

Journal of the Royal Asiatic Society, October, 1921—" Dr Surendranath Sen has given us a most careful and comprehensive work and has shown that the work begun so well by Ranade is being continued in competent hands. The fact that the Maritha Kingdom lasted for a century and a half should be sufficient to dispel the idea that the Marathas were mere bands of marauders. It comes as a surprise, however, to see what a wealth of material there is for the study of their constitutional and administrative history. The author investigates the origin and development of their institutions, analysing the influence of traditional Hindu systems of polity, and of those of their Muslim neighbours. The book is a most valuable addition to the publications of the Calcutta University."

Studies in Indian History, by the same author Demy 810 pp 294 Rs 3-0

"This small volume contains a number of papers based on Dr Sen's Marathi and Portuguese studies. Among other items may be mentioned a translation of d'Alorna's 'Instructions to his Successor Tavora' This document was written in 1750, and contains a resumé of the operations by which the Portuguese succeeded in regaining part of the ground which they had lost to their Maratha neighbours. Interesting and useful accounts of the Portuguese records at Goa and of the Portuguese documents relating to Hydei Ali and Tipu Sultan also form part of the volume. Slighter studies relate to various episodes in Marathi history. As a whole the volume

contains much that is both new and sound Dr Sen is one of the most care ful and reliable of the younger Indian writers of history. One day we hope he may give us that history of the Maratnas in the eighteenth century which he is better qualified than anyone clse to write '—Times Literary Supplement, February 5, 1931

The Dynastic History of Northern India (Early Mediæval Period), by Hemchandia Ray, M.A. (Cal.), Ph.D. (Lond.)

Vol I Royal 8vo pp 699 With ten coloured maps Rs 10-0

This complehensive work removes a long-felt want in the domain of Indian history. It attempts to give an account of the dynasties that fuled in Northern India during the period of transition intervening between the decline of the Hindu dynasties and the Muslim conquest. The work is based on a thorough examination of literary (Indian, Arabic, Persian, etc.) epigraphic and númismatic materials. No effort has been spared to make the work useful to the students of Indian history and culture. The various tables, the synchronistic charts and above all the coloured maps add to the value of the work.

Prof F W Thomas (Oxford) "' It is a very full, in fact so far as I am aware exhaustive, assemblage of all materials relating to one of the most obscure periods, whether contained in Indian or extra Indian (Persian Arabic, etc.) sources. The work seems to me to testify to great care and accuracy, and it would be a valuable aid to study and book of reference for scholars at every stage."

Dr L D Barnett (British Museum) "I consider that Dr Ray's work is the most valuable history of India that has appeared for many years, and condially congratulate him and the University of Calcutta on the publication of the first volume. A book of this character was urgently needed both in India and in the West. There exists no general history of India which treats the subject with such fullness in detail, and the present work is equally marked by soundness of judgment and synoptic width of view."

Prof Dr M Winternitz (Prague) "This is certainly one of the most valuable publications issued from the Calcutta University Press, and the most comprehensive work I know of, on an important period (c 916 to 1196 A D) of Indian History As it is based on a careful examination of literary, epigraphic, and numismatic materials, it will be indispensable to every student of Indian history. The coloured maps, the genealogical tables, the synchronistic table at the end of the volume, and the full index will be found extremely useful

Prof Jules Bloch (Pans) "I shall find this book very useful indeed I admire that vast knowledge of the author, and the thorough and critical way he has dealt with a bewildering mass of texts, mainly epigraphical I am also very thankful for the ten maps, carefully prepared by the author himself, where old names are distinguished by special ink, they add a lot to the value of the book, valuable as the text is"

Prof A Bernedale Keith (Edinburgh) "Dr Ray's treatise manifests every sign of careful research and historical skill in the estimation of the

value of evidence as well as ability to present an ordered narrative with precision and lucidity, and I shall look forward with pleasure to the appearance of the remaining volumes which will constitute a most notable contribution to our knowledge of an obscure and important epo h of the history of the northern dynasties."

Prof E J Rapson (Combridge) 'Please accept my smeere congratulations on your success in exploring all the various sources for the history of Northern India on the eve of the Muhammadan conquest, and on the clear and scholarly manner in which you have recorded the results of your investigations."

Sir Thomas Arnold "This carefully compiled treatise, based on a searching examination of materials that have not lutherto received sufficient attention from historical students constitute a really important addition to the literature on the lustory of India"

Or E I Thomas (Cumbridge). There is no doubt of the need of such an undertaking, and the way in which you are carrying it out with such clearness of statement and fullness of reference, and soundness of judgment and also with such high sense of requirements of historical research fully justifies all the appreciative notices that you have had I am glad that the work is to the honour of India and I trust that it will have an important influence on the advance of Indian historical research generally."

Vol II Royal 8vo pp 658 plus Table Rs 15-0

With this volume ends the analysis of the political history of the various dynasties that ruled in Northern India during the three or four centuries preceding the establishment of the imperialism of Delhi under the Turks. The beginnings of some of these dynasties, however, have been traced as far back as the middle of the sixth century AD while there were others which retained their vigour till the fourteenth century

Though this volume is a continuation of the first one, it has got an individuality of its own. It deals entirely with Rajput dynasties most of which sprang up in the latter days of the Imperial Pratiharas.

Vol III In preparation

The Central Authority in British India: 1774-84, by A P Dasgupta, M A (Cal.), Ph D (London) Demy 810 pp 375 Rs 5-0

This volume deals with the difficulties with which the Central authority in British India was faced during the first years of its existence, on account of the vague and limited powers entrusted to it by the Act which gave it brith, while the tradition of independence in the subordinate Presidencies died hard. It reveals the great struggle which took place between the Governor-General and Council of Bengal with the Madias Government to retain what each side interpreted to be its own position under

the Act of 1773 The background of the work is the foreign relations of the English Presidencies during the eventful period from 1774 to 1784, and it illustrates how a critical time in the history of the British in India had to be faced by a defective organisation

- Prof H Dodwell (London University) —" a sound and excellent piece of work marked by careful research and clear judgment"
- P E Roberts (Oxford) "An admirable piece of research which throws valuable light on an important controversial question. Mi Dasgupta shows excellent judgment and great impartiality and I find myself in almost complete agreement with his views—shows remarkable power of holding the balance true. His whole treatment of the subject is lucid and impartial and is a most refreshing change from the spirit of partisan ship in which Indian history is too often written."
- R B Ramsbotham (ex-Pio Vice Chancellor, Aligarh)—" offer you my warm congratulations on a valuable addition to our knowledge of the British period. It is a scholarly and workmanlike piece of research, most admirably documented, and it belongs in this respect to the new school of historical study in India which is shedding so much light on past history because scientific methods of research are employed. I think the book should be made compulsory for all students of Indian Constitutional History'
- Sir 4 Bernedale Keith (Edinburgh)—" a very useful aid to the appreciation of the complex and unsatisfactory position resulting from the inadequate and tentative provisions of the Regulating Act. It throws much light on questions imperfectly presented in the published literature, and does credit at once to the author's diligence in research and to his power of grasping essential facts and of presenting them clearly and with a due sense of value"
- India in the Seventeenth Century, by J N Dasgupta, B A (Oxon) Demy 8vo pp 285 Rs 3-8

The condition of India in respect of its political, social, and economic aspects, in the early years of the East India Company, has been described in this volume with the help of the narratives of European travellers and foreign observers who were drawn to this land by their love of adventure, the fascination of romance, and the call of the East

- The Crisis of Indian Civilisation in the Eighteenth and Early Nineteenth Century, by Prof Herman Goetz, Ph D Royal 8vo pp 56 As 12
- Ranjit Singh, by N K Sinha, MA, Ph D Demy 8vo pp 225 Rs 2-8

It is an important treatise giving much new information regarding the relations between the Sikhs and the Afghans during forty years preceding the First Afghan War. It also refers to the relations of the military monarchy of the Punjab with

the British Indian Government and other Indian States A graphic description of the system of civil administration and a critical account of the military system of Ranjit Singh are also to be found in the book

Sir William Foster, Ki —"This monograph is a modest and sincere piece of work, based upon a careful study of all available materials, including the documents in the Imperial Record Office. He has brought together in a small compass a mass of information that cannot fail to be of much value to students of the subject. The administrative details given in Chapter VIII are specially interesting."

Sir Jadunath Sarkar, Kt —"Ranjit Singh by Mr Naiendra Kiishna Sinha is a useful work. The author has treated the subject with some freshness of thought and avoided diffuse wordiness."

Principal H G Rawlinson (Decran College, Poona) —" It is a valuable little book as it is the result of much patient research and contains a good deal of fresh material"

Dr Jules Bloch (Paris) —"I find the book useful and agreeable If Mi Sinha is really as he calls himself a neophyte, we may hope much from him in the future, as he is capable of clear, well ordained as well as thoughtful writing"

Principal K Zachariah (Hooghly College) —"I do think your work does convey a clear idea of the growth of Ranjit Singh's Empire and the general organisation of his government. There are many things I should specially commend. Your critical sense, your impartiality, your lucid arrangement, your wide view of history and use of historical parallels and contrasts, your simple and clear style, all this I can honestly praise and I congratulate you on your work."

Rise of the Sikh Power, by N K Sınha, M A , Ph D Demy 8vo pp 249+2 maps Rs 4-0

In this book an attempt has been made by the author to trace the history of the Sikh struggle for independence in the eighteenth century and Sikh rule in the Punjab before the advent of Ranjit Singh

H L O Garrett in JRAS—" The book is a useful and careful contribution to the history of a little known period of Indian history. The authorities are not many and some of them are of little value, but the author in his bibliography clearly indicates what is likely to be of value to any future investigator. The author has wisely made use of Whitehead's Catalogue of Coins in the Lahore Museum."

Evolution of the Khalsa, Vol. I, by Indubhushan Banerjee, MA Demy 8vo pp 320 Rs 4-0

The author here traces the evolution of Sikhism till Guru Govind Singh introduced his reforms and brought the Khalsa into existence. The first volume deals with the foundation of the Sikh Panth and covers the period till 1604 when the Granth Sahib was compiled and the peaceful evolution of Sikhism practically came to an end. The background of the movement

has also been brought under review and the concluding chapter gives a detailed analysis of Sikh ideals and institutions

Prof A B Keith —"This is a very interesting book, written in a historical spirit and with intelligent comprehension of religious ideals. Chapter VI on Ideals and Institutions is a well-balanced presentation of the position and reflects credit on the author's judgment. Appendix A on Guru Nanak and the Caste system is a moderate and cogent statement which probably gives the truth of a disputed position."

The Santal Insurrection of 1855-57, by Kalıkınkaı Datta, M.A., Ph D. Royal 8vo pp. xı + 163 1940 Re 1-8

The Santal Insurrection of 1855-57 is an important episode in the annals of Bengal and Biliai during the mid-nineteenth century, which forms, in many ways a transitional period in the history of India as a whole It had been so long referred to, rather briefly, by some writers. In this volume the author has made an exhaustive and critical study of the subject on the basis of some original unpublished records, discovered by him in Government archives and in private collections interesting details regarding the early history of the modern district of Santal Paraganas, formation of the Damin-1-koh with its administration and economic condition and immigration of the Santals into the skirts of the Rajmahal Hills The causes of the Insurrection and its sequel leading to the formation of the modern district of Santal Parganas have been scientifically discussed. A study of this book would serve to remove many wrong notions, relating to the history and ethnology district, that are entertained by some even to-day

The work deals with a little known incident and it bears ample evidence to the erudition and industry of the learned author who has already made his name as an accurate historical investigator. It is, in my opinion, a very valuable addition to the works on Indian History published by the Calcutta University Press "Prof. S. N. Sen, Keeper of Records of the Government of India

"In this volume Di Datta has thrown sufficient light on one of the least known but important episodes in the history of Bengal and Bihar on the eve of the Mutiny of 1857 59. His account is based on a comprehensive study of a variety of original sources, such as the unpublished records of the E I Compliny, contemporary Bengali manuscripts, contemporary ballads and autobiographies and some contemporary papers like 'The Friend of India,' 'The Calcutta Review' etc. Being an inhabitant of the Santal Parganas, he has been able to collect some of these materials, and to determine accurately the topographical details, by conducting personal tours through the remote interior parts of that district. As usual with the learned author, all his statements have been made on the strength of documentary evidence, and his conclusions are accordingly critical and rational. His language and expressions are admirable. We consider the study of this piece of work to be indispensable for an accurate knowledge of the history of a corner of our country during the transitional period of the mid-nineteenth century. The book contains a very useful map, and its printing and get up are excellent. We congratulate the University of Calcutta for having published this book, which, we confidently believe, forms a precious addition to the stock of scientific historical literature relating to Modern India."—

Historical Records of Baroda, by Rai Bahadui B. A. Gupte, M.R.A.S., F.Z.S. (with annotations) Royal 810 pp. 166 Rs. 6-0

Compiled from original Maratha documents which throw a ride-light on the transactions of the Hon'ble East India Company's Officers, the book offers glumpses of the Baroda administration, describes the Poona politics during the last stages of the Maratha Empire, and records the working of the almost nominal sway of the Raja of Satara. Profusely illustrated

Aspects of Bengali Society, by Tamonashchandra Dasgupta, MA. Ph D. Royal 810 pp. 109 Rs. 1-8

Dr Dasgupta's work, originally a thesis for the Doctorate of the Calcutta University, embodies the result of the research-work carried for a number of years in the field of the Social History of Bengal and contains a wealth of important material for which the author has ransacked old Bengali literature with admirable patience. It is a most lucid and authoritative account of social conditions prevailing in Bengal during the Middle Ages. The ground it covers has never been covered before. "Ship-building and Commerce," "Hindu-Moslem Umity," "Architecture," "Religion," "Agriculture," "Economic Condition," are some of the chapter-headings.

- as it may be, can compare with the picture you have given. From materials collected with an untiring industry, you have built up something living, and full of life indeed. Years ago, I could see from your information on ships and sea trade, so kindly compiled on my request, that your place was among the best gifted young scholars of India. I can assure you that I constantly refer to your papers, whenever I do not happen to find exactly the information I am hunting for I come across facts and dates which prove important in some other lines. When your example inspires a team of young workers who would do for the whole of India what you have so happily done for Bengal, then a real history of modern India can be written instead of local or imperial of ronicles centering around rajas and padishahs, we shall get an image of Indian people, Indian life, Indian activity. Your chaining chapter on birds comes as a lovely conclusion, you have not to apologise for it, but we have to thank you for this valuable addition."
- 2 Luzac's Oriental List and Book Review—"It embraces a wide inge of topics ship building commerce, architecture, warfare war music, pastimes, clothes ornaments and cooking, besides which there are some more general chapters on manners and customs and Hindu-Moslem unity, the latter containing some instructive instances of the tendency of the two faiths—now a days rather sadly at variance—to coalesce We read of Brahmins consulting the Koran to find out an auspicious day and of a Mahomedan poet dedicating his poems to Krishna

[&]quot;The book is valuable as well as interesting. It contains a mass of carefully sorted out details never before made available with lists of technical words, articles of trade and the like which make it a most useful book of reference."

- 3 The Modern Serieu —" He has patiently and faithfully collected the materials on eleven topics, and those who depend on and are in need of such materials will derive much benefit from the work under notice."
- 1 1 Bernedale Keith—'It contains a remarkable amount of detailed information not available elsewhere. The author is to be congratulated of the care with which he has collected material and on the interesting manner in which it is presented. Especial value attaches to the illustrations which add very greatly to the usefulness of the text. The work is a notable addition to the long list of important publications of the University of Calcutta."
- 5 Prof Di M Winternitz—"This is one of the most interesting and aluable books that have lately come before my eyes. It throws a flood of light on the social, religious and cultural life of Bengil in former centuries. But far from being of interest only for the history of Bengal, it will be thankfully welcomed by all Indologists interested in the social history of India."
- 6 Prof Di Sten Konou It is a delightful book, full of useful in formation, and so well arranged that it can be used as a handy book of reference"
- 7 Prof E J Thomas—'The work is of extreme interest not only for the social history of Bengal but also for the light it throws upon technical matters in Bengali and other Indian literatures that need explanation. I hope that the author will continue his studies, which, with their exact references and personal investigations, will be of great help to all students of Indian culture"

Indian Nationality (Calcutta University Jubilee Research Prize Thesis), by Sukumai Dutt, MA, BL, PhD, Vice-Principal, Ramjas College, Delhi Royal 8vo pp 210 Rs 3-0

Contents Introduction

Basic Factors of Indian Life
The Problem of Nationality
The Meaning of Indian Nationality
Present Tendencies towards Development of
Nationality

The work is a concise academic study of an outstanding problem of Indian constitutional politics. The treatment is from a strikingly original point of view. Current conceptions of Nationality are acutely analysed and exposed and an entirely new conception of Indian Nationality is propounded. The work is eminently helpful to all statesmen and students of Indian life and history who have to deal with India, whether in the field of practical politics or in the sphere of academic study.

Studies in the History of the Bengal Subah, 1740-70, Vol I (Social and Economic), by Kalikinkai Datta, MA, Ph D Demy 8vo pp 587 Rs 5-8

The author has made a laudable effort to throw new light on some of the least known aspects of the social and economic history of Bengal from a study of a huge mass of literary and documentary records. His reconstruction of the social history will prove of immense interest. The major part of the volume has been devoted to the East India Company, their factories in this province, their purchases and sales, their agents and officers and the inquisitive student will find these chapters a valuable mine of information

Sir Evan Cotton—"It is already evident to me that the volume iepie sents a distinct and valuable contribution to the history of the period. The value of the book is greatly enhanced by its careful documentation which enables the reader to visualide most graphically the conditions which prevailed in Bengal in Pre British days. I feel honoured to possess a copy of Mr. Datta's book."

Sir Jadunath Sarkar - "The information collected by you is esting "

"The study of the material, cultural and social condition of the people of Bengal in the period of transition that intervened between the virtual disappearance of Mughal Imperial authority from the province and effective establishment of the Company's rule, is based on the indigenous literature, Bengali, Sanskrit and Persian, and on the Company's recoids It throws light on a number of obscure phases and accounts of travellers The book has extensively utilised the of popular life and activity available original sources and has brought together a vast amount of recondite matter. The documentation is perhaps overfull and we have here a proper sequel to such works as R. C. Dutt's Economic History, Wheeler's Early Records of British India, J. C. Sinha's Economic Annals of Bengal and C. J. Hamilton's Trade Relations "—The Journal of Indian

"It is an honest and painstaking attempt to piece together scattered and sometime unpublished information regarding little known aspects of the political and economic history of Bengal during the eighteenth century. It has a fairly adequate bibliography and a useful index. The map of the Inland Navigation after Rennel is an interesting reproduction.

The author knows his materials well and his judgment is sound "-The Journal of the Bihar and Orissa Research Society

- "The learned author has drawn upon a-mass of unpublished Records of the East India Company which throw a flood of light on the subject matter. He has made an extensive and exhaustive study of the contemporary Bengali, Sanskrit and Persian literature to write a connected social history of the country. Some of the books utilised by him are in manuscript and are not widely known to the literary world. Not only the professed students of history but also the public in general, we believe, will find the book interesting and useful. No other writer, Indian or European, has been able to present such a present such a present process. has been able to present such a mass of materials regarding the internal life of the factories of the East India Company as this indefatigable investi gator has done We congratulate the author and the University of Calcutta on the production of this illuminating social and economic history of our country "—The Amrita Bazar Patrika
- ' Dr Datta is justly looked upon as a scholar whose researches invest his work with authority. In this book he has made an honest and laudable attempt to collect minute and interesting details regarding the little known aspects of the social and economic history of Bengal, during the period of transition that intervened between the collapse of Mughal imperial authority in the province and the effective establishment of the Butish Erst India Company's Indeed, the real history of the people of our country has yet to be written, and we have no hesitation in considering this work to be one of the pioneer works in this direction. It is striking that the learned author has laboured hard to base his accounts on comprehensive and exhaus tive studies of a variety of sources, many of which were till then unpublished and little known. The work is studiously impartial in its tone, and many of its expressions are very suggestive and significant. We believe that the book would be studied with interest and profit by all, who are interested in the past history of their country, and trust that Dr. Datta would try to write a similar volume for the last quarter of the eighteenth century."—

Alivardi and His Times, by Kalikinkai Datta, M A, Ph D Royal 8vo pp xix and 308 (Cal) 1939 Rs 4-0

"Dr K K Datta of Patna has done specialised work in the History of Bengal and Bihai in the middle of the 18th century as that period wit

nessed great political changes and other transformation, all pregnant with significant issues for the future

- "Rightly enough, Dr Datta examines the trade conditions and facilities of Bengal in a separate chapter and describes the general economic condition and the social aspect of life in others"
- "The book is illustrated by two maps carefully prepared and has been as usual with the author, based on the utilisation of contemporary documents of all kinds including records of European Companies with particular stress laid on the incidental glimpses of economic and social life that some of them give. This book is on the whole in able and instructive supplement of a predominantly political character to the author's earlier study of the Economic and Social History of the times. We congritulate him heartily on this production which is marked by a high level of scholarship combined with accuracy of information, an elaborate study of the sources and balanced presentation of findings. The book is a model piece of workmanship by a careful researcher who has spaced no pains to make his treatment thorough and intensive "—Journal of Indian Ilistory
- "Alivardi's reign does, indeed, mark a crucial point in Bengal's history, and Di Datta's well documented account will be very welcome
- "It is sometimes forgotten that Bengal his not always been primarily an agricultural country, her commerce was remarkable and extended from Chini to Africa. From about the middle of the eighteenth century, the economic degeneration of Bengal and especially of Western Bengal, began. For this the servants of the East India Company who were not particularly attractive creatures, were, along with the Maratha intruders very largely responsible. Political disorders which had begun several years before 1757 reflected on the economic situation which was aggravated by the grasping policy of the Company and its servants.
- "Di Datta has appended a critical bibliography and several useful maps"—The Statesman
- "The 18th century with the fateful battle of Plassey (1757) is most important in the history of Bengal as well as in the history of British relations with India. The credit of making the first systematic and exhaustive survey of that century with Alivardi (ruling Bengal between 1710 56) as the central figure goes to Prof. Dr. Kalikinkai Datta."
- "Di Datta's survey of education, of the position of woman of the social relations between the Hindus and the Moslems of Bengal, open a new field for research in which he will be honoured as a pioneer and we hope that he will enrich our historical literature with many such precious volumes "
 —New Asia
- "In this volume we read in considerable detail the romantic story of Alivardi's rise to power and of the terrible difficulties he had to contend with in order to maintain it. An interesting chapter is that which describes the character of Alivardi's administration. The author is able to establish that the success of Alivardi's government depended on the zealous services of a band of able Hindu officers, civil and military."—The Indian Culture
- "His accounts are based on a comprehensive and critical study of a number of original sources such as contemporary works in Persian, published records of the East India Company, unpublished records of the East India Company preserved in the archives of the Government of India, some French letters, works of contemporary European writers, Marathi documents compiled in the 'Selections from the Peshwa Daftar' and Arthasik Patravyavihar and contemporary literature in Bengali is well as Sanskiit Some documents in English and Persian have been brought to light, and utilised by him for historical purposes, for the first time
- Every page of the book bears evidence of the indefatigable industry and critical historical judgment of Dr. Datta, who has already earned for himself the deserved reputation of a sound scholar for his valuable researches in Modern Indian History. The author's style is lucid and

suggestive A map of Bengal, Bihai and Olissa in the mid eighteenth century and a plan of the battle of Gilia, incorporated in the book, would be helpful to the students in understanding the topographical details which the writer has tried hard to make as much accurate as possible. A critical bibliography and an analytical index, given at the end of the volume, have greatly enhanced its value—The Amritabazai Patrika

The author's narrative, based upon a first hand study of the records and enriched with his careful observations, is accurate and scholarly, his style is easy and flowing, his historical reflections are always thoughtful, his estimate of characters is sound and just. We have no doubt that the present work will remain for a long time to come the standard authority on the subject which it treats "—Journal of the Greater India Society

'Di Datta has given i vivid picture of the horiors of those days on the authority of contemporary European and Indian writers including Gangarama who was an eye witness of the Maratha ravages in Bengal and completed his Maharastrapurana (in Bengal) towards the close of the yeri 1751 AD. The author has also given an able survey of the commerce and industries of Bengal in the 18th century. Chapter VIII of the book deals with such interesting topics as agriculture, market prices of articles, and the manufacture of guns and boats, silk and cotton cloth, muslin, etc. Society has been described from different aspects such as education, position of women, and social relations between Hindus and Musalmans—The Indian Historical Quarterly

I must congratulate you on the excellent way in which you have dealt with the subject. It shows extensive reading and critical ability of a high order. The style is lucid and attractive "—R. C. Majumdar, Vice Chanceller, Dacca University

Exploration in Tibet, by Swami Pianavananda (of the Holi Kailas and Manosaiovai) Demy 8vo pp 160, with Illustrations and Maps 1939 Rs 2-8

Extracts from the Foreward by Dr S P Chatterjee, M Sc, Ph D (Lond), Dr De L'Universite, Paris, F G S — "The book consists of two parts. In the first part, the author after giving a general description of the area deals with the various phenomena that he observed during the freezing and the melting of the lakes—Manusarovar and Rakshas Tal. The crevasse, locally known as mayin, along the edge of which blocks of ice are piled up, is a peculiar surface feature of Manasarovar when it freezes. The Swamm is the first explorer who studied the lakes continuously during the whole of the winter and the early spring, and has given us a vivid and picturesque description of the changing surface features of the lakes during this period. His descriptions of the people and their mode of living, though brief, are no less interesting.

In the second part of the book, the author takes up the question of the sources of the four great rivers and attempts to tackle it thoroughly in an exhaustive manner. The problem of fixing the sources of rivers is a difficult one, especially in a region like Tibet, where rivers are continuously cutting back by headwiter erosion. It requires a detailed and careful study before mything like a last word can be said on this point. I am glad to find

that the Swami is not dogmatic in his assertions for less egoistic. He examines systematically the different criteria which professional geographers usually apply in the case of the four great rivers, and arrives at the conclusion that it would be most reasonable and nearer the truth to accept the traditional sources. He draws the attention of the reader to certain inconsistencies in Di. Sven Hedin's treatment of the subject though I am sure, that the Swami's administion and regard for Dr. Sven Hedin, as an explorer and one of the greatest geographers, are in no way less than anybody elses.

I am confident that this book will be widely appreciated both in India and abroad, and I hope that it will do much to start lively discussions on the four great Indian rivers, and to rivet the attention of geographics all the world over on this important problems the sources of these rivers once again.

3. EUROPE

European Alliance (1815-1825), by Prof. C. K. Webster, M.A., Intt D. Royal 840 pp. 91 Re. 1-8

The book consists of six lectures delivered in the University in 1927. The author has shown how the Great Powers of Europe formed an Alliance originally to protect Europe from French aggrandisement during the Napoleonic period and has discussed the different aspects of the Alliance. He has shown what changes had occurred in the Alliance after the Conference of Aix-la-Chapelle (1818-1820) and what attitude the Alliance took towards the Spanish Revolution (1820-23). In the last Lecture he has compared the Alliance with the new institution, the League of Nations

Sir Ahmad Husain Amin Jung, Kt, M1, LLD, etc—" an excellent work — is evidently the result of fine research and adminable industry—The Calcutta University has added a bright chapter to Islamic History"

Advance—"

one indeed feels curious to know interesting details about the Administration of Justice during a very long period of Indian History the general public will greatly profit by the book laboriously compiled by an expert Going through the book one is impressed by certain facts that even in those periods there was an elaborate procedure for appeal, revision and review of judgment the author has given a very good survey of a period which has of late attracted our attention. The book will certainly command wide popularity."

I orward — ' the writer has gone to the original sources for his rim materials out of which he has constructed an edifice that appears to be a replica of the Courts of Law is they existed during the Mahoniedan times. The book does not strike one as a laboured apologia but an account of facts so far as the author has been able to ascertain.'

Y. RELIGION AND PHILOSOPHY

The Nyaya Theory of Knowledge: A critical study of some problems of Logic and Metaphysics, by S. C. Chatterjee M.A., Ph.D. Royal 810 pp. 121+11. 1939 Rs. 5-0

The book gives a clear and complete account of the Nyāya Ispistemology, compares it with the rival theories of other Indian and Western systems, and attempts a critical estimation of its worth. It will be valuable to all students of Logic and Metaphysics.

Sir S Radhakrishnan — 'A clear and complete statement of the Nyaya Pheory of Knowledge References to Western Systems of thought are always interesting and often illuminating

Professor M Hirmanna —"It is, in every way, a scholarly work and if forms, in my opinion, a very valuable contribution to modern studies of the Indian systems of philosophy"

Mr C L M load —"Professor Chatter, ee's book which is full, thorough and clear, is a model of philosophical writing

Professor A B Keith—"The outlier has rendered a very substantial service to the study of Indian philosophy by his circful exposition of the essential Nyiya doctrines—with due regard to other Indian theories and to Western Philosophical conceptions. His constant effort to avoid mere presentation of his authorities and instead to make clear the implications of their doctrines expressed in the terminology of modern philosophy is unquestionably the most effective way of making Indian philosophy a real and living factor in present day metaphysical theory."

An Introduction to Indian Philosophy, by S. C. Chatterjee, M.A., Ph.D. and D. M. Datta, M.A., Ph.D. Demy 8vo pp. 464+xviii 1939 Rs 3-8

This book provides a simple introduction to the Indian systems of philosophy and gives a fairly comprehensive account of the Cārvāka, Jama, Bauddha, Nyāya, Vaišesika, Sānkhya Yoga, Mīmāmsā and Vedānta systems. It has been primarily written for beginners. The first chapter which contains the general principles and basic features of Indian philosophy, as well as a brief sketch of each system, gives the student a bird'seye view of the entire field and prepares him for a more intensive study of the systems which are contained in the following chapters. The book will suit the needs of university students at different stages as well as of general readers interested in Indian philosophy.

Sir S Radhahrishnan — I cannot think of better introduction to the subject of Indian philosophy for beginners

Professor M. Hirinanna. - It is written in a simple and clear style and the account of the cluef systems of Indian thought is both full and faithful."

The Foundations of Living Faiths (Stephanos Virmalenda Ghosh Lectures on Comparative Religion), by H. D. Bhattacharva, M.A., B.L., Head of the Department of Philosophy and Provost, Jagannath Hall, Dacca University Royal Sco. pp. 538 Rs. 5-8

The first volume now published of this introduction to Comparative Religion consists of the following chapters

(1) The Living Faiths (2) The Prophets (3) The Revelations (4) The Gods of Hinduism Vedic (5) The Gods of Hinduism Pauranic (6) God in Tudaism (7) God in Christianity (8) God in Islam, (9) God in Zoroastrianism Gothic (10) God in Zoroastrianism post Gothic

Here have been marshalled for the first time the main teatures of all the living religions of the world in a comparative setting. The second volume will deal with the idea of God in the remaining living religions as also with the religious practices and the ethical and eschatological concepts of all the living religions. The book is being already used as a text-book for advanced students in Philosophy of Religion in some Indian Universities.

Philosophical Reticus—" The very fact that this publication appears in India and the way in which the author presents his clear and sound ideas without in the least diamatizing them, gives ground for the fear that it will probably become only very little known among Western students. That would be highly regrettable, because the author proves to be a spiritual personality whose statements are of religious importance. In contradiction to so many living Indian scholars, Bhattacharyva is not at all spoilt by his elaborate Western education, he has preserved the Indian way of looking at religious problems, though on the other hand he is well acquainted with American philosophy, contemporary European theology, and the psychology of C. G. Jung. The book is filled with inspiring remarks not only in the chapters about Indian religion but also in those about Judaism, Christianity, Islam and Zoroastrianism, where the author presents well digested results of recent research."

Hibbert Journal — After introductory discussions of the character of living religions, and the nature and importance of prophecy and revelation Mi Bhattacharyy proceeds to a historical survey of the development of the conception of God in Hinduism, Judaism, Christianity, Islam and Zoroas trianism. It is not possible here to follow these accounts in detail or to give any conception of the wealth of information which Mr Bhattacharyya uses to illustrate his argument—the main interest of the volume for British readers is that it contains accounts of the great living religious by a representative and well informed Indian writer and teacher—"—(Extract from a long review)

Oriental Literary Digest — "Although the author's religious convictions are Hindu his attitude is strictly that of a scientific student who wants to achieve a fair and sympathetic appreciation and his presentation is objective and free from unnecessary bias of emphasis. In making a comparative evaluation of the essentials of these living faiths his general method is critical and expository, but that he does not ignore the historical antice dents will be clear from the fact that he takes into account the Vedic and Gothic systems, and nowhere does he pass over the sociological significance of background

The reviewer feels that a few words of facile recommendation in a short notice are not enough to deal with a work of such scope, interest and value but he has no doubt that the work is the product of much thought and learning, and its interest as wide as humanity. It is not the author's intention to present comprehensive or merely scholarly accounts of the various systems, but to clarify our understanding of their important and enduring contribution to the culture of the world. If his criticisms sometimes receive a somewhat clear cut or blunt expression, they are judicious and proceed from mature conviction born of wide reading and honest reflection. Of the surveys of particular faiths, which are presented with a wealth of knowledge and freedom from preconceived notions, the most interesting perhaps is that of Zoroastrianism, the treatment of which is in many points strikingly refreshing and illuminating."

The Amrita Bazar Patrika -" While the book is intended mainly for the benefit of the students of philosophy vet it is nonetheless a compendium for the serious minded readers who will find it illuminating in many While speaking on the subject of religion, the most dry subject perhaps, the author has not faltered anywhere to make his book a pleasant reading so far as the language and the treatment are conceined. This is an relievement no doubt. He has been able to give collectively such a view of the principal religious of the world as has not hitherto been attainable—a bird's eye view of the field which will enable the reader with little time at his disposal to appreciate the relations of the various systems and to form some intelligent conception of what is involved in the study of comparative religion In short Mr Bhattacharvya's book is a remarkable contribution to the literature of religious thought and it will undoubtedly prove very valuable and fascinating. There is no other that we know of which his been compiled in exactly the same representative way and the Calcutta University has more than justified its choice by the issue of such a book'

Prof 1 B Keith — In a work covering so wide a field it is inevitable that there should be much that will be strenuously questioned by experts in the several topics of which this volume treats—but there is no doubt that it represents a determined effort to think out the problems of religion—and is such deserves full consideration by all those who concern themselves with the spiritual aspect of human nature.

Prof II G de Burgh — I write to tell vou how interesting I have found it. It is in my judgment a valuable contribution to the study of Comparative Religion both because of the wide sweep of knowledge possessed by the author and because of his fairness and impartiality in treating of faith-other than his own. It is evidence of the thoroughness of research and of real insight into the significance of the various religions treated. Of course I am not qualified to speak with any authority on Hindu religions, Islam, or

Zoroastremsm I thought the chapter on Judaism admirable I could not help wishing that fuller treatment had been given to Christianity, for there perhaps, more than anywhere else, you get a religion that is at once theoretic and metaphysical But I have found the book very interesting "

Sir Philip Harton — ' It offers further evidence of the encyclopaedic linowledge, penetrating intelligence and desire to be fair to all philosophers views, however different from his own, which I have long known to be characteristic of Mi Bhattacharyya's work "

Rai Banadui G C Ghosh, CIE —" is I was instrumental in your relection as the first Indian savant as a lecturer I am very much gratified with your achievement

- " I find in you my desired objective truly satisfied You have glorified blessed religion, the best gift of God to man
- "the public including myself are most appreciative of the exhibition of his vast learning and proficiency in his book which I personally think will remain a masterpiece of religio philosophical product on comprising the subjects of many a religion of the world past and present."
- Comparative Religion (Stephanos Numalendu Ghosh Lectures), by Prof A A Macdonell, M A (Oxon), Ph D (Leipzig), D Litt (Edin), D O L (Calcutta) Royal 8vo pp 194 Rs 3-0

The work is the first course of lectures on Comparative Religion delivered under the auspices of the Stephanos Niimalendu Ghosh foundation. The author has given a survey, in eight lectures, of all the important religions of antiquity, including an introductory one on 'Primitive Religion' They embrace Confucianism, Zoroastrianism, Brahmanism (including Buddhism), Greek religion, Judaism, Muhammadanism and Christianity. These religions are treated objectively, not from the point of view of any particular one. It has been shown what they have in common, and to what extent each approaches universality, to the outlook of a world religion.

- Immanuel Kant on Philosophy in General (Translated with four Introductory Essays), by Humayun Kabii, Scholai of Government of Bengal at Exeter College, Oxford, and Lecturer in Philosophy and English Literature, Calcutta University Demy 8vo pp 238 Rs 5-0

Here we have the first English translation of a work which contains, within a short compass, one of the fullest statements of Kant's general position, and an indication of the lines along which his mind was working during those glorious years when he wrote the three *Critiques*

- R R Marett, MA, DSc, LLD, FBA, Rector of Exeter College, Oxford—"Mr Kabir is one of the most brilliant students that has been at Exeter College in recent years. His book fully bears on this judgment, for not only does it render a fairly difficult, because technical, essay of Kant into accurate and vigorous English but it adds an exposition of the whole Kantian outlook which, while exceedingly compendious, brings out the salient points with great lucidity and insight"
- H J Paton, MA, D Litt, Dean of the Faculty of Arts, Glasgow—"Mr Kabir has performed a real service in calling attention to a part of Kant's writings comparatively unknown in this country. His introductory essays are useful and although there is a good deal in them with which I cannot myself agree, I am certain he is on the right lines in moving away from certain doctrines far too widely accepted at the present time"
- Prof Dr Rudolf Metz, Heidelbeig —"The complete text was published in German by Cassirer only 13 years ago (in 1922), and as it contains a very good and concise rendering of Kant's philosophy in general, which, in this form, is hardly to be found anywhere else in Kant's writings, I think that Mr Kabir has done a very good service to the study of Kant's Philosophy in Anglo Saxon countries in translating it into English
- 'I have perused the introductory essays and have compared the tran slation with the original I think that the essays are very well written and full of useful and important information I find the translation, as far as I can judge, very good, correct and readable"
- "Mr Kabir's presentation of his thesis leaves nothing to be desired. The book as a whole, and in detail, offers delightful reading, and is admirably perspicacious and persuasive, although polemical in a sense "—The Statesman".
- Dr Gerhard Lehmann, D Phil, D Litt etc (Berlin) —"I find the translation of my edition of Kant's First Introduction in this book very

good The other parts of the composition too are excellent and give proof of the great level of the philosophical demands in your country"

"To make this Introduction readily available in English was there fore highly desirable, and appreciation is due to Mi Kabir for his competent service in this regard, as well as for his prefatory essays discussing salient aspects of Kant's philosophy and summarising and comparing the two Introductions of the Critique of Judgment"—The Monist

'While it would certainly be an enggeration to describe Ueber Philosophic ucberhaupt as one of the most important works of Kant or as providing much that could not be found elsewhere in his philosophy, it is very desirable that there should be an English translation and there is no doubt that attention to it will make some parts more clear than they otherwise would be. In addition to the translation, Mr. Kabir has provided us with a set of introductory essays. They seem to me to show great ability, and I hope sincerely that they may be the prelude to a larger work on Kant some time in the future. He is distinctly original also in thought and statement and throws new light on several points in Kant. English readers of Kant should be very thankful for this the first English translation of the work, and I admire Mr. Kabir's skill in splitting up the cumbrous German sentences so judiciously and with such a readable result.'—Mind

H H Price Professor of Logic (Oxford) —"I think you have done a most useful piece of service in translating a piece of work which was quite unknown and which is certainly well worth translating. The Critique of Judgment is a very difficult and at the same time very tantalising book

I have this feeling especially about the section on the Beautiful, and here your book is particularly helpful to me. There is another important difficulty in the Kantian system which you discuss in your own introductory essays, and on which you have helped me a lot. The point you bring out (to put it in my own lather Cambridge way) is that in the third Critique Kant saw that the principle of Determinism is not by itself sufficient and must be supplemented or specified by some further principle if scientific induction is to be possible."

A Genetic History of the Problems of Philosophy, by the late Muralydhar Banerjee, M.A. Developed and completed by his son Hiranmay Banerjee, I.C.S. Royal 8vo pp. 308 Rs. 3-8

The book is not so much a history of Philosophy, as the shaping out of a new system of Philosophy, based on a new method of its own, which it calls the genetic method of the treatment of Philosophy All problems of Philosophy pass through the three stages of harmony, conflict and subsequent re-establishment of harmony, it compares and makes reference to all important systems, with regard to their viewpoints, about each problem. It holds forward a new theory of the totality of reality.

- The Early History of the Vaishnava Sect, by Hemchandia Raychaudhuii, M.A., Ph.D. (Second Edition, Revised and Enlarged.) Demy 8vo pp. 247 Rs 3-8

The book contains materials for a connected history of Vaishnavism from the Vedic times to the age of the early Tamil Acharyas who laid the foundation of the Sii Vaishnava School The author takes into consideration only works of proved antiquity and epigraphical records. His method of treatment is strictly scientific, and he comes to a number of interesting conclusions, among which the most important is the establishment of the historic personality of Vasudeva-Krishna and the determination of the doctrines of the old Bhagavata sect. The book is quoted as an authority in Bainett's Hindu Gods and Heroes, Winternitz's A History of Indian Literature and W. Douglas P. Hill's Bhagavadgita, etc.

"The lectures of Mr Hemchandia Raychaudhuii on the 'Early History of the Vaishnava Sect' read almost as would a Bampton lecture on the 'Historical Christ' to a Christian audience. They are an attempt to disentangle the authentic figure of Krishna from the mass of Puranic legend and gross trad tion and from the wild confectures and mistaken, if reasoned, theories which surround his name. The worship of Krishna is not a superstitious idolatry, it is the expression of the Bhakti, the devotional faith of an intellectual people, and many missionaries ill equipped for dealing with a dimly understood creed, would do well to study this little volume.—The Times Literary Supplement, May 12, 1921.

 - A monumental work Di Vidyabhushan has given here a detailed account of the system of Nyaya, and has left no source of information, whether Brahmanical, or Buddhist (Indian and Tibetan), or Jama, untapped The history is brought down from the days of the Vedas to the 19th century, and is full of facts well disposed and lucidly set forth
 - "The work reflects the highest oredit on its late author. It contains a vast mass of carefully verified information lucidly arranged and expounded and it is invariable to every serious student of Indian Logic. It must for a very long period form an indispensable source of material for workers in the field of Indian Philosophy, and whatever difference there may be with the views of the author, whether in principle or in detail, they cannot possibly obscure the permanent value of a work which—as any one familiar with Indian Logic knows only too well—must have involved almost endless labour. The University of Calcutta is to be congratulated on the fact that it was found possible to produce the book despite the author's death before its completion, and the thanks of scholars are due to it for the production of the work in such an effective and enduring form "—Prof 4 Berriedale Keith
- A Short History of the Mediæval School of Indian Logic by the same author Royal 8vo pp 210 Rs 7-8

Sankhya Conception of Personality, by Abhaykumar Majumdai, MA Edited by JK Majumdai, MA, PhD, Bailister-at-Law With a Foreword by Sir S Radhakrishnan Royal 800 pp 174 Rs 2-8

A unque book of original research containing a new interpretation of the Sankhya Philosophy

Advance — "A remarkable work on Sankhya Philosophy — The author has propounded rather staitling and almost epoch making interpretations of what is traditionally known as Sankhya Philosophy, showing for the first time how Kapila's idealism could be reconciled with the Hegelian on the one hand and with the Vedantic on the other — The author develops, by way of a critical analysis, of all existing texts bearing on Sankhya Philosophy, new conclusions apparently at variance with traditional theories but none the less sustained by a wealth of historical learning and power of philosophical criticism which extort admiration "

Liberty —"Interesting and illuminating The book is a bold challenge to the customary interpretation of the Sankhya Philosophy and gives a rude shock to the sense of security with which we memorise and reproduce the traditional views of that system Being based on a critical examination of the sutras and some commentaries and being further rein forced by quotations from the authoritative Puranas containing references to Sankhya theories, the views of the author cannot be lightly brushed aside, however much our wounded prejudices be tempted to do so The book does a great service at least by calling our attention to the urgent necessity of going back to the surfax and trying to understand them by themselves and also in the light of other ancient texts without allowing ourselves to be prejudiced by the views of the commentators. The book cannot fail, therefore, to commend itself to the students of Indian Philosophy."

Philosophical Currents of the Present Day, by L Stein (translated by Sisirkumar Maitia, M A, Ph D)

Vol I Royal 8vo pp 250 1918 Rs 4-8
Vol II Royal 8vo pp 162 1919 Rs 4-8
Vol III Royal 8vo pp 237 1935 Rs 3-8

The book is a translation of the well-known work of Ludwig Stein It contains a description and critical examination of the philosophical movements of the present day. The contents of the three volumes are as follows

Vol I I The Neo-Idealistic Movement II The Neo-Positivistic Movement (the "Pragmatism" of William James)

III The Recent Movement of Nature Philosophy (Wilhelm Ostwald's "Energetics") IV The Neo-Romantic Movement V The Neo-Vitalistic Movement

Vol II VI The Neo-Realistic Movement (the Transcendental Realism of Educate and a Hartmann and the Co-Relativitism of To-day) VII The Evolutionistic Movement (Herbert Spencer and his Successors) VIII The Individualistic Movement IX The Mental Science Movement (William Dilthey) X The History of Philosophical Movement (Edward Zellar, 1814-1908)

Vol III XI The Problem of Knowledge XII The Problem of Religion XIII The Sociological Problem XIV The Problem of Toleration XV The Problem of Authority XVI The Problem of History

Considering Prof Stein's eminence as a Social Philosopher the third volume may be looked upon as the most important of the three volumes. The famous Chapter on Authority is, according to the author, the keystone of his Philosophy. This volume contains a preface, especially written by the author for the English edition. An extract from the preface is given below.

"I am extremely grateful to my English translator for this, that he has made the first attempt to make my Philosophy accessible to the English-speaking world - - - t is my bounden duty to express my heartiest thanks publicly to the translator of this work, because he had the courage to take up in the midst of the War, the work of a Swiss written in German."

'The translation seems to me most readable and the printing, all that could be desired. It has obviously been a labour of love to you to make the unitings of this distinguished uniter accessible to English and American readers "—Prof. J. H. Murihead.

Hegelianism and Human Personality, by Hualal Haldar, MA, PhD Demy 8vo pp 67 Rs 3-12

The theory advanced in this book provides a philosophical foundation for the empirical fact of multiple personality. It also explains what the 'subliminal self' of man is. The author gives his own interpretation of Hegel's teaching which is that according to Hegel the Absolute is not a unitary personality but a self-conscious unity of a plurality of selves

Introduction to Advaita Philosophy (English Edition), by Kokileswai Sastii, Vidyaiatna, M.A. (Second Edition, thoroughly revised and enlarged). Demy 8vo pp. 280
Rs. 4-0

The work is a brilliant exposition of the Sankara-School of the Vedanta Philosophy The most striking feature of the work is the full consideration of various altogether-new issues such as

(1) whether Sankara has denied the reality of the objects of the universe, (2) whether individuality has been resolved in his system of Philosophy into mere relations and actions and whether the Ego cannot be held to be an active power, (5) whether Vedanta advocates mertia, emptying of the human mind rather than its expansion, (4) whether Sankara's Theory can be called Pantheism, (5) what is the relation between Being and Not-Being, and between Infinite and Finite, (6) what is the place of Ethics and Religion, (7) what is the correct view on Vedantic M kti, and such other valuable topics. The work will prove an indispensable companion for the thorough and correct understanding of the great Maya-Vada in its various aspects Copious authoritative quotations from Sankara's commentaries on the 10 Upanishads, Brahma-Sutra and Gita have been given the footnotes enhancing the value of the work, which are an invaluable mine of information on the subject. The author attempts also to clear up various misinterpretations and misrepresentations of the Sankara-Vedanta, giving a correct and right exposition

Extracts from the opinions of a few are given

Professor 1 Bernedale Keith, D Litt, D C L, University of Edin burgh—"Your book is a remarkably able and highly interesting contribution to the interpretation of Sankare. Its collection of passages alone would be of very high value, for the extent of Sankara's writings is so great as to render easy reference impossible without such aid, and I fully appreciate the labour which has been involved in the selection of the texts cited. Even greater value applies to your powerful exposition of the realistic element in Sankara

Your work will therefore, I trust, continue to exercise an important influence on the interpretation and appreciation of the Vedanta"

Professor Julius Jolly, Ph D, University of Wurzburg, Bavaria — "This work contains an excellent exposition, I think, of the main principles of the Adwarta system and an equally excellent vindication of this against the reproaches raised by scholars wrongly interpreting its technical terms"

- Sir George A Grierson, K.CIF, Ph.D., D.Litt, LLD, lite Vice President, Royal Asiatic Society of Great Britain and Ireland Very inferesting and instructive—your book shows evidence of much original research."
- Dr L D Barnett, Oriental Studies, London Institution (University of London) Your book is a work of considerable inerit "
- Professor Hermann Jacobi, Ph D, University of Bonn, Germany –
 I have read this novel exposition of Sankina's system with interest and profit. Whether one entirely agrees with the author's theory or not, one will admire his ingenuity and be grateful for many valuable suggestions. It is an admirable book.
- Prof. S V Lesney, Fh D, University of Prague —" The teaching of your great countryman—Sankara—has been treated by you in a very happy way and to much profit of your readers
- Prof E Washburn Hopkins, Ph D, LL D, Yale University, America—" My final judgment is that you have made a most important contribution to our knowledge of Sankara's Philosophy"
- Dr Sylvain Lett Ph D of College de France Paris 'Your book is of a lasting value. You have martered Sankara's work as a real Pandit and you know to expose his doctrines perfectly as a modern scholar Never did I realise before so fully the perfect unity of Sankara's teachings. Your book is a concordancy, a Cyclopædia of Sankara's Philosophy. The quotations are well selected, thoroughly clear, conclusive, a glance over the notes at the foot of the pages shows they are a substantial reading, affording the HIT of Sankara's thoughts.
- Prof Richard Schmidt, Ph D, of Munster University —" Surely your book is an admirably suitable introduction to that most magnificent achievement of Indian thought Your book is not only a highly interesting contribution to the interpretation of Sankara's writings, but also in every way a new argument of the justness of the ca orienti lux I wish you best success"
- Prof H Luders, of Berlin University—"

 I have read your excellent Introduction with the greatest interest and profit Your profound knowledge of Saukara has enabled you to carve out new ways to the under standing of India's great philosopher. In my opinion your work is a mark in the exposition of Vedanta Philosophy, and anybody who will take up in future those problems will have to deal with your views. You have solved some of the riddles proposed by apparent contradictions in the texts and I am sure we shall have to modify considerably the prevalent opinion on Sankara's Philosophy."
- Dr P h Ray, DSc (London and Edin)—"The Preface is well conceived as well as well written, and the book bears evidence of your labour and thought to give correct interpretations and to remove misinterpretations in all disputed and difficult points. You have done a great service to the cause of the true Religion of the Hindus by publishing this English version."
- Prof S Radhakrishnan, Vice Chancellor, The Andhra University —"
 I lead with the greatest interest your valuable gift of Adwarta Philosophy
 As you may imagine, I appreciate very much your strenuous attempt to
 lepudiate the popular view of the world-negating character of Sankara's
 philosophy. What struck me most in your book, apait from its wealth of
 learning, was your independence of mind which is rather rare among Indian
 thinkers of the present day"

Journal of the Royal Asiatic Society of Great Britain and Ireland, July, 1926—" The author is to be congratulated on having produced a very well written and remarkably clear and able book dealing with a very thorny and

difficult subject—the non dualistic philosophy of the great Vedantist Sankara. Mr. Sastri has collected a large number of passages of great value and importance from the writings of Sankara and has expounded them with marked ability. His treatment of Sankara's philosophical position is done with great skill.

The Philosophy of the Upanishads, by Sureschandia Chakrabarti, M.A., B.L. Royal 810 pp. 288 Rs. 4-0

The author has shewn for the first time that the Atman philosophy does not destroy the world, but yet is rigorously monistic, and this directly follows from the texts of the Upanishads, and that Sankara had no justification whatsoever to over-ride clear and repeated texts and destroy the world, by introducing his doctrine of Maya, any more than Rammuja had for perpetuating the individual

It has also been shewn that the current metaphysics of the world makes it impossible either to uphold the freedom of will or give a rational explanation of evil, both of which, however, are most satisfactorily solved by the Atman philosophy

In India, the effect of the continued control of the intellectual field by the theologians has been such that no one would think of interpreting philosophy except in the manner in which one of the theologians has chosen to do. The author has broken the spell and shewn the way in which the highest philosophy of markind should be approached and interpreted.

SOME OPINIONS

Prof Dr M Winternitz, Prague — The work of Mi Chakravarti will be appreciated as a new and original attempt at the interpretation of the Upanishads independent of, and even in opposition to Sankara and his followers in the East and in the West '

Dr E I Thomas, University Library, Cambridge —"The author has taken a line of investigation which, I think, will be of great value in directing renewed study to the Upanishads from the point of view of their actual value in the light of modern philosophical thought, and in clearing the essential principles from the aberrations of both ancient and modern commentators"

Prof Dr F W Thomas, Orford University —"It is a sound and serious study of the subject by a writer who is at home in the sphere of thought to which it belongs"

Sir Michael Sadler — A perusal of the learned author's work shows how much depends on the interpretation of the word knowledge. In the past harm has been done by a narrow interpretation of the word

The Times Literary Supplement --" The chole idea is that Atman is the sole reality. Mr Chakrichts ingues with force that this does not meen, as Sankara held, and is Densen and others following him have maintained, that this world is the books of a vision." In dealing with the problem of evil, Mr Chole with money that nothing a inherently evil. As regards free will the position is that only when man is conceived as part of God and not a cut, do Him is man truly free. The book is passionately sincre and is likeful, visited."

Studies in Post-Sankara Dialectics, by Asutosh Bhattacharyya, Sastii MA, PhD Royal Sto pp 341 Rs 4-0

In this volume an attempt has been made to give a systematic presentation of post-Sankara dialectics of the Advanta-Vedanta. The main object of the dialectics as developed by the Neo-Vedantic teachers is to early thought to perfection by a critical examination of the concepts and categories of the opposing sister schools as to expose their untenability on the ground of their inherent contradictions and autonomies.

The present volume comprises eight chapters bearing mainly on the epistemology of post-Sankara thought. Of the eight chapters, the first three deal with the nature and validity of knowledge and the next five are concerned mainly with an explanation of appearance and its implication from the standpoint of epistemology.

Ethics of the Hindus, by Susilkumai Maitia, MA, PhD Royal 8vo pp 370 Rs 4-8

In this book the author has tried to give a philosophical exposition of Hindu Ethical ideas. What he has attempted is an analytical exposition of Hindu Ethics as distinguished from the historical. One of the excellent features of the book is the comparisons between Indian and European Philosophers which the author has introduced in explaining concepts and ideas which are peculiar to the Hindus

Prof J H Murhead, MA., Ph D, University of California (late of Birmingham)—"I may sav however how much I value the attempts of your book and others which have recently come under my scrutiny, notably Professor Radhakrishnan's histories, to make the Philosophies of India more accessible to English readers both in Great Britain and in America We

find I think, great difficulty not only in the linguinge but on account of the great multitude of thinlers and views and any efforts to reduce these to complicity and make the study of them more attractive seem to me a real contribution to a better understanding between I ast and West. So far from agreeing with the critics you mention in your Preface that comparisons should be avoided. I think that the comparisons you introduce between Indian and European philosopher are an excellent feature of your book. As more specific studies of ispect of philosophy yours seem to me to come well after more general ones like Professor Radhakrishnan's, and as more specific still of particular othical tandencies or doctrines, will, I am sure, be welcomed.

Lord Haldan --- ' The worl is an interesting outcome of much research into the subject. It has the advantage of being a philosophical exposition of Hindu ethical ideas, instead of a mere history of the succession of these forms. The comparion with Western idea on the ubject I have found as highly? found valuable

Prof E W Hopkins, of Yale University — The subject is treated in a new light with great thoroughness and marked ability and is a The subject is very valuable addition to our I nov ledge of ethical authority and the bases recognised by the different schools of thought "

Prof 1 Berriedale Keith of I dinburgh I inversity - The work I am glad to say, has substantial ments. It contains clear proof of side reading, and of careful examination of the philosophical dectrines of the preat systems of Indian Philosophy. Much of the material, if not precisely new, is presented under fresh appears, and the book will be a valuable aid to these engaged in studying Indian Philosophy, both by reason of the poritive value of the results and on account of the fruitful dissent which some of the opinions expressed vill certainly evole."

Journal of Philosophical Studies, January, 1928—"We can congratulate the author upon the scholerly and comprehensive way in which he presents the existents of Hindu Ethics and shows their very solid foundation

"Mr Maitra takes us over the main points of the psycho-ethical analysis of Solf, as propounded in the familiar systems of Indian philosophy (Sankhya, Yoga, Mimansa, Vedanta, Vaisheshika, Nyaya) This he does, not accord ing to their historical sequence but from a general human point of view re garding them all as manifestations of a uniform mentality. The value of this treatment cannot be overstated, for it leads us back to common principles as well as to self analysis, two factors which are easily neglected by the student of religion and ethics. To derive a phenomenon from its antecedent does neither explain nor justify it completely, or as the author save. Continuity is not identity. says, 'Continuity is not identity'

"The book presents a complete analysis of volition, conscience, purpose, virtue, and of the ethico spiritual ideal (in its typical Hindu aspect of moksha or emancipation) finishing with a thorough review of the moral standards in Hindu ethics. As the author quotes very extensively from authoritative Sanskrit sources, it is impossible to understand the discussion without a knowledge of Sanskrit, be it only in order to check the English translation of philosophical terms, in which the author has been quite successful

"The book will be welcomed by all students of Indian philosophy"

Yedantaparıbhasha, edited by Mahamahopadhyay Anantakrishna Sastri With a Foreword by Prof Sii S Radhakrishnan, M A Second and Enlarged Edition Royal 8vo pp 529 Rs 6-0

The work is a systematic exposition and defence of the Advaita theory of knowledge by Dharmaraja (17th century AD). It has eight chapters in which important problems of Advaita philosophy, such as the nature of the pramānas, grades of reality or to be more accurate unreality, the relation of Brahman, Isvara and Jīva, the nature and status of the world, the relation of māyā indiavidvā, salvation and the way to ittam it, have been discussed with great care and eleverness. The present edition contains the text as well as an excellent commentary (Paribhāsā-Prakāsikā) by Mahamahopadhvay Pandit AK Sastii, who has attempted to interpret the Paribhāsā in a most lucid way with pertinent illustrations and has critically discussed the views of the different schools of Advaitavada. The book will prove of immense value to Tols and Colleges where Vedanta Philosophy is studied

An attempt has been made here to show that while the sages of the Upanishads advocated the doctrine of Atman for the cessation of sufferings which arise from desire, the Buddha took a very bold step and propounded the theory of Anatman, and yet arrived at the same destination, starting from an opposite direction

Prof A B Dhruva, Pio Vice Chancellor, Hindu University, writes—
'It is a scholarly work The book is written in a very lucid and erudite style

Mahamahopadhyay Dr Gangana'h Jha, of Allahabad University, writes —' this small book has given me a clearer idea of Buddhism than any other book. This book is fully 'documented' and yet written in a popular style—a rather rare combination''

Buddhi-o-Bodhi (in Bengali), by Hirendranath Datta, M A B L Demy 8vo pp 76 1941 As 8

In this work the author after showing the mability of the human intellect to reach Reality and solve such fundamental problems as the nature of God, the Over Soul and the Individual Soul, points out that, that does not mean that we are to be positivists or agnostics. Because, above and beyond intellect there is another faculty in us latent in most men namely Bodhi or Intuition. After defining what Bodhi is the author accumulates proofs regarding its existence and then deals with the problem as to how to open up this higher layer of Consciousness and what results ensure on such development. He ends on an optimistic note showing how one endowed with a developed Bodhi is above not only to know God but to merge his soul in the Over Soul thus becoming one with the Divine. Life That is the immersion in God which the mystics have experienced

The Economic Reconstruction of India, by Khagendianath Sen. M A Royal 8vo pp 520 1939 Rs 7-8

As Panda Nehru has said -" The book is worthy of consideration from all those who are interested in planning and the Economic Reconstruction of India

The Theory of Profits, by P C Ghosh MA Demy 8vo pp 464 Rs 7-8

- 1 It analyses the various theories of profit and examines their fundamental assumptions
- 2 It maintains that pure profit is merely an analytical concept of surplus, based upon an arbitrary standard of calculating business costs
- 3 It argues that the risk theory simply states the problem of pure profit and does not present its solution
- 4 It brings out the limitations of the marginal productivity theory of distribution and indicates why it cannot explain the nature nor determine the amount of the businessman's income
- 5 It points out that the peculiarity of profit lies in the induced method of caining the income and not in the nature of the services that help, industrially or financially, to turn out a product
- 6 It contends that the nature of profit cannot be fruitfully described as a surplus, nor can it be regarded as a result of the industrial process. It is the outcome of the mercantile processes involved in the modern organisation of production
- 7 It represents profit as the inducet return that a property brings to its owner for the labour or capital employed by him in acquiring it exclusively

It emphasises the importance of profit in the maintenance of industrial equilibrium and indicates the sources from which disequilibrium may possibly ensue

- "No branch of economic theory is more in need of clarification, both for scientific and practical reasons, than the theory of profit. Mr Ghosh's book is accordingly opportune and valuable. It begins with a thorough, lucid and accurate account of all the main theories of profit so far put forward. Mr Ghosh then works out his own analysis, and reaches conclusions which are interesting and in some degree original. Profit, he argues, is 'secured as the combined effect' of the businessman's 'skill both in production-purchase and sale'. It is to be explained by the virtually 'mercantile nature of his social functions as a whole'. Mr Ghosh also examines profits as a casual factor in the dynamic economic process. The book as a whole is a pointed reminder how far the analysis of profits has been carried by modern economists since the classical 'surplus' theory on which Mary founded his system "—The Times Literary Supplement
- This book is worth reading. It indicates the bewildering variety of meanings given by economists to the concept profit. It shows that the profit-share cannot be considered adequately before one establishes a complete distribution theory. And, closely related to this point, it also indicates that profit as a distinctive income share must be considered as an income share related to all other income shares taken together "—The Journal of Political Economy

- "His [Mi Ghosh's] exposition is lucid and his analysis interesting and penetrating, and in places original "—The Economic Journal
- I M kennes Esq. M.1. CB 'I six enough of your work, and took part in enough discussions with you to be quite clear in my own mind that—you had made a great deal of progress towards the heart of this difficult and fascinating theory'
- Prof J A Schumpeter, JUD, PhD, University of Harvard—"I believe the starting point—the idea of the indirect letuin—to be a hippy one, and the general structure of the argument to be sound. The book is certainly a very good performance and ought to conquer a place for you in the scientific profession."
- M H Dobb M.1 Lecture in Economics, Cambridge University—I certainly think that you have got one or two central ideas of very considerable value in your book, and your general survey of theories of profits is interesting and useful."
- Dr P Sraffa, Lecturer in Economics, Cambridge University—' A respectible piece of work and some original contribution

The second part deals with profit-sharing and co-partnership in the United Kingdom and other countries and is an exhaustive analysis of the principles underlying them. The third part of the book deals with general conditions of Indian labour industrial peace in India and the payment of wages in India with special reference to payment in kind. Tea garden and colliery labour is dealt with in some detail. Finally there are two appendices one dealing with a comparative scudy of recent legislation on conciliation and arbitration and also of trade-boards and works councils and the other giving in extenso the proposals of the Government of India regarding trade disputes and trade unions.

schemes have been established, their scope and measure of success This is the most valuable part of the book, but the most interesting is certainly the appendix on Indian conditions. The author has examined and analysed in detail the economic life of the Bengal Delta in all its aspects and has shown that its economic conditions are gradually tending to approximate more and more to those in the West. He has also suggested practical remedies for the defects in the economic organization of the Delta. It is not only a valuable work to the student of economics, but is also expected to be of great help to the politician and the administrator.

- Inland Transport and Communication in Mediæval India, by Bijoykumar Sarkai, A.B. (Harvaid) Royal 8vo pp 91 Re 1-12

The object of this book is to study the methods of inland transport and communication in mediæval India, roughly from the 11th to the 18th century AD. In the preparation of this work, the chronicles of Mahomedan historians and the accounts of foreign travellers have been the author's principal sources of information.

W H Moreland —"I have read Mr Sarkar's book on Inland Transport with much interest, and I may say that, speaking generally, the method strikes me as sound and the execution satisfactory"

Prof J Jolly, Ph D, University of Wurzburg, Bavaria — "Mr B K Saikar's work on Inland Transport and Communication in Mediæval India is no doubt a valuable production. Mr Sarkar appears to have spared no pains to collect important materials from the most various sources. His book is very pleasant reading and presents a vivid picture of the means of Water and Land Transport during the middle ages. The index is very copious and gives a good idea of the varied contents of the work."

"Adequate and useful study of Transportation It is a useful service to gather the scattered references and organise the material in a systematic statement"—American Economic Review

Charles Gide — "Le petit livra de MS est d'une lecture agréable, comme serait celle d'un voyage a travers les âges et dans un pays qui n'a pas besoin du recul du temps pour être pittoresque. Paper Currency in India, by B B Dasgupta, M A, Ph D (Cal), B Sc (Econ) (Lond) Demy 8vo pp 332
Rs 4-0

An historical and critical study of the paper currency system of India

"An adminable piece of work and will be of real use, as hitherto there has been very little available on the Indian Paper Currency The subject is treated very exhaustively, while the arrangement is good. The treatment is largely historical, though the author is capable of excellent analytical work when necessary "—Economic Journal, London, March, 1928

'Of outstanding ment No one who leads the book can fail to appreciate from a study of Mi Dasgupta's methods what the exercise of patience, ian mindedness and other characteristics of the scholar can achieve It is a most suitable text-book for the higher degrees in Economics in Indian Universities'—Prof Findlay Shirras

It is a pleasure and a privilege to write a Foreword for such a scholarly treatise. Apart from the practical importance of such a subject, the record of six decades of the working of a Paper Currency system was, if ably handled, sure to throw light on problems of theory, and our author has not failed to treat his subject in the light of the evolution of monetary theory and practice. He has also shown originality of thought and treatment and his work is based on careful and painstaking research. There are many topics of the monetary economics of India discussed very well indeed in the book.—From the Foreword by Prof. Sir. J. C. Gogajee.

Land Problems of India, by Radhakamal Mookeijee, MA, Ph D Deniy 8vo pp 369 Rs 5-0

This book directs attention to the difficult problems that have daily to be faced by the Indian peasant and calls for retorms which would include a modified State landloidism—a new Zamindaiism paving the way for a real agricultural partnership between landlord and tenant—and a rehabilitated village community

Di Radhakamal Mookeijee has in this book used historical and comparative methods in dealing with different types of landholding and village structure and with their economic effects in India. Methods of investigation such as those of Vinogradoff have been followed in tracing the development of clan, caste and communal distribution and village settlement in India. Thus the book is an important contribution to Indian village origins and its approaches from the angles of comparative ethnology and economic history materially supplement Baden Powell's treatment of the subject

Even more important is its contribution towards understanding the complexities of the piesent land system and land unsettlement in India. The supersession of customary rights of peasants by landlord tenures and by the State, their economic weakness due to fractionalisation, the unfair distribution of the burden of taxation, the multiplication of rent-receivers, tenants and agricultural labourers, and the ease and frequency of transfers of land from cultivators to middle and money-lending classes—all these betoken an agial an clisis in the country. Professor Mookerjee's scheme of agralian reform includes the modification of the Zamindari system and its approximation to share tenancy as in Italy and Japan, grant of permanence and helitability to all grades of tenants, a drastic reduction of sub-letting and sub-infeudation, restriction of borrowing, mortgage and transfer, compulsory restripment and consolidation of holdings, exemption of undersized holdings from rent and revenue enhancement, a progressive rate of taxation of agricultural income, weighing heavily upon landlords, lessees, and all kinds of intermediaries, redemption and settlement of unsecured debts of agriculturists, abolition of usurious rates of interest and the establishment of debt conciliation and land courts in the villages

Dr Mookerjee is keenly alive to the changes in agrarian policy fore shadowed in the New Constitution when the peasantry will gain political power, and in the economic democracy, the first stirrings of which are visible in widespread peasant unrest and tenant revolt. He records the social and 10-1362B

political reactions of the agrarian problem and concludes with a werning that to delay reform, whether from fear of angering vested interests, or from apathy towards the unvocal classes, is to sow the aceds of revolution

This book gives a lucid exposition of the new constitution which was adopted in 1935 and has been worked since 1937 in the provincial sphere. It examines critically and comparatively the federal system which has been provided for by the Government of India Act, 1935. In order that the new constitutional development in India has been incorporated in the first few chapters.

The book has been highly spoken of by eminent authorities and has been selected as a text-book by Calcutta, Patna and Allahabad Universities

Public Administration in India by Akshay K Ghose, Bar-at-Law Royal 8vo pp xxi+743 1930 Rs 10-0.

The book deals with every aspect of the Government of India in action. In it the author endeavours to examine and analyse in detail every aspect of the last Reforms, from a purely academic point of view, and to assess their proper constitutional

value It is the only work of its kind. A work of years of study and iesearch, the book in itself is more complete and altogether covers a wider area than any book hitherto published, dealing with the same subject, so as to be recognised as the most authoritative and accurate work on the Government of India in motion

Prof A Bernedale Kesth —" a very clear and careful exposition, a sound and thoughtful work which should be easily understood among wide circles of persons interested in understanding the actual constitution of India"

Prof Edward Jenks —" I shall derive great benefit from its learning and accuracy And I desire to congratulate the University and the learned author heartily on the production of this monumental work"

Prof Ernest Barker (Professor of Political Science in the University of Cambridge)—" I should like to say that when we make the development of the Government of India since 1858 a subject of study in one of our Triposes here, I am sure that Mr Ghose's book will be a useful book for reference for our students"

Prof J H Morgan —" I have already formed the conclusion that it is a most valuable contribution to a subject which has never been adequately dealt with Mr Ghose's work is the very book which all of us who are interested in constitutional developments in India have been waiting for "

Times Literary Supplement (London) —" The book furnishes a comprehensive review of Indian Governmental machinery"

The Case for Financial Justice to Bengal, by J N Gupta, MA, ICS (retd) Demy 8vo pp 104 Re 1-0

A monograph dealing with the claims of Bengal for a redress of the injustice of depriving her of the major portion of her revenues and leaving her with totally inadequate and insufficient resources and reducing her to a position of marked inferiority as compared with the other provinces of India Tracing the early revenue history of the Indian provinces the book shews the financial indebtedness of the rest of India to Bengal owing to the adoption of fundamentally wrong and inequitable principles of the division of the Indian revenues between the Provinces and the Central Government The highly deleterious effects of this unjust treatment on the moral, material and political progress of the province have been described and a strong case made out that without a fairer distribution of her revenue there is no hope for Bengal in any scheme of administration however advanced and democratic a proposition which the Bengal Legislative Council has endorsed in a strongly worded Resolution Amrita Bazar Patrika and the Modern Review in reviewing the book state that it contains a very forcible yet moderate exposition of the claims of Bengal to an adequate share in her revenues

History of Political Thought (from Rammohan to Dayananda, 1821-24), Vol I. Bengal, by Bimanbihari Majumdar, MA, PhD Demy 8vo pp 518 Rs 4-8

In this book the author traces the ultimate growth of abstract political ideas in British India through a history of the activities of Indian political organizations and of the changing critical attitudes of Indian public men towards the Indo British administration. The political ideas and theories of the greatest leaders of the Bengal thought in the pre-Congress era have been presented here for the first time in a compact and comprehensive form so as to enable the general readers as well as the statesmen and administrators to come to a better and quicker understanding of the trend of current politics.

Marguess of Zetland —"I should like to congratulite you upon having produced a volume of great interest and value. I think that the chapter which interested me more than any other was the one on Binkim Chandra Chatterjee, for whom I have always had a great admiration. I hope that your volume will receive from the public the recognition which it deserves."

Rt Hon Sir Tej Bahadur Sapru—"I have found it extremely interesting and informing. I feel that your heal will be very useful in giving the present generation of politicians some idea of the men who gave impetus to political thought in India in those far off days."

Dr A. Berriedale Keith —" Contains a vast imount of information which is not familiar to students of political ideas even though well veried in western literature, and it is expressed with admirable lucidity. Moreover the author shows judgment and restraint in marked degree when dealing with matters of controversial type"

Str Jadunath Sarkar, Kt, CIE —"The book breaks new ground in the study of the history of modern India. The author has worled on sound lines by going to the original sources of his subject, especially the old periodical literature which is growing exarcer day by day."

Dr S K De (Dacea University)—"It is full and enlightening, very lucidly expressed, covering all important parts of the subject, and gives an attrictive and interesting summary not only of the views of the principal thinkers of the period but also of their personalities revealed in their thought

From the leading editorial article entitled the "Growth of Indian Nationalism" in the Amrita Bazar Patrika, Sept 27, 1934—" The history of the beginning of our national life has for the first time been published with all the antecedent factors and tendencies contributing toward it by Prof Bimanbilari Majumdar, MA, PRS, of Patria, in his masterly work, 'History of Political Thought' From the standpoint of Indian nationalism Prof Majumdar's book will be considered as having a perennial interest for the reader—a book that amply testifies to the writer's industry and sober scholarship — A few weeks ago Mr Syamaprasad Mookerjee, the new Vice Chancellor of the Calcutta University, gave expression to his desire of bringing the University into closer contact with the public life of the country—Prof Majumdar's work may be taken as the first step in that direction"

The Modern Review, March, 1935—"In spite of the qualities of scholar ship which appear almost on every page the book is not heavy reading. The author deserves our thanks for writing the first comprehensive account of our political consciousness in the interesting period of its germination.

The Calcutta Municipal Gaza'te, June 15, 1935—" As a background of the present political history of India, it is unquestionably valuable, both for foreigners and Indians themselves'

The Statesman, May 12, 1935. The book is valuable not only because it brings together much that is of interest and much that has been collected

The Federal System of the United States of America, by Naieschandra Roy, M.A., Ph D. Demy 8vo pp xii + 308. 1940 Rs 3-0

This is a monograph on the relations between the Central and State Governments in the American Federation. It first describes the relations as they were determined by the constitution when it was first set up one hundred and fifty years ago. In later chapters it is shown how by the forces of circumstances and by the interpretation of the Constitution by the courts these relations have not only been changed but transformed. The Central Government which enjoyed only some limited delegated powers has how become a leviathan

"The author," observed Sir C P Ramaswami Ayer, Dewan of Travancore, 'deserves to be congratulated on his building of style and his accurate erudition"

VII. LAW

The Evolution of Law, by Naieschandra Sengupta, MA, DL Royal 8vo pp 191 Rs 2-8

In this work the author gives a systematic treatment of historical and comparative jurisprudence on the basis of the most up-to-date knowledge of ancient laws and the laws and institutions of retarded races. The work is designed as an introduction to the study of the subject which is treated simply and in broad outline. But it is not a mere collection of the views of other scholars. While the opinions of all standard authorities on the main topics of evolutionary jurisprudence are given, the author has given many new interpretations of facts and has put forward some strikingly new opinions. A remarkable feature of the work is the ample use of materials taken from a historical study of Hindu Law which has hitherto received far less attention than it deserved in connection with questions of evolutionary

jurisprudence This has led the author to formulate new theories of the forms of family organisation, marriage and kinship, law of procedure, of crimes, of the origin of property and of contract and a strikingly original theory of the law of Descent, which, it is hoped, will be found worthy of consideration by scholars Conharv to accepted views, the author traces the origin of laws of inheritance to donations mortis causa or at the time of renunciation and thus establishes the primacy of testamentary over intestate succession. In an appendix the author gives a discussion of the history of the Hindu Joint Family Law which throws much new light on the subject. As the author points out in the pieface, the state of our knowledge of the subject being what it is, it is impossible to systematice the existing knowledge of the subject without a certain measure of theorising on one's own account This the author has done on a large scale and in the treatment of every topic dealt with by him there are new thoughts and interesting new points of view presented which will furnish food for reflection

The Problems of Aerial Law, by Bijankumai Mukherjee, MA, DL Demy 8vo pp 255 Rs 2-8

The work is a thesis approved for the Degree of Doctor of Law It is divided into four chapters

Chapter I Beginning and Development of Aerial Law In this chapter, the author has collected the earliest legal ideas on the subject and has attempted to show how these ideas gradually broadened down with increasing discoveries of human science

Chapter II Sovereignty of the Air Here the author has examined minutely the different theories that have been put forward by different jurists and has suggested all possible arguments that could be advanced either for or against them

Chapter III Principles of International Law relating to the Air Space This chapter has been sub-divided into two parts. In the first part the author has analysed and examined in detail the 45 articles contained in the Air Navigation Convention of 1919 and has suggested alterations wherever the provisions appeared to him to be unsound in principle or unworkable in practice. The other part, which deals with questions of war and neutrality, is much more speculative in nature and the author has built up the law with such materials as were furnished by the analogy of the existing usages of maritime warfare and the practices of the combatants in the last great European War

Chapter IV. Principles of Municipal Law relating to the Air Space In this chapter the author's principal effort has been to establish that a perfectly consistent theory affording a complete solution of the several problems of private law that arise

79

- in connection with the use of air space may be constructed from the principles of English Common Law as they have been applied by English and American Courts
- Effect of War on Contracts (Onauth Nauth Deb Prize, 1917), by Piaphullachandia Ghosh, MA, BL Demy 8vo pp 152 Rs 4-8

Position of Women in Hindu Law, by Dwarkanath Mitra, MA, DL Demy 8vo pp 758 Rs 12-0

The work is a thesis approved for the Degree of Doctor of Law in the University of Calcutta. It is generally based on original research as well as on the results achieved by previous writers on Hindu Law. It traces historically the various stages in the development of the position of women in Hindu Law.

The Theory of Adoption (Jogendrachandra Ghosh Prize, 1909), by Pandit Duivasula Srirama Sastii, BA, ML Demy 8vo pp 59 Rs 3-12

It discusses the origin and merits of the theory of adoption in a Hindu family

- Separation of Executive and Judicial Functions, by R N Gilchist, M A Demy 810 pp 244 Rs 4-0
- Law of Primogeniture (Tagore Law Lectures delivered in the Calcutta University in 1925), by Radhabinod Pal, MA, DL Royal 8vo pp 556 Rs 12-0

In these lectures the author has traced the origin and growth of primogeniture in various countries. The bulk of the volume, however, is devoted to tracing the development of the law in India and for this purpose the author having started from the remotest times has fully examined how these various rules attained their present state. He has also discussed in this volume all possible modern problems and has dealt with the actual application of the law signalizing the divergences of opinion and of practice.

the author reveals wide learning in the ancient literature and in the modern problems facing the courts. The contribution of the work is its emphasis upon the religious element in primogeniture, even in systems where partition of the economic assets of the family is practised. Thus primogeniture in India is concerned largely with religious functions and with the descent of offices. These have been treated by the courts (under English influence) as if they were property, and the artificial English conception of custom has even been transported to that country. Appalling confusion is the result, as Dr. Pal lucidly and ably demonstrates "—Harvard Law Review, Vol. XLIV, No. 2, December 1990, p. 329

the present work marks in a great measure a return to the old standard of scholarship and lucid exposition. The subject is the whole law, of primogeniture and it could not be dealt with fully in the course of any single series of lectures. Di Pal, therefore, follows the wise course of first attempting only a general survey whereby the principal features of the law are determined. He then embarks upon an exhaustive discussion of the law as it obtains in British India and to that end goes first to the original sources. These he examines with learning and legal insight. Next he comes to Anglo-Indian case law and it is in this part of the book that he specially excels. He isolates the different strands of the subject and pursues each one of them chronologically through successive decisions. He discovers many principles which have been laid down in different cases and which are irre-oncilable with one another and the observations he makes on such conflicts are always illuminating. We would particularly refer to his criticism of the incident of jointness of impartible estates as applying or not applying to questions of alienation, maintenance, partition and succession. We welcome it as a scholarly publication on a difficult subject.—Calcutta Weekly Notes, Vol. XXXVI, page clxxx, Part 43, 19th September, 1932.

 - "I am very glad to have the book and I am looking forward to reading it with great pleasure and profit "—Prof C K Allen, sometime Professor of Jurisprudence, Warden, Rhodes House, Oxford
 - "the Lecturer has spared no pains in elucidating the various and somewhat conflicting and puzzling theories of Juristic Personality We recommend the book for a careful perusal by every serious student of Law—Calcutta Law Journal, 16th December, 1933
 - Or Bagchi has studied deeply and comprehensively the subject of juristic personality. Dr Bagchi has argued from old Sanskrit texts that a Hindu deity is not a complete juristic personality. Mr Justice Manmatha nath Mukhei ee seems to think with regard to Dr Bagchi's lectures that 'he has been the first in the field to introduce a line of thought which has clarified the position and enabled one to look at the question from a proper angle of vision' With this estimate of Dr Bagchi's contribution to the question there will be general agreement. We commend these lectures to all serious students of the fundamental concepts of Hindu Law"—The Forward, May 28, 1934

"Prof Garner's Tagore Law lectures are really a history of modern International Law, with the main emphasis placed on the period since the beginning of the present century. The book is in fact a treatise containing an enormous mass of information well documented and lucidly arranged. It is the only book in English which even attempts to cover in comprehensive manner the whole recent history of International Law. This is a great achievement, and one for which, in this age of periodical literature and monographs on particular topics, Prof Garner deserves the thanks of all international lawyers."—Society of Comparative Legislation, London

Manoel da Assumpcam's Bengali Grammar: Facsimile Reprint of the Original Poituguese with Bengali Translation and Selections from his Bengali-Portuguese Vocabulary Edited and Translated with Introduction, by Suniti Kumar Chatterji, M.A. (Cal.), D.Lit. (Lond.), Khana Professor of Indian Linguistics and Phonetics, Calcutta University, and Priyaranjan Sen, M.A., Lecturer, Post-Graduate Department, Calcutta University D/F'cap 8vo pp 50+136 With three Plates Full Cloth, Rs. 4-0

Manoel da Assumpçam, a member of the Brotherhood of Saint Augustin in the congregation of Eastern India, was a Roman Catholic Missionary from Portugal who ministered to the Bengali and other mixed Christian community in the district of Dacca early in the 18th century. He was the author of a Bengali Grammar in the Portuguese Language, which was supplemented by Bengali-Portuguese and Portuguese-Bengali voca bularies, and this work was published from Lisbon in Portugal in 1743. The Bengali words are given in the Roman character, following the Portuguese pronunciation of the letters. This is the oldest printed book dealing with the Bengali language. Padre Assumpçam was also the author of a Bengali translation of a Roman Catholic Catechism which seems to have been published in the same year. N. B. Halhed's Bengali Grammar published from Hughli in 1778 is the first book to employ Bengali types, and the present work is a quarter of a century older than Halhed's book.

Padre Assumpçam's Grammar is valuable from the philological point of view. It gives the Dacca dialect of about 200 years ago, and the system of Roman transcription of Bengali words is important from the point of view of Bengali Phonology. The work is rare, and the present edition has been made from the copy in the library of the British Museum. The text is a facsimile reprint of the original edition, page by page and line by line. A Bengali translation, the work of Mr. Sen, is given opposite, and there is an introduction in Bengali by Prof. S. K. Chatterji. A selection from the Padre's interesting and important vocabulary is also given

As a reprint and a translation of one of the earliest grammars of Modern Indian Language known, the present work is unique in Modern Indian Philology

There are three plates, giving reproduction of the titlepage and four other pages of the original edition

Sir George A Grierson "It is hardly necessary for me to lay stress on the great value of the work, a reproduction and translation of the first account

of the Bengah Language ever written by a European May I, therefore, simply offer my congratulations to the University, and to the learned editors and translators for its successful publication? The original edition, I need not say, was unique, and every student of Indian languages will rejoice that it has now come within his reach in the form of this edition.

- Dr L D Barnett, British Museum "It is a most interesting publication, most efficiently executed"
- "Facing each page of the original, the editors have given the Bengali translation of the Portuguese, and the Bengali form of transcriptions, this part of the work, which interests the European reader the least, presupposes a good deal of labour in a country where the lovers of Portuguese are rare" Jules Bloch, in the Journal Asiatique
- Prof A B Keith "The work is very curious and interesting and it was a happy thought which prompted its reproduction in so effective and satisfactory a form"
- Mr Panduranga Pissurlencar Curator, Historical Records of Portuguese India "In publishing this Grammar, your University has rendered valuable service to the cause of letters The introduction is very instructive"

- Higher Persian Grammar, by Lt-Col D C Phillott, MA, PhD, FASB Royal 8vo pp 949 Neatly printed and nicely bound Slightly worm-eaten Reduced Price Rs 11-0

Perhaps the largest and most compendious grammar of Persian in existence. It is written by one who is a recognised authority on Persian. It is intended mainly as a book of reference and for this purpose is printed with a copious index. It is specially suitable for those students who have learnt, or are now studying, Persian in India. This book also illustrates many of the differences that exist between the Persian of Afghanistan and of Persia, not only in pronunciation and diction but also in construction. The notes on composition and rhetoric will prove specially interesting to Indian students, many of whom have to study Persian through the medium of English and it is for their benefit that these subjects have been treated from an English point of view.

Mr A H Harley, MA., ex Plincipal, Calcutta Madrasah — "Col Phillott's 'Higher Persian Grammar' is a most welcome addition to the list of works dealing with the accidence, syntax and rhetoric of the language Their number is not large, and their contents not as copious as could be desired. The Higher Grammar is designed to meet the needs of students of the classical language, and of the modern colloquial, and it is comprehensive enough to satisfy both classes. It is difficult to select any one chapter as deserving of particular mention, in all there is that thoroughness of treatment, and attention to arrangement and detail which might be expected of one who has been both a teacher and an examiner. Rules and exceptions are freely illustrated. Customs are adequately explained. The extensive use of technical terms is a feature which will commend itself to advanced readers. The whole bears evidence of the general as well as of the specialised scholarship of the compiler, and is enlivened by allusions which only one having first-hand knowledge of the land and its people could employ

"Calcutta University is to be congratulated on having placed a standard work at the disposal of the increasing community of admirers of one of the most charming and courtly of languages"

Arranged on a most convenient plan the text in Roman letters, with a literal English translation on the page opposite, each text and translation being followed by elaborate linguistic and other notes—the book is intended primarily for students of Sanskrit. No finished Sanskritist can do without some acquaint-ance with Avestan, and Dr. Taraporewala's book, arready adopted for class work in several European Universities, is by far'the best chrestomathy of Avesta

Prof V Lesny, University of Prague, Czecho Slovakia —"Your book is very useful and very valuable. I shall not fail to recommend it to my students in Europe, as the selection is good, the translation correct, literal (what I very much appreciate) and faithful."

Sir George A Grierson, Director of Linguistic Survey of India —"I have been reading it with great interest, and must congratulate you on the production of so scholarly a work. I am looking forward to the publication of the second part. The notes are to me most valuable, and form an admirable introduction to the comparative study of Iranian and Indian languages."

Prof J Jolly, University of Wurzburg, Bavaria —" It must be translated into German, it is far superior to the other Avesta Readers and has made the study of Avesta comparatively easy"

Dr F W Thomas, India Office Libiary, London —"It seems to me to be just what was wanted for the serious University study of Iranian, and I hope that it will be used both in England and in America, as well as in India Your notes are very full and accurate and supply all that is required, while your general views are marked by moderation and reasonableness"

Philosophy of Sanskrit Grammar, by Prabhatchandra Chakravarti, M.A., Ph. D. Demy 8vo pp. 358 Rs. 5-0

In this unique work the author has made a comprehensive study of the philosophical aspect of Sanskrit Giammar mainly making use of the materials from the Mahābhāsya and Vākyapadiya The book deals, among other interesting things, with the origin of grammatical conceptions, the fundamental principles of grammar, the theory of Sphota and the relation of grammar with other systems of thought The author has succeeded in showing that grammar was studied in ancient India not as a collection of indefinite Sutras but the Hindu grammarians occupied themselves with speculations on the philosophical side of language and grammar Here one will find the reasonable account why the science of grammar was elevated to the dignity of Agama and Smriti and considered as a system of thought by itself broadbased on strictly philosophical principles

Prof A Berriedale Keith, University of Edinburgh—"Dr Prabhat Chandra Chakrabarti is well known for his valuable work on the exposition of Sanskrit Grammar and his new work on the Philosophy of Sanskrit Grammar adds substantially to our obligations to his industry and critical acumen"

Prof Sylvain Lévi, Paus —" Undoubtedly one of the best pieces produced by the University, it is a marvel of science, full of information, new and important Though bearing on minute technicalities, it reads quite fluently The author deserves the highest compliments"

Prof M Winternitz, University of Prague —"It is certainly a very valuable contribution both to the history and the philosophy of Sanskrit Grammar, and will be appreciated by all those who have read the same author's Linguistic Speculations of the Hindus"

Prof J Charpentier, Upsala —"I feel struck with the profound learning and sound methods of the author and feel quite convinced that his work will be of the greatest value to all scholars interested in Sanskrit Grammar"

Prof Sten Konow, Oslo, Norway —"It is a very interesting and carefully written book, and to us in the West its value is enhanced through the fact that the author throughout represents the Indian view and does not attempt to present matters in European garb, as is so often the case in the discussion of Indian historical and literary problems"

Prof Hermann Jacobs, University of Bonn —"I may say that it impresses me as very useful to students who desire complete and authentical information on the theories of the grammarians concerning their Sāstras"

Dr E. Thomas, University Library, Cambridge — 'I think there is no doubt that the author's claim to fill a long felt want is fully justified, and that it is carried out in a masterly manner. His work ought to stimulate his countrymen to increased study of one of the most characteristic achievements of Indian thought while it will also be of great value to western students who are seeking to grasp the Indian conception of the Philosophy of Sanskrit Grammar."

Prof. A H Sayce —"It has at last put into our hands a complete and authoritative account of Indian linguistic philosophy and I need not say how welcome it will be to all students of linguistic science. India has been the home of the philosophy of grammar."

Prof Siddheswar Varma, MA, DLit, Prince of Wales College, Kashmere—"In a sense it is a unique work on a unique subject. When consulting along with the author's previous work, 'The Linguistic Specula tions of the Hindus,' it is the conspectus of its kind, in a modern language, of that branch of knowledge in which India is pre-eminently unique. It is a work in which the author evinces profound learning and scholarship Grammar is by far the most learned subject in Sanskrit, and to write a conspectus of the subtle side of the subject indicates no mean scholarly qualifications."

Dr Otto Straus, Breslau (Orientalistische Literatur zeitung, 1931, Nr 8)
—"The Author, Lecturei in Sanskrit of the Calcutta University, already known through his work 'Linguistic Speculations of Hindus' (cf ZDMG 81, 99A1), was given the inspiration to tackle this important theme by Sir Asutosh Mookerjee, the great genius of all Scientific Researches in Bengal during the last decade. His claim, that by means of a systematic research of purely Philosophical Aspect of the Sanskrit Grammar he has filled a long felt want, will be gladly acknowledged by every one who has read those two substantial as well as difficult works, namely, the Mahābhāsya of Patañ'ali and the Vākyapadīya of Bhartrhari. The context contains such solid stuff, so many well chosen verses out of the authoritative works, that no Indologist who has not worked in this field can pass over this work

"This short description of the context will show to every Indologist that we have before us a book which is rich in substance. Everywhere are given quotations with exact description of the origin of the quotations so that the reader can clearly understand the ground on which the author stands And, therefore, the work will be very useful also to them who might not agree with the arrangement and interpretation of the substance, because every quotation leads one in the middle of the manifold life of this difficult but still so attractive Indian scholastic."

In this interesting work the author who is well-known for his grammatical researches deals with so vast and abstruse a subject as the linguistic speculations of the Hindus he has taken upon himself is to set forth clearly and scientifically the important speculations of the Hindus regarding the various problems of the linguistic science, and occasionally to bring them in line with the theories and observations of the modern philolo-What will first strike one's notice is the antiquity of Indian speculations on language. Just as Indians pride in possessing one of the oldest languages as their glorious heritage, so they may be bold enough to assert that speculation on language had their origin in India in a very temote period of human history It has been stated "Long before Aristotle's division of words into 'Parts of Speech,' the Indian etymologists conceived of the fourfold classification of words (Catvari padajātāni) and made it sufficiently clear that all words were capable of being derived from verbal roots " The linguistic speculations of the Hindus comprise a vast field of study will find here how seriously Indian teachers occupied themselves with the problems of language and how valuable have been the contributions of India to the development of Philosophy The phenomena of speech were wonderful enough to rouse then keen interest and intensive study. The study of Sanskrit has not only opened up a new vista for the student of Comparative Philology, but it has also shown how the ancient thinkers of India elaborately dealt with the inner or psychological aspects of language On the evidence of the facts gathered by a careful study of Sanskiit, we can avow that there is hardly any Indian theory on language that cannot claim a high degree of scientific perfection. An attempt has been made to show how "India may justly claim to be the original home of scientific philology "

Mahamahopadhyay Dr Ganganath Jha, MA, DLitt, Vice Chancellor, Allahabad University —"I have formed the impression that it was an important piece of research on a subject to which practically no attention had been given till now, it also evinced the promise of a very important and fascinating field of study and research

Prof A Bernedale Keith, Edinburgh University "I have read your papers with care and I consider that they set forth in a clear and effective manner the fundamental doctrines of Indian speculations on questions of speech The adduction of the evidence of the Mahabhasya and of the

Vākyapadīya is specially interesting and valuable, and all who are interested in linguistic matters must be glad to have so convenient a summary, dis engaged from the unnecessary detail, of the views of Sanskrit grammarians

I am glad to say that I find it well worthy to rank be side the Author's Philosophy of Sanskrit Grammar It shows the same wide reading and ability to select the essential points from abstruse discussions and to present them in such a manner as to make them easily under stood even by those who are not primarily interested in Sanskrit It does every credit to the author's industry and acumen alike, and it well deserves the publicity given to it by the University of Calcutta"

Prof M Winternitz, of the German University of Prague — "It is not too much to say, that grammar is the only Science in which the Ancient Indians by far surpassed all other nations of antiquity. No wonder that both Grammarians and Philosophers were not content with studying the grammar of Sanskrit, but also occupied themselves with speculations on the science of language. Your papers are a valuable contribution to our knowledge of these speculations. It is interesting to see how these problems have been approached from different points of view by grammarians, philosophers and students of poetics.

This enlargement of the author's lectures on the subject, published in 1925, contains a great deal of new matter and may well be recommended as a useful companion volume to the same author's 'Philo sophy of Sanskrit Grammar,' to students of Sanskrit who wish to gain an insight into the achievements of Indian Grammarians and Philosophers in the field of linguistics'

Prof L D Barnett, of the British Museum —"I think your work a very instructive and useful statement of the leading facts"

Dr V Lesny, of the University of Prague —"Your essay is an able enrichment of our grammatical studies"

Balletin of the School of Oriental Studies (London Institution), Vol IV. Part II, Nov 1926, pp 377-79—"This work is an interesting contribution to the history of Linguistics and is an attempt to bring into a consistent whole the linguistic theories of ancient Hindu Philosophers and Gramma rians. The author gives a fairly complete exposition of Hindu theories on the origin of language and his treatment of the well known controversy on the eternity of sound shows considerable freshness and sound judgment Attention may also be drawn to the very interesting record of speculations on the nature of the sentence and on the relation between the stem and the suffix."

Rs 7-0

The book gives a sketch, in bload outline, of the origin of the Bengali Language and the various influences linguistic, ethnic, social—that shaped and moulded its earlier history

In reviewing this book in the JRAS (1923, p 443) Dr L D Barnett writes—" Mr Mazumdar's work on account of its learning, vigor ous style, and bold deviation from currently accepted doctrines deserves a fuller notice than can be accorded to it here. Opening with a stout denial of Sir G Grierson's theory of the origin of Aryan vernaculars he maintains their derivation from the Vedic Language, and explains their variation as due to the influence of Non Aryan speech, mainly Dravidian in particular. Ben gali, Oriya and Assamese are in his opinion all primarily evolved from one and the same Eastern Magadhi Prakrit and the first two have been in fluenced in a secondary degree by Dravidian speech. To us the most attractive Chapters are II—IV on the names Vanga and Bangla, the geography of ancient Bangla, with the connected regions Gauda, Radha, and Vanga VI on Bengali phonology and VIII-IX, a fine study of accent in Sanskrit and Bengali and of the Bengali metrical system, which is of especial value as the author himself has won high distinction as a poet in his native language. On the whole it may be said that the book is most stimulating and suggestive, and that it presents a remarkable mass of interesting facts relating to modern. Bengali."

A complehensive view of the development of the Bengali Language and Literature from the earliest times down to 1850. This book has very little affinity with the author's epoch-making Bengali work on the same subject, the arrangement adopted in the present work being altogether new and the latest facts, not anticipated in the Bengali treatise, having been incorporated in it. It has been accepted by Orientalists everywhere as the most complete and authoritative work on the subject. The book is illustrated with many pictures including some coloured ones.

D C Phillott "I can well understand the enthusiasm with which the work was received by scholars, for even to men unacquainted with your language, it cannot fail to be a source of great interest and profit"

Jules Bloch (Paris) "Your book I find an admirable one and which is the only one of its kind in the whole of India"

The Times Literary Supplement, London, June 20, 1912 "In his nariation, as becomes one who is the soul of scholarly candour, he tells those who can read him with sympathy and imagination more about the Hindu mind and its attitude towards life than we can gather from 50 volumes of impressions of travel by Europeans Loti's picturesque account of the rites practised in Travancore temples, and even M Chevrillon's synthesis of much browsing in Hindu Scriptures, seem faint records by the side of this un assuming tale of Hindu literature. Mr Sen may well be proud of the last ing monument he has erected to the literature of his native Bengal"

The Spectator, June 12, 1912 "A book of extraordinary interest to those who would make an impartial study of the Bengali mentality and character—a work which reflects the utmost credit on the candour, industry and learning of its author. In its kind his book is a masterpiece modest, learned, thorough and sympathetic. Perhaps no other man living has the learning and happy industry for the task he has successfully accomplished."

From a long review by H Kern in the Bijdragen of the Royal Institute for Taal (translated by Dr Kern himself) "Fruit of investigation carried through many years highly interesting book the reviewer has all to admire in the pages of the work, nothing to criticise, for his whole knowledge is derived from it"

The Empire, August 31, 1918 "As a book of reference Mr Sen's work will be found invaluable and he is to be congratulated on the result of his labours. It may well be said that he has proved what an English en thusiast once said that Bengali unites the mellifluousness of Italian with the power possessed by German for rendering complex ideas."

He is emmently fitted for this task because of his erudition and his gift of clear and systema tic exposition "-Rabindranath Tagore, in the Calcutta Review, Jan, 1933
- "The book is a very valuable contribution to our knowledge of the history of Bengali Literature and a mine of precious information. When going through it I have found so many interesting quotations and discussions that I am very glad I am in possession of the work. It will be of great use to me when I shall publish a new edition of my History of Indian Literature (in German) "—Dr H V Glasenapp, Professor of Indology, Koenigsberg University, Germany
 - "The work is, in my opinion, remarkably interesting and instructive" -L D Barnett, School of Oriental Studies, London
- "Even to those who have no expert knowledge of the subject the work is of the greatest interest and reflects much credit on the research and critical acumen of the author His moderation of expression and sanity of judgment deserve special recognition and the book is well worthy of the honour of being included in the ever lengthening list of important studies issued by the University of Calcutta "-Prof A Berniedale Keith, University sity of Edinburgh
- "Mr Sen's book is not exactly in my line, but I have been very pleased by going through it The author has dealt with the problem in a critical manner and has followed a right historical method throughout The book is a very interesting and instructive one and there is not the least doubt that it will rank very high among the few existing works on the critical study of Bengali literature "-Prof R C Mazumdar, M A, Ph D, Dacca University
- "Mr Sen has sought to carry out this study in respect of one particular Ind an province and its literature As he himself points out, this study is not only of general interest for the students of modern Bengali life, but also has a special interest for those who study the cultural exchange be tween one nation and another. There is no doubt that Mr. Sen is eminently With a first hand knowledge of English as well as Benfitted for the task gali language and literature, he is able to compare Bengali literature as it is now with what it was before the advent of the English and to estimate how far any changes noticeable can be attributed to this influence has succeeded in producing an eminently readable book, comprehensive rather than elaborate With the general nature of his findings it is impossible to disagree, and the more so as he refrains, and perhaps from the nature of the case must refrain, from any definite judgments about the respective influences of various factors

 Mr Sen has spared no pains and succeeded in producing a book which is both interesting and instructive "— The Hindu, Jan 9, 1933
- "The best thing about Mr Priyaranjan Sen's study is that with robust common sense he recognizes that Western influence has done immense good and exceedingly little harm, and that Bengal can without fear continue to accept with both hands whatever other lands have to offer A literature and a mind as vigorous as those of this people can make whatever it takes into its own. It would be easy, as always, to suggest a little more fullness here. The poets and novelists of our own time are not altogether neglected. Mr. Sen's work is pioneer work and has been well done."—The Times Laterary Supplement, March 29, 1934

A History of Brajabuli Literature, by Sukumar Sen. M A Royal 8vo pp 614 With 7 plates Rs 6-8

13 1362B

Vaishnava lyric poetry, the most important and distinctive branch of pre-modern Bengali literature, has been the object of study and enquiry by educated Bengalis since the early sixties of the last century. This lyric poetry is composed partly in pure Bengali and partly in an artificial literary dialect, a mixture of Bengali and Maithili called Brajabuli The present work is in many respects the first systematic attempt to trace the development of this literature historically, and incidentally the author has discussed Vaishnava lyrics in pure Bengali also it the author has presented near about four hundred poets, some of whom are brought to the notice of scholars here for the first The author has also identified, or tried to do so, most of Bengali and Brajabuli poems to the number of three hundred have been quoted (in the Roman type in the body of the book) and translated, and at the end of the work these three hundred poems (some of which are published from MSS for the first time) have been printed in the Bengali character, and these form a representative anthology of Bengali Vaishnava lymcs

From a review by Prof Jules Bloch in Journal Asiatique, January March, 1936, pp 167 69 (Translated from French) --

"Brajabuli which has served as the medium of expression to Vaishnava poets of Bengal is not Bengali, but it is not the language of the Braj country, known under the name of Brajbhāsā Mr Sen explains clearly how after the Turkish conquest the Bengalis were compelled to search at Mithila for a ceture of Sanskrit culture and brought back from there sometime about 1500 and a type of poetry and poetical language. This language, mixed with western elements and more specially adapted for the Krsna legend, had thus a two fold reason to be called "the speech of Braj." From Bengal the practice spread almost immediately to Orissa and a few decades later to Assam

"The Vaisnava lyrics occupy a great place in Bengali literature More than five hundred poems have been published and there are still many more. Mr. Sen makes use of an anthology in manuscript dating in the 17th century (of which he reproduces a page on p. 423). The theme of these lyrics, namely the love of Krsna and Rādhā, has received a mystic and philosophical interpretation which has been many times treated in the works of Dr. D. C. Sen, and lately by Mr. S. K. De in his excellent edition of the Padyāvali of Rūpa Goswāmin (Dacca University, 1934), which Mr. S. Sen had known in course of print (vide p. 486, n. 7), or again in French in the thesis of Mr. S. K. Chakravarti, Caitanya et sa théorie de l'amour divin (1933). Mr. Sen in his turn has given a resumé (Ch. II-III) of this philosophical interpretation and the psychological and rhetorical value of themes dealt with. He gives a resumé in Chapters XXIII and XXIV also of the history of the legend of Krsna and Rādhā. In regard to this last problem let us note that in admitting the influence of Southern India in the propagation of the legend he justly remarks that the Tamil god Māyōn is the translation and not the original of Krsna 'the Black' (p. 482)

"In between these chapters, which are really introductory, is inserted the chronological presentation of more than three hundred poets amongst whom many were till now unknown or unrecognised of p 30, Murāri, to whom were attributed only Sanskrit poems. For each of these poets Mr Sen gives the transcription and the translation of some of their poems (for which he should be thanked), or at least of fragments. It has been so well done that the book has really become an anthology of the Vaisnava lyrics of

Bengal (this anthology is given at the end of the book in Bengali characters) We speak of an anthology of the Vaisnava lyrics in Brajabuli, be cause fortunately through a lapse of his original plan Mr. Sen has not remained contented with the presentation of Brajabuli poems only from 1500 AD to our times (because its use has continued in literary tradition by Madhusudan Datta, the Christian poet, who used it in 1861 AD, and even by Rabindranath Tagore, in his earlier days under a borrowed misleading name). He has appended to it the Vaisnava poetry in Brajabhāsā, in Sanskrit and in Bengali—because Bengali also, and it is too natural, has utilized simultaneously since Candīdās (the earlier) till the end of the 18th century (p. 388 443)

'In these masses of documents of analyses and of arguments would then remain any details to be discussed? The local experts will tell us about it when their turn comes. In any case here there is enough without doubt for characterizing the extent and the contents of this excellent work as well as the diversity of benefits that can be derived from the work "

Bengali Ramayanas, by Rai Bahadur Dineschandra Sen, BA, DLitt Demy 8vo pp 335 Slightly wormeaten Rs 7-8 A few copies left

In this book the author advances certain theories regarding the basic materials upon which the Epic of Valmiki was built and the ideals presented therein as also the sources of the Bengali Ramayanas and the principles contained in them

The Times Literary Supplement, April 7, 1921—"The Indian Epics deserve closer study than they have hitherto received at the hands of the average Englishmen of culture. Apart from the interest of the main themes, the wealth of imagery and the beauty of many of the episodes, they are store houses of information upon the ancient life of India and a key to the origin of customs which still live. Moreover, they show many curious affinities to Greek literature which suggest the existence of legends common to both countries.

"The main theme of these lectures is the transformation of the old riajestic Sanskrit Epic as it came from the hands of Valmiki to the more familiar and homely style of the modern Bengali versions. The Ramayana, we are told, is a protest against Buddhist monasticism, the glorification of the domestic home. The Bengali versions, by reducing the grandeur of the heroic characters to the level of ordinary mortals, bring the Epic within the reach of the humblest peasant, they have their own virtues, just as the simple narrative of the Gospels has its own charm, though it be different in kind from that of Isaiah's majestic cadences."

From a review in the Journal of the Royal Asiatic Society by Sir George Grierson "This is the most valuable contribution to the literature on the Ramayana which has appeared since Professor Jacobi's work on the Ramayana was published in 1893. The latter was confined to Valmiki's famous Epic, and the present volume, from the pen of the veteran author of the History of Bengali Language and Literature, carries the inquiry on to a further stage and thiows light both on the origins of the story and on its later developments"

Brihat Banga (in Bengali), by Rai Bahadui Dineschandia Sen, D Litt (Hon) Royal 8vo pp 1291 in two volumes With about 300 halftone and tricoloured illustrations Rs 12-0

The author gives a comprehensive survey of the contents of the book in a long preface which also deals with many new points. Tracing the history of Greater Bengal from pre-historic epochs the work closes with an account of the Battle of Plassey and its sequel. Among the illustrations many are novel and original. The book lays particular stress on social evolutions, and literary, religious and artistic movements in the different periods of Bengal's national life.

A full and comprehensive account of the origin and development of the Bengali novel. The author has begun his survey with the antecedents and precursors of the novel in ancient Sanskrit, Pali and medieval Bengali literature. He has traced the exact influence of the English novel in crystallising the final form of the novel in Bengali and followed its development through its principal exponents, Bankimchandra. Rabindranath and Saratchandra, right up to the modern times, where Western influences have made themselves felt anew in stimulating richness of contents and daring experiments with form. The book thus presents a detailed and complete narrative as well as a critical appraisement of one of the richest and most important branches of Bengali liferature.

The special feature of this work is that in the introductory essays (8 in number) the historical and social background of the literature of Orissa has been clearly laid out, the hitherto unsettled chronology of the early poets has been definitely settled, the characteristic peculiarities of Origa literature have been noted, the origin of Origa Language has been for the first time carefully traced, and the merits of leading writers of various times have been critically considered

Asamiya Sahityar Chaneki (Typical Selections from the Assamese Literature), compiled by Pandit Hemchandra Goswami, MRAS, FRAS, of Assam Civil Service, and Editor of Hema-Kosha

The book consists of three volumes. In it the Assamese literature has been treated in six different periods on Historical and Philological considerations. The first period of Gitr-yuga (600 AD 800 AD) deals with the Cradle songs, the Pastoral songs, the Bihu songs and the ballads of Assam. The second period (800 AD 1200 AD) deals with the mantias and the

aphonisms of Assam. In the third or Pre-Vaishnava period (1200 A D 1450 A D) the translation of the Puranas and the Ramayana in Assamese was taken in hand for the first time by writers like Hema Saraswati, Madhabad Kandali and Pitambara Dwija to prepare the way for Vaishnavism. In the fourth period or the Vaishnavite period (1450 A D 1800 A D) in which all the great writers of ancient Assamese literature flourished, the literature was chiefly employed for the propagation of Vaishnavism. The fifth period or the period of expansion begins about 1600 A D with the consolidation of the Ahom power in the country and extends up to 1800 A D about which time the country came under the Bi tish rule. This period was marked by great literary activity. The sixth period commences in 1800 A D, and continues up to the present time.

Studies in Spenser, by Mohimmohan Bhattacheije, MA, BL Demy 810 pp 98 Re 1-8

This is part of a thesis approved for the Premchand Roychand Research Studentship of the University of Calcutta. The five "studies" are by-products of the author's work (since published by Longmans, Green and Co, with the title "Platonic Ideas in Spenser") in estimating the part played by Spenser's study of Plato and his commentators in the whole body of his work. They show the varied ways in which Platonic ideas other than those of love and beauty attracted the poet, and also the by-paths through which pure Platonism reached Spenser, and in its passage was coloured and modified.

The first chapter deals with Justice, and the author shows how, beyond the usually accepted idea that Spenser's conception of this virtue is almost purely Aristotelian, there is much that can be referred to Plato. The second chapter indicates how the purely Platonic doctrines of love and beauty came to Spenser at what may almost be called third hand, the stages being Platinus, Benivieni, Pico, with Ficino entering as it were by a side-wind. The third chapter brings out the flakes of Plato the critic that are embedded in Spenser's theory of Poetry. In the fourth chapter the author breaks almost fresh ground, and shows the connection between the "Fowre Hymnes" and Grordano

Bruno's particular brand of Neo-Platonism The last chapter examines in detail the great debt in both idea and phrase which Spenser owes to Castiglione whose general influence in English Literature had already been recognised

- Extract from a letter to the Vice Chancellor, University of Calcutta, from C H Herford, sometime Professor of English Literature, University of Manchester (July 20, 1929) —
- "I have looked through the book and am much impressed by the writer's mastery both of Spenser and of Platonic conceptions, illustrating once more the aptitude often observed in the Indian mind for entering into Western and especially Platonic ideas, as a rule less easily mastered by English minds I trust that this remarkable contribution to the higher study of a great English poet may do something to enlarge the body of common culture and common intellectual ideals in which our two peoples may eventually find a true comiadeship within our common humanity."
- Extract from a letter to the Assistant Registrar, University of Calcutta, from Oliver Elton, Hon Fellow of Corpus Christi College, Oxford Emeritus Professor of English Literature, University of Liverpool —
- "I have your letter of 25th June and also Mr Bhattacherje's book which you have kindly sent me, and I think it both valuable and well-written Many a thesis made in Europe with 'he advantage of access to great libraries, is far less to the purpose. I hope the writer will go on with his Renaissance studies. If he could go to the Rylands Library in Manchester, he would find many treasures. Long ago now, I read there the works of Pico, Benivieni, etc., to which he refers with close acquirintance. Mr Bhattacherje's remarks on an old article of mine on Bruno written at that date naturally interest me. He also refers to Miss Winstanley's close study, published since then, of the same field. I think he is quite right in pointing out the further parallels, on which I did not touch, between Bruno and Spenser. The chapter on Courtesy is also well conceived, and no doubt could be a good deal developed. This note is not for publication, but by all means show it to any one who cares to see it."
- "Devout Spensenans will welcome this evidence that their poet is sympathetically and profitably studied in the East as in the West. Mr. Mohinimohan Bhattacherje in his "Studies in Spenser" limits himself strictly to the tracing of some sources of Spenser's philosophy especially of those related to Platonism, and performs his task usefully and with lucidity. The chapter on 'Spenser and Bruno,' wherein Mr. Bhattacherje joins issue with Dr. Oliver Elton, exemplifies once more the complexity of the subject and the difficulty of ascertaining the provenance of ideas and phiases. In the end much must remain a matter of opinion, we are glad to have Mr. Bhattacherje's, based on knowledge and thought"—Modern Language Review, April 1930
 - J W Holme, sometime Professor of English, Presidency College, Calcutta —
- "The whole book is an example of honest scholarship—well documented, well planned well written, and does vast credit to the writer and to the school of English letters in the University of Calcutta"

Courtesy in Shakespeare, by Mohimmohan Bhattacheije, MA, PhD Demy 8vo pp 246 Rs 3-0

This volume embodies part of the work done by Dr Bhattacherge as a Ghose Travelling Fellow of the University of Calcutta for the year 1936 The literary investigation, it involves, was carried on in the British Museum and the University College London, and also in part in the Libraries of the Universities of Paris and Rome. The author received advice and suggestions which he acknowledges freely—from enument scholars like Prof. C. I. Sisson Dr. Boas, Prof. Cazamian and Mr. B. E. C. Davis

The first chapter gives an exposition of the virtue of Courtesy and scudies its manifestation in the Chivalite Age. The second chapter furnishes a contrast dealing as it does with the Ren ussance conception of Courtesy. Chapter III traces in great detail the influence of the includes alided or renture, and of Table Courtesy in some of Shalespeare's plays. The fourth chapter is divided into cleven sections and each of these deals with the traces of Renaissance Courtesy in play of Shalespeare. Di Bhattacharyva tries to establish his thesis by comparing the plays and their prominent character with their sources. The list chapter indicates Shakespeare's obligation in The Source's to the conceptions of love and beauty elaborated in Italian Courtesy hools, especially in the Certifiano.

Ixtract from a letter from Mr. Davis. As it let college. University of London (December, 13, 1937).

It seem to me this ven have a comblet a good deal of interesting material with satisfactory results. Somethins might perhaps be cut down regarding the general solid conditions in Chapters I and II but on the main problem of Shakespeare and coursesy book. Not have certainly been able to throw a good deal of fresh light.

Ixtract from the Toren ord to courtesy in Shalespeare by C. J. Sisson, the Ford Northelife Professor of Modern English Literature in the Environments of London, and the Dean of the Faculty of Irts -

The dimentry of his problem is indeed the attraction of his bool (Courtesy in Shalespeare). To its inherent dimentry is added that of focussing its implications upon the worl of Shakespeare. He had the advantages of a thorough and toring familiarity with Shalespeare a Liouledge of Italian, and the determination shat followed industriously wherever the intellectual nexus led him, often into distant and tangled countries of thought and knowledge. Not the least of the qualities of his work is the realisation that the Plizabethan Ige, and with it Shalespeare's outlool, was rooted in the Middle Iges, however blown upon by Renaissance winds and inoculated by new pollen thus wind swept. Thus through the study of inediaeval and Renaissance concepts of Countery, he has been able to examine afresh Shakes peare's play and poems, and to direct a shaft of light upon their infinite earlety in a commentary to which the second half of the book is devoted. There will be few readers of his book who do not find this commentary, from this especial point of view, helpful and illuminating."

Extract from the Introduction ' to " Courtesy in Shakespeare ' -

'We are pustified in regarding this work as a useful addition to our knowledge, and one more proof of the brilliant profesency of the school of Indian critics in the domain of English Laterature. There was perhaps a reason in the nature of things why this aspect of the historical investigation of Shakespeare should have appealed to an Indian scholar who had a ready made his mark, and whose early promise had been more than fulfilled to seize the magnetism of 'Courtesy' at work in Shakespeare's mind, just as to follow the spreading of Platonic ideas through the poetry of Spenser, did require a subtle perception and a power of apprehending clusive spritting values, on that plane of philosophical as well as literary criticism, Mr. Bhattacherje has shear himself particularly qualified and gifted'

Extract from a letter from Oliver Elton (January 21, 1938) -

"I have read your interesting paper, and now return it registered. I have made so special study of the subject, and you will not expect me to have checked any of your facts and references, but I give you my impressions for what they may be worth to you

The account of Shakespeare and Table Courtesy is attractive and seems most thorough, and to me at least is new. To could well make a short article by itself. As to chapter IV. I hope this will be matured by you, is it well ideserves to be, into a 'shipshape' article. You bring out the periading, presence of the courtier ideal, if I may say so very well, and make the most of Hamlet who is obviously your best eard."

Studies in Shelley, by Amiyakumai Sen, MA Royal 810 pp 343+vvi Rs 4-0

"MI Sen is concerned with Sheller's position as a leader of idealist c thought, more particularly with tracing his development through progressive stages and with setting out by detailed quotation or summary his reaction to successive influences. The magnanimity of Sheller's preaching and the beauty of his poetry are not Mi. Sen's theme but his enthusiastic wonder at them is implicit, a line to byways of discourse which he has withstood—as may be guessed—not lightly

'From the mysticism of orthodoxy, through and beyond materialistic speculations to mystical preaching and prophesying of social and moral ideals for the life of men—this is the scheme under which Shelley's work is presented

"The essay on Godwin and Sheller, third of the five included in this volume is also the longest and perhaps the weightiest. It treats in detail Godwin's and Shelley's utilitarianism, their denunciations of property and marriage, their partly coincident, partly divergent criticisms and other social institutions, such as government, pun shment and war. Their principles of peaceful reform and of abstention from violence in opposing evil are emphatically stated. Shelley's Philosophical View of Reform is compared with Godwin's Political Justice. The gradual separation of Shelley from Godwin, after his first rush into discipleship, is traced to its causes. Shelley's mind moved towards individualism and idealism, and personal conflict helped the estrangement.

'The Essay on Shelley and Indian thought is in some ways the most interesting and it might be wished that Mi Sen had made it fuller. It was from Southey's Curse of Kehama that Shelley drew his first and often inaccurate not one of Indian life and thought. Its influence pervades much of Queen Mab and even so late as the Triumph of Life, Shelley draws inspiration from Southey's description of the progress of Jaga Naut, 'a religious lite' which Englishmen of that age believed to be current among Hindus. But he had studied meanwhile a more authoritative source of information about Indian beliefs and ideals in the works of Sii William Jones. This study not only suggested imagery and scene drawing in his later poems, but also, coming at a critical stage in the development of his mind, modified his Platonic idealism towards the conception of a world of sense 'where no thing is but all things seem,' of the Human soul as an eternal ray of the infinite spirit, and of the ultimate reality as one alone, existing where 'the sun doth not shine, nor the moon and stais, where the lightning doth not flash nor doth fire'

"The last essay is on Shelley and the French Revolution Passages of his works, chiefly between 1810 and 1817, show his interest in the doctrines, of the Revolution and his historical knowledge of its events and social conditions which had led to it, his scathing contempt for the parasitism of the French nobility and the cruelty of the church. The Revolt of Islam is

closely based on his studies of the French Revolution and its failure. His later poems in which the spirit of Revolution is preached turn to contemporary movements of the same kind in Greece of Spain "—J M Furness in English"

- "The poetry of Shelley has been studied from many points of view and the detractors have been as violent as the admirers of his baffling per sonality. Mr Sen has done a real service in concentrating upon the element of thought-structure in his poems for this is an aspect which has not often been examined with the care that it deserves. Mr Sen has approached the influence of Platonic thought upon Shelley from a new angle and though it cannot be said that he is fully convincing, it must be admitted that he has given much food for thought
- "It is, however, the question of Shelley's indebtedness to Indian thought that forms the most provoking part of the work. Mr Sen's thesis is that Shelley was familiar with Indian 'hought and that some of the elements in his poetry are not explicable on any other hypothesis. This is in many ways a startling suggestion, but Mi Sen is a careful scholar and has brought forward evidence that cannot be rejected summarily "—The Statesman
- "I have to thank you for your very interesting study of Godwin and Shelley It follows true lines and is therefore satisfactory. I agree with you that the Prometheus Unbound and the Philosophical View of Reform are composed on very different keys and the former is more Shelleyan. It does not follow, however, that the Prometheus is the wiser work. The change of Shelley's attitude to Godwin I sympathise with entirely
- "I have read your article Shelley and the French Revolution with much interest. I agree with you entirely about the importance and lasting effect which the events and principles of the French Revolution had on Shelley
- "The philosophical ideas of Shelley and the sources from which he diew them have not yet been fully investigated but you by your examination of him have done something to remedy that I am much interested by your chapter about the influence on Shelley of Indian thought I think the book to be very well done "—Prof George Gordon, President, Magdalenc College, Oxford
- "I had myself been interested years ago in the problem of the influence of Godwin over Wordsworth and was therefore well prepared to enjoy your important contribution to an analysis of the influence of the same philosopher over another great English poet. I think your work deserves full praise whether you show what Shelley borrowed from Godwin or what he rejected when he was in entire possession of his genius.
- "I admire the precision of your knowledge of English literature as well as your command of the English language and will not fail in the future to acquaint myself with such literary essays of yours as I can get access to
- 'I beg you to accept my thanks and congratulations for your essay on Shelley and the French Revolution which I have read with great profit and pleasure. It has refreshed and complemented the instruction I had already gathered from the book of my Sorbonne colleague Professor Charles Castre on 'Les Poets anglais at la Revolution francaise'
- "I have read your essay on Locke Hume and Shelley through with great interest and profit. It seems to me an able complement to my friend Andre Koozut's illuminating work on 'La Jeunesse de Shelley' While Mr Koszul is chiefly concerned with the growth of Shelley's mysticism you insist on the rationalistic tendencies of his early years and admirably set off his debt to Locke, Hume and the French philosophers of the late XVIIII century Your essay is a valuable contribution to the formation of his thought Your argumentation is clear, thorough and convincing "Emile Legouis, Hon Professor at the Sabonne

- The Supernatural in English Romantic Poetry, 1780-1830, by Sukumai Dutt. MA, BL, PhD Demy 810 pp 118 Rs 3-8

This is a thesis approved by the University of Calcutta for the degree of Doctor of Philosophy. An attempt has been made in this book to bring into due relief and relation a special aspect of English romantic poetry vir., its supernaturalism. It is a critical survey of supernaturalism are growth, and phases of development in English poetry during 1780 1830.

The book consists of the following three chapters with an essay on Yeats in the Appendix

- (i) Poetry, Pleasure and Utility, (ii) Poetry Katharsis and Creativity and (iii) Poetry, Monads and Society. This is an attempt to organise and record some thoughts on the paradox of communication in poetry. They centre round the problem of reconciling the claims to uniqueness and universality which art simultaneously makes.

6 TIBETAN

Bhota Prakas (Sanskrit-Tibetian: A Tibetan Chrestomathy), by Mahamahopadhyay Vidhusekhai Sastii, Asutosh Piofessoi of Sanskiit, Calcutta University, 1939 D/F'cap 8vo pp 638 Rs 5-0

This is a very useful book for scholars who are interested in Tibetan and want to study this subject particularly with reference to Sanskrit texts. The Chrestomathy is divided into three parts Part I contains lessons in Tibetan and Sanskrit, Part II consists of Notes, and Part III gives complete Vocabularies, (i) Tibetan-Sanskrit and (ii) Sanskrit-Tibetan. The Introduction among other things gives a short description as to how Sanskrit literature along with Buddhisin entered into Tibet, as well as a brief notice of Tibetan literature. A Skeleton Grammar of the language has also been added to the Introduction. In an Appendix a short Bibliography has been given to help further study.

8. GERMAN

German Primer for Science Students, by H G Biswas, M Sc Royal 8vo pp 258 + xm 1938 Rs 2-0

The book is pre-eminently a 'German Self-taught' It is divided into three sections Grammar, Literature and Science The first two sections, though complete in themselves, serve to support and strengthen the third The Science section is distinguished by novel features of outstanding ment It reveals

a long and patient collection of materials—pronunciation of typical words, names of scientific apparatus, glossary of terms, verbs commonly used in Science and their application, phrases found in scientific literature, common abbreviations, representative extracts from journals and standard authors, all with the corresponding English renderings by an aident student of Science, and a judicious arrangement of them in a series of graduated lessons, best calculated to confer on the beginner the maximum benefit with the minimum expenditure of time and energy. A balanced selection of subject-matters from every important branch of modern Science has enlarged the scope and enhanced the usefulness of the Primer

The book concludes with an exhaustive select vocabulary arranged in two primary groups, scientific and non-scientific and each of these again into three sub-groups—Nouns, Verbs and Qualifying words

A comprehensive Literature section containing interesting and familiar extracts from the humanistic group of studies has been incorporated with a view to imparting to students of Science a degree of linguistic efficiency, essential for an easy grasp of theoretical portions of original papers and books. Another striking function of this section is to relieve the monotony engendered by a study of matters scientific with their dry technicalities and thus to stimulate and sustain the interests of the students in an alien language.

"The author gives to our students the benefit of the experience which he got by learning German for the same purpose as they want to learn it, the difficulties are still fresh in his memory, and he shows the way by which he has succeeded. I expect the book to be an essential help for many Indian students especially by its large collection of phrases taken out of scientific papers."—Foreword. Dr. F. II. Levi. Dr. Phil. Nat. Hardings. Professor, Calcutta University

Dr Meghnad Saha, D Sc, F R S, F N I, Palit Professor of Physics Calcutta University, writes—"German Primer for Science Students," by Mr H G Biswas, M Sc, appears to contain a number of interesting and novel features—A fair working knowledge of German is indispensable to every serious student of higher Science, and to this class of learners the present Primer is expected to prove a valuable asset—The arrangement of lessons, the selection of topics, the direct method of teaching followed throughout the Primer are in accordance with the latest Psychological methods of language teaching

As one associated with the increasing development of higher Sciences in the country, I have felt keenly the want of a book of this type. This book coming as it does from an Indian student of Science perfectly conversant with the difficulties incidental to the learning of German, will go a long way in removing this want."

Sir C V Raman, Kt MA PhD, DSc, LLD, FRS NL— "From a perusal of it, I form the impression that it should prove a very useful publication"

Professor B Sahm, MA, DSc ScD, FRS—" The book is conceived on very practical lines and it has evidently entailed a lot of patient selection on your part of what is likely to be most useful to the beginner. I think the work should be of much use to Science students in India."

Current Science—"After developing the essentials of grammar in a human way in the first 59 pages the author has devoted a section to literature and one to each of the important seences. These sections contain the special vocabulary of the field covered and illustrative passages with English translation. The book ends with about 50 pages of a select vocabulary of words common to all sciences and literature. The illustrative passages chosen are so interesting and arc here and there illustrated with Sanskrit parallels in such a dextrons way that one is led on by the thought content of the passages incidentally picking up the language with the least conscious effort. This no doubt is the correct way of introducing grammar and T should like to congratulate Mr. Biswas on his success in this difficult art."

Iournal of the Indian Chemical Society—" What gives the book an added interest and value is that it contains the results of the author's own personal experience of learning German, of the difficulties he encountered in the process and how he succeeded in overcoming them."

- Dr H & Sen M 1 DIC DSc (Lond) F & I, Director, Indian Lac Research Institute Ranchi—" I im of the opinion that it will be an invaluable help to Indian students preparing for a research career. I welcome this book, specially in view of the fact that Mr Biswas, himself being an Indian, is conscious of the difficulties that in Indian Science student meets in learning the German language for the specific purpose of reading and understanding scientific I terature."
- Dr P C Mitter, M A Ph D P N I, Palit Professor of Chemistry Calcutta University—" I must congratulate von on your excellent German Primer" I was rather sceptical in the beginning as I thought that for one who had never been in Germany the writing of a "German Primer" would prove too difficult a matter. The wonder is, that you have been able to carry out your self imposed task so well!"
- Dr N R Dhar DSc, FIC—Professor of Chemistry, Allahabad University—" It is an excellent publication which is bound to prove extremely useful to the Science students. You choice of topics is very satisfactory."
- Dr J N Mulherice, D Sc Ghose Professor of Chemistry, Calcutta University—" I agree with Profs Raman Dhar and Sahni regarding the advantages of the book I think it would be of great help to Indian Science students"

Professor M Quarati Khuda, DSc (London), DIC—" I have gone through the book and I find that the method of dealing with the subject has been admirably suitable for those who want to learn German in a short time. I am confident that the book will be of great help to the students in general and to the students of Science in particular."

Count von Podewils Durnir Consul General for Germany—" The contents of the book will prove invaluable to Indian students as a preliminary introduction to the study of the German language accept my congratulations for the high achievement you have attained in producing this valuable work"

- Dr S K Mitra, D Sc, Ghosc Professor of Physics, Calcutta University
 —"We have been feeling the want of such a book for a long time. It
 would be extremely useful to Science students and scholars who are frequently
 required to refer to German books and periodicals."
- Dr S Ramchandra Rao, M.1 Ph D., D Sc (London), Professor of Physics, Annamala: Usiversity—" the book is bound to be very useful to the Science students of India Foreign writers do not understand our difficulties in learning German I have carefully perused your book and am convinced that it satisfies a long felt need"

Prof Cullis cains the gratitude of mathematical students for affording them the opportunity of obtaining a right perspective of an important branch of pure mathematics, whose developments so far have appeared in scattered notes and memoirs not always easy of access. Examples are abundant and, while a large number of them are illustrative, there is a good collection of suggestive exercises and cating the directions in which further original work may be done—The Journal of Education

The chief feature of this book is that it deals with rectangular matrices and determineds as distinguished from square matrices and determinants, the determined of a rectangular matrix being related to it just as a determinant is related to a square matrix. The author endeavours to set forth a complete theory of these two subjects, and uses the first volume to give the most fundamental portions of the theory. Two more volumes are promised, the second to give the more advanced portions of the theory, and the third its applications

This is new ground and the author has done a splendid piece of work and with the publishers deserves much credit—Mathematical Teacher, Syracuse, U S A

The outstanding feature of the work, which the author properly emphasises, is the detailed discussion of rectangular, as distinguished from square, matrices. For this reason alone the work ought to give a great stimulus to the subject, and we hope that the publication of the whole treatise will not be long delayed. Until it is finished, it will be difficult, if not impossible, to give a proper appreciation of it, especially as the author introduces so many new symbols and technical terms. One thing, however, is certain, we now have the outlines of a calculus of matrices in which the operations of addition, subtraction, and multiplication are definite. Nature

The present volume worthly maintains the traditions of the Cambridge University Press, and is a most valuable addition to the rapidly growing series of volumes for which the Readership at the University of Calcutta is responsible—Science Progress

On the Fundamentals of Analysis, six public lectures delivered by F W Levi, Di Phil Nat, Hardinge Professor of Mathematics, Calcutta University

In these lectures the Analysis of our present time is considered. Two theorems are stated to be fundamental, the repartitive theorem, and the general theorem of convergence in a generalised space. Some parts of Analysis can be derived from them directly, whereas other theorems need the consideration of more specific properties of the system of the real numbers Re 1-4

in the Geometry of Hyper-Spaces, which is now recognised as an indispensable part of the science with extensive applications in mathematical Physics. Theory of Higher Plane Curves, Vol I, by Surendramohan Gangopadhyay, D Sc (Third Edition, thoroughly revised and enlarged) Demy 800 pp 396-121 Rs 6-8

The work is designed to meet the Syllabus prescribed by the University for the Master's Degree and is intended as an introductory course suitable for students of Higher Geometry. The present volume which is a thoroughly revised and enlarged edition of the earlier includes new materials together with recent researches which will not only be of use to the students for the Master's course but will also encourage independent thinking in students of higher studies engaged in research work

Theory of Higher Plane Curves, Vol II, by Surendramohan Gangopadhyay, DSc (Second Edition, thoroughly revised and enlarged) Demy 8vo pp 408
Rs 4-8

This volume deals with the application of the theory in studying properties of cubic and quartic curves

This volume is an endeavour to give as complete an account of the properties of cubic and quartic curves as could be compressed within the limits of a single volume of moderate size, confining the discussion to the prominent characteristics of these curves. The subject has been presented in clear and concise form to students commencing a systematic study of the higher curves, indicating references to original sources as far as practicable. It is very useful to students of higher plane curves

Precisely at my seminairs or colloquim of the College de France, we have reviewed such subjects and all my auditors and colleagues have been keenly interested in your way of researches which we all consider as one of the most important roads opened to Mathematical Science."

Irofessor le Engel, Geissen 'I am emprized over the beautiful new calculations on the right angled triangles and three right angled quadrilate rals (in hyperbolic geometry). Your analogies in the Gaussian Penta gramma Miribum are highly remarkable."

Professor W. Blaschke, Hamburg. I am much obliged to you for your kind sending of your beautiful geometrical work. When, as I nope, a new edition of my Differential Geometry comes out I shall not forget to mention that you were the first to give the beautiful theorems on the numbers of Cyclic and Sextactic points on an oval."

Professor 1 R Porsyth, London 'The first part of your collected geometrical papers is an attractive record of fine mathematical attainment and I am glad to learn, not only of the manifest advances you have made in our science, but also of the stimulus your work has afforded to other investigators. I can offer you no better wish and suggest no prouder aim than continual success in your Researches."

Prof T Hayashi, Japan "Your Collected Geometrical Papers, Part I, is very important to the progress of geometry and is to be highly appreciated by geometricians in the world. We regret indeed that most of your valuable papers have remained unknown till now

But the collected papers should be welcome to raise your position in geometrical research "

Professor F Cajori, California "I congratulate you upon your success in research. If ever I have the time and opportunity to revise my History of Mathematics I shall have occasion to refer to your interesting work"

Professor P Montel, Paris "Many thanks for sending me your beautiful work 'Collected Geometrical Papers' I am acquainted with many of the memoirs inserted therein and I am happy in having them in a handy united form. I am thus in a position to judge anew of the simplicity and algour of your methods which have led you to elegant results"

Prof L Godeau, Liege "A first leading of your papers has roused my keen interest. I intend making an exposition of these questions early to my students of Geometric Super eule, an exposition to which I reckon to join that of works of M Juel"

Prof T Levi Civita, Rome "I have received the valuable, very ingenious papers vou have had the kindness to send me I have no special knowledge of the subjects you have treated in so deep and interesting manner. But also a general reader of mathematical papers is able to appreciate the results of your investigations and the penetrating methods you have employed"

I have pleasure in finding in that work a simple and clear exposition of the actual state of advance of certain of the most important problems concerning trigonometrical series. The documentation is true and complete, it is only once that I have had occasion to find anything in which the erudi

tion of the author appears to be in default. M. Kolomogoroff, pursuing the studies indicated on p. 53 has obtained an example of a function of sum mable square of which the Louisin Series diverges everywhere

For justifying the enunciation of the first inthose the original demonstration of the first inthose then he gives a historical note, acress interesting by the cide of the old demonstration. M. Prasad gives always, whenever possible as simple a proof as the question under consideration would allow. Many of the e-proofs are due to M. Prasad himself for example, that which M. Prasad gives on pass 60.61 for a enterior for the summability (C.1) which I connected at another time.

M. Prasad present his researches elevant and interesting, by which he has carried further the classical york of du Box Reymond."

An Introduction to the Geometry of the Fourfold, by Surendiamohan Ganguh, D Sc Demy 8vo pp 445
Rs 6-8.

The fascinating manner of exposition by which the notion of a four-dimensional space has been gradually introduced and the various new concepts explained will tempt even a non-matnematical student to know something of this mysterious world. In view of the wide scope of the subject, some representative topics have been selected, sufficient to give a general outline of the growth of knowledge in hyper-geometry, and those interested in the subject will find in it much of the materials, collected and summarised so clearly and succinctly, necessary for a thorough grasp of the subject-matter. Attention may be called to the excellent arrangement of materials and the lucid exposition of the various angle-concepts, properties of curves, surfaces and hyper-surfaces in a fourfold. In fact, the work is admirably adapted to its purpose and is expected to be very helpful to workers in the field of hyper-geometry.

Prof E T Whittaker says "Since its arrival, I have been reading it with much appreciation and admiration. The plan is excellent, the exposition clem, and the author well acquainted with the original memoirs in

which the subject has been developed. It is in my opin on worthy of high recommendation."

Text-book of Spherical Trigonometry, by Piamathanath Mitia, MA, Lecturer in Pure Mathematics in the University of Calcutta $Size 5\frac{1}{2}" \times 7\frac{1}{2}" 16mo \ pp \ xail + 163$ Rs 2-8

This book is intended as an introductory text-book on Spherical Trigonometry and an attempt has been made to present the subject-matter in as simple a manner as possible. It has been brought to the standard required for the examinations of Indian Universities. It contains all the propositions which a student has and ought to learn to have a fairly comprehensive knowledge of the Trigonometry of Spheres, and thus it paves the way for higher study in Spherical Astronomy. A short historical introduction has been given at the beginning showing the successive stages of the development of the subject. The history is very instructive and interesting too.

Extracts from opinions of eminent Mathematicians

Prof Di Harald Bohi, University of Copenhagen "I thank the University of Calcutta very cordially for its kindness in sending me the beautiful book on Spherical Trigonometry by Professor Pramathanath Mitra I have looked it over with great interest and think that it is well adapted indeed for the purpose to inspire the higher study of Spherical Astronomy at your and other Universities. Also the historical introduction I have read with great interest."

Prof Dr D E Smith, of New York "It is with much in terest that I have examined the book, and I take this opportunity to men tion a few features that impressed me as particularly valuable

"It seems to me most fortunate that the author has built his work upon the historical foundation thus showing to his readers the human side of the subject. His introduction has given in a few more that will awaken an interest in the somewhat abstract science of Spherical Trigonometry than one would think could be condensed into such a brief statement. The text which follows also introduces historical notes that cannot fail to main tain this interest. I am also pleased to see the natural way of introducing the 'imaginary' number, showing that this Mathematical concepts not as imaginary as the reader may have thought

an excellent list of examples, and the student who masters these should certainly be able to apply his Spherical Trigonometry readily to Mathematical Astronomy and to the modern branches of technology and physics. I feel suite that the book will meet the needs of pupils not merel, because of its selection of problems but as the result of the natural—but by no means common—method of approach to the subject

present my congratulations to the author and to wish him success in his efforts to humanise the teaching of Mathematics in India, as has been my effort to do so in this part of the world "

Prof Dr J Hadamard, of Paris I shall keep and read with much interest the Spherical Trigonometry. Such an elegant and clear book on the subject was lacking, I have been especially interested in the historical introduction and also in the geometrical developments in the last chapter

I think the book will be of great use to students and even to Scholars

Prof. Dr. L. Tonelli, University of Pisa. At it is a book well written which will be very useful to all who have need of studying and making use of Spherical Trigonometry.

Prof. Dr. N L. Norland, University of Copenhagen. The consider this a very valuable text book."

Prof. Dr. F. W. Levi, University of Calcutta. delighted to get your book on Spherical Trigonometry. L. pecially I was interested by the historical introduction as I had little I nowledge of the ancent Hindu Geometry and Astronomy

"I hope this book will be a considerable help for students reading that subject."

Principal Dr & C Bagchi, Tree President, Calcutta Mathematical Society

There is a freshines of treatment of familiar topics like Spherical Excess, Legendre's Rule and Hart. Theorem which is retreshing. The book will be of great help to be ginners in the subject. The historical introduction is a valuable feature of the book and positional astronomer vall not find a better help book for his purpose.

Selected Problems of Differential Geometry (Calcutta University Readership Lectures), by Prof. W. Blaschke Royal 8vo pp. 12 Re. 1-0

Khandakhadyakam, edited by Pandit Babua Misia, Jyotishacharyya Demy 8vo pp 217 Rs 2-0

The book is an astronomical work by the great Scholar Brahmagupta. It contains the commentary called Vāsanā-Bhāsya by Āmarāja. This is the only available work which describes one of the two systems of astronomy as taught by Āryabhata I (boin 476 AD), generally known as Ārdharātrika system and is different from the Audayika System as taught in his Āryabhatiyam. It was widely read by Arab Scholars and was known by the name of Alarkand. Hence it is a very important work on the History of Hindu Astronomy.

The Khandakhadyaka (an astronomical treatise of Brahmagupta), translated into English with an introduction, notes, illustrations and an appendix, by Prabodhchandra Sengupta, M. A., late Professor of Mathematics, Bethune College, Calcutta, some time Lecturer in Indian Astro-

nomy and Mathematics, Calcutta University Royal 8vo pp xxx + 204 Rs 3-8

Prof David Eugene Smith, Ph D, of Teachers' College, Columbia University, the world-renowned Historian of Mathematics, thus reviews the book in the "Scripta Mathematica" (August, 1934) —

The name of Biahmagupta has long been known to students of the his tory, of Mathematics—to Hindu scholars through numerous Sanskit manus cripts, to English readers through H T Colebrooke's Algebra with Arith metic and Mensuration, from the Sanskit (1817), and to each through numerous more general treatises on the history of Indian culture. It is strange however—considering the fact that he was primarily an astronomer, living and working in the great astronomical centre at Uplain—that so little has appeared in European translation relating to his contributions to his chosen field of research. It is therefore a subject of congratulation that Professor Sengupta has published an English translation of the first part of Brahmagupta's most important work, and that there is a good prospect that the second part will appear later

The major topics discussed in the ten chapters are as follows —I On the calendar, II On the mean and true positions of the 'star planets' (Mars, Mercury, Jupiter, Venus, and Saturn), III On the three problems relating to diurnal motion IV Lunar eclipses, V in solar eclipses VI On the rising and setting of planets, VII On the positions of the moon's cusps; VIII On conjunction of planets, IX Corrections and new methods, X On conjunction of stars and planets

The work closes with three appendices I Hindu Luni solar astronomy, in which the author suggests that 'so far as the luni solar astronomy is concerned Hindu astronomy is independent of Greek astronomy in respect of astronomical constants,' that Hindu astronomy is generally more accurate than Greek astronomy, and that Hindu astronomers were not 'mere cal culators' as the late G R Kaye had affirmed, II Greek and Hindu methods in spherical astronomy, III Hindu epicyclic theory. In this part of the work Professor Sengupta has given a careful comparison of the Greek and Hindu achievements in the domain of astronomy and has traced the growth of the oriental use of trigonometry as applied to this science. There is a satisfactory, index, for which scholars will be grateful. As to the details of formulas and the accuracy of the computations, critical discussion is possible only after a careful reading by an astronomer. Suffice it to say at this time that the work represents a high degree of scholarship and that the thanks of both oriental and occidental readers are due to the author, to Calcutta University, and to those who have control of the Research Fund in Indian Mathematics and Astronomy created by the late Maharaja Sir Manindrachandra Nandi, KCIE of Cossimbazai. It is hoped that Part II of the Khandakhadyaka will appear in due time, being a matter of great importance to scholars.

The Khandakhadyaka with Prithudaka's Commentary, Edited by Piabodhchandia Sengupta, M A Royal 8vo

pp 170 1941 Rs 2-8

Caturveda Prithudaka Svamin's commentary on the text is a valuable work on Hindu Astronomy. It reveals important points in the history of Indian Mathematics and Astronomy, more especially on the use of the Decimal system of notation with the symbol for Zero in Arithmetical operations. The whole book is printed in Devnagri types.

2 BOTANY

Indian Medicinal Plants, by Lieut-Col K R Kiitikai, FLS, IMS, and Major B D Basu, IMS (Retd)

Nicely bound in 2 rols Plates kept in nice cardboard cases Rs 275-0

The book contains botanical description, names in veinaculars, properties and uses of over 1,300 Indian plants. Neatly printed on thick art paper (1,419 pages) with clear illustrations in above 1,000 roval 4to-sized lithographic plates. A very rare and valuable work of reference to botanists, medical men, manufacturers of indigenous drugs and Agricultural and Forest Departments.

"To real investigators in this field (of indigenous systems of medicine) the monumental work on Indian Medicinal Plants ought to be indispensable. Apart from the value of the book to the medical profession, it is helpful also in tapping the resources of the country for the manufacture of drugs "—New India

'The Imperial and Provincial Agricultural and Forest Departments of British India should make use of the information brought together in this monumental work. All Native States should have medical plant gardens and pharmaccutical laboratories and their Agricultural and Forest. Departments should be provided with copies of this book. Now that it has been published, the educated section of the public should insist that all indigen ous physicians of repute and all the leading pharmaceutical factories should be able to scientifically identify the plants they use '—Modern Review

The work has been divided into three parts

Book I Botany and Philosophic Speculations

,, II Botany and Science of Medicine

,, III Botany and Science of Agriculture

The information culled and presented in a systematic and read able form by the author shows how close and accurate was the study of the many phases of Plant life even at that remote period though necessarily fragmentary and in many cases speculative. Even as such many of the ideas bear a remarkably modern outlook "—Journal, Indian Botanical Society, viii 1929

"This book, based on all available Sanskrit literature, gives the status of plant knowledge in ancient India. It includes many quotations (in Sanskrit and translated into English) of references to morphology, physiology, ecology, taxonomy and evolution—there are many passages that indicate a fair knowledge of fundamental principles. Social emphasis is placed on the use of plants in medicine and agriculture, both of which arts were fair ly well developed "—Biological Abstracts (USA), iv 1930

'The essay embodies not merely a collection of fragments of early speculation on plant-life but a critical survey of the botanical knowledge of the Hindus and its application to Medicine and Agriculture, in the search light of modern science. The author has, with the grasp of a trained botanist, succeeded in marshalling evidence to show clear indications of possession by the ancient Hindus of such knowledge of plant life as prognosticate the dawn of science "—Prof S C Mahalanobis

work of real research and cundition. It is undoubtedly the most important work upon this subject which has yet been written in the English language. It is full of interesting information and is a valuable contribution to the history of Medical science. Di Mukherjee is a pioneer in this field of research. It is of course impossible in a short notice to give an adequate account of a scientific work devoted to a special study, but his discovery that the suigical instruments in use in Europe were only modifications of those used by our surgeons in incient days is no doubt startling. The book is exhaustive, original and informing and it reflects the utmost credit on the industry, learning and research of its author. From many neglected, forgotten and unexpected corners, he has accumulated a mass of materials and compiled a systematic account of the instruments used by the Hindu surgeons, about 3,000 years ago. A field of study which is unknown to many is here made accessible to all by the labour of an Indian It has the advantage of being written by one, who is not only a noted surgeon of Calcutta but is also a profound Sanskrit scholar. No brief analysis of Dr. Mukherjee's work is possible. The work is divided into nine chapters, in which he describes each instrument by its Sanskrit name with a comparative study of similar instruments from the suigical catalogues of other nations. Besides, there is a learned preface, and a carefully prepared index of Sanskrit and English words. The book is of extraordinary interest to those who would make an impartial study of the surgery of the Hindus. The foot-notes contain the Sanskrit originals, the source of Dr. Mukherjee's descriptions of the instruments. The subject of ancient Indian medical literature has been little noticed by the European scholars. The contributions from Wilson, Wise, Jolly, Cordier and Hoerule are no doubt important, but their works cannot compare with the present, in the amount of original research and complete mastery of the subject. Dr. Mukherjee quote

"The results of your investigations have been a revelation to me In any case, a perusal of your two volumes must convince any unprejudiced reader that the development of the healing art in India must always occupy an important place in the hitsory of civilisation We hear a

great deal of culture' now a days, and it does not always wear a beneficent aspect. But peace has her victories as vell as war, and it is evident that the humane achievements of the Indian disciples of Aesculapius can no longer be ignored. It is a pleasant reflection that henceforth the medicine and surgery of the Last will be allied in harmonious conjunction with the same sciences as cultivated in the West, and the happiest results may be expected from their sisterly rivalry. "—Charles II Tauney

The work consists of notices, biographical and bibliographical, of the Ayurvedic Physicians and their works on Medicine from the earliest ages to the present times. And as derives are said to be the propounders of the healing art, the notices of the gods have been culled from the Vedas and the Puranas. It traces the origin and development of Indian Medicine from the most ancient times and naturally the gods and goddesses, seems and sages, who celebrated the science find a place here

"It is difficult to overestimate the importance of the work. The valuable B bliography is eloquent of the crudition and labour of the author, History of vaccination and inoculation is a highly interesting study. Of its value as a work of reference it is indeed superfluous to speak. We hope that all educated men who are interested in the history of Medic ne will welcome the comprehensive, Biographical and Bibliographical Studies of Ancient Physicians of India "—The Indian Medical Record, Feb., 1925

The Aborigines of the Highlands of Central India, by B C Majumdai Demy 8vo pp 1-1v+84 Re 1-8

In this monograph, the author has furnished a comprehensive view of all the tribes of Central India and has suggested some new propositions regarding the origin of the racial characteristics of the Sabara-Kol people. It has been shown for the first time in this book how a large number of aboriginal tribes of the highlands of Central India are inter-related and bear genetic affinity to one another and how their social and religious institutions tend strongly to prove that the area aforesaid has been the land of their racial characterisation.

OPINIONS

Prof A C Haddon, FRS of Cambridge Valuable and interesting little book on the Sabara Kol people. I hope to make use of it in the future, but for the present I am engaged with New Guinea. This little book strikes me as being a careful attempt to clear up some of the problems of that complicated region (the highlands of Central India), and, as such, is useful. The University has done well to publish the book.

Sir Edu ard A Gait 'I may say at once that I quite agree with the ruthor's main point, viz, that the Kols, or Munda speaking peoples, have been in occupation of the highlands of Central India for many centuries. It is wonderful how he manages to write on so many subjects without being able to use his eyes. Very few have been able to overcome a handicap like this so successfully as he has."

- L E B Cobden Ramsay, Esq, CIE "I have lead with very great interest Mr Majumdar's monograph on the Aborigines of the Highlands of Central India I consider the tness put forward of the origin of the lacial characteristics of the Sabara Kol race as most able and interesting. The author has given convincing evidence that this race is not to be confounded with the Dravidian laces the point is one of great importance not only to students at the University but to advanced scholars of Ethnology and they owe a great debt to Mr Majumdar for his study and research
- "The original habitat of the Sabara Kol race has been proved with great skill and knowledge
- 'If I may be permitted to add a personal note I would say that in 1905 I spent six months in the Feudatory States then included in the Chota Nagpur Division and devoted considerable time to compiling notes on the various aboriginal faces I came in contact with, more especially, notes on the Kharwais of Surguja I am, therefore, in a position to corroborate Mi Majumdai's remarks on the Kharwais and in my opinion he has very clearly established the original habitat and interrelationship of the Sabara-Kol race and what is more important that the race is not a Diavidian race ''

Elements of Social Anthropology, by B C Majumdan $D/Crown\ 16mo\ pp\ 139 + x\ Rs\ 2-0$ 19 1362B

"In the preface to the book the author very rightly points out the unportance of the study of Anthropology for all educated persons, including political and social reformers. Administrators and other statesmen should undoubtedly have a knowledge of this Science. The book is intended for students. But it is not written in a forbidding style, as some text-books are. It is divided into five chapters, devoted to Man and his Equipment for Progress, the Adventures of Man, Expansion of Human Society, the Marriage of Man and Religion. All the chapters are written in a popular and interesting manner. In the chapter on Marriage the author effectively controverts the theory that some kind of marriage or other was preceded by promised ty. Considering that moral laxity is at present widely prevalent ilmost all over the world, scientific views like those of the author deserve serious study."—The Modern Review, Calcutta, April, 1937

Anthropological Papers (New Series)

No. 1. Hos of Seraikella, Part I (Anthropological Papers, New Series, No. 1), by Anathrath Chattery, M.B.B.S., and Tarakchandra Das, M.A. Royal Svo pp. 94 (Profusely illustrated.) Rs. 2-0

This is the first of a series of papers started by the Anthropological Department of the University of Calcutta. The first part deals with the special characteristics of the life of the Hos of Seraikella, a state in the district of Singbhum. The book is of special interest to all students of Anthropology.

No. 2 and 3. The Bhumijas of Seraikella and the Wild Kharias of Dhalbhum (Anthropological Papers, New Series, Nos 2 and 3), by Tarakchandra Das, MA Royal 8vo pp 65 and 40 Rs 2-8

The Bhumijas form an important branch of the pre-Dravidian peoples of Chota Nagpur They are distributed over a wide range of territory including Bengal, Bihar and Orissa, and Assam though the main section inhabits the districts of Manbhum The major part of the tribe has adopted Hindu manners and customs and has secured a place in the Hindu social system. But a few still persist in the observance of the older animistic faith together

with their ancient manners and customs which also are undergoing modifications. The present monograph deals with a part of the latter section of the tribe inhabiting a small native state in the district of Singbhum. It describes the social organisation, kinship system, religious beliefs and ideas and also the life-history of an individual. The monograph is well illustrated with several plates.

The Wild Khaiias form an interesting time inhabiting the hills and jungles of Chota Nagpui and Olissa Excepting one or two stray references in books of travel nothing is known to have appeared in print about this decadent tribe which still clings to the food-gathering stage of culture. The paper deals with the manners and customs, material culture and the religious beliefs and practices of the tribe. It is profusely illustrated. The ethnic types illustrated here are accompanied by records of anthropometric measurements—a novel feature in Indian ethno-photography.

Ancient System of Irrigation in Bengal, by Sir William Willcocks Demy 8vo pp 134 Re 1-8

The Calcutta University issue under the above title a series of four lectures by Sn William Willcocks Inigation is undoubtedly the oldest applied science in the world and the author, a well-known authority on the subject, has spent a lifetime on imagation works. We may therefore be sure that when Sir William has something to say on the subject, that something will be worth

listening to In sketching the past history of overflow irrigation in Bengal, which was evolved some 3,000 years ago, the author stresses the 'team work' required of everyone

He says, "the following of such water from field to field, and the be coming as much interested in one's neighbour's property as one's own, ele vated everyone engaged in it. Such work was a better field for developing character than any school"

In putt ng these facts in detail before his readers he increases interest and as he aptly puts it "inherited love for co operation did not descend from the clouds" it came with the distribution of the muddy waters from overflow canals".

A further interesting feature that Si William develops, and this with the backing of an equally sound authority, viz, Di Bentley, Director of Public Health in Bengal, is the fact that the increase of irrigation with muddy flood water coincides with the decrease of malaria in Bengal

Very interestingly indeed does Sir William unfold the history of over flow irrigation in Bengal in his first lecture. In his second and thud lectures, Sir William deals lucidly and at length on the restoration of this overflow system, discussing both theory and practicability in his usual thorough manner

His lectures prove conclusively that overflow ningation serves to combat malar a, enrich the soil, provide an abundant harvest of fish, and prevent congestion of rivers feeding the canals, and if his lectures have helped to stir the Irrigation Department, which has shut its eyes and ears for ages to these apparent advantages, Sn William will be hailed by fiture generations as the saviour of the Bengal peasantry

Illustrating his fourth and last lecture with a series of tables, Sir William shows that the total cost of restoiation in our day, will approximate Rs 346 lakhs—surely not an impossible expenditure when we consider the untold benefits and undoubted prosperity that must accrue to the Province—Review of Indian Engineering, January, 1931

- The Co-operative Movement in Bengal, by J P Niyogi, M A (Cal), Ph D (London), Minto Professor of Economics, University of Calcutta Denny 8vo pp 1x+267

 10s 6d

The purpose of this book is to throw light on the working of co-operative credit and marketing societies in Bengal, so as to prepare the way for more enlightened plans for improving agricultural credit facilities

REVIEWS

The book deserves warm commendation. As a historical account it is lucid and accurate, as a critical study it is sound and temperate. It is well arranged, well written, with many useful tables of Statistics and a good index. In short, it is a valuable addition to the literature of co-operation—Itimes Literary Supplement, London

Dr Niyogi has rendered a useful service in compiling this scientific study of economic conditions in rural Bengal. Like other competent students of the problems of widespread Indian poverty, he recognises that there is no single panacea for the relief of agricultural indebtedness. To those who wish to study more deeply a fundamental subject of vast proportions, this book may be strongly recommended—The Fabian Quarterly, London

Dr Niyogi has done a distinct service to students of Co operation and Economics by this lucid and candid account of what may be called the rise and fall of the co operative movement in Bengal. An intensive study has been made of the different phases of co operative activity not only in Bengal but in other provinces too, wherever needed for comparison. The lessons of experience of foreign countries in certain forms of co operation have been brought home with a wealth of knowledge and critical acumen —The Hindu, Madras

*The right of publication of this book is held by Messrs Macmillan and Co, Limited, Calcutta, Bombay, Madras, London, on behalf of the Calcutta University and copies of the book may be had of the Firm

I have to congratulate you on your having made one of the finest contributions to the study of Co operation in India and on supplying Indian Economists with a valuable addition to their library. Your book is strong alike on the descriptive and on the critical side. You have diagnosed the various malades of our co operative system with great skill and courage and are not afraid to tell the whole truth—Sit J. C. Coyajee, Kt

Dr Niyogi's excellent analysis of the Co operative Movement in Bengal is a timely publication. In so far as the co operative movement in Bengal is concerned, Dr Niyogi's book is the best we have yet read. The information and the theoretical comments in this book are enough to make it indispensable to every serious co operative student. —Capital, Calcutta

Gleanings from my Researches, Vol. I. Kala-azar, its Chemotherapy by Sir Upendranath Biahmachari, Kt, MA, MD, PhD, FRASB, FNI Crown 4to p_P xx+461 With numerous tables, chaits and plates The whole book is printed in Ait paper 1941 Rs 10-0

This volume contains a series of the author's well-known papers on Kala-azai including Chemotherapy of antimonial compounds in Kala-azar infection which have appeared from time to time in various journals. They record the evolution of the advances made in the treatment of a terrible tropical disease.

OPINIONS

"In Bengal, the immediate response to the word 'kala-azar' put by the psycho analyst would on nine occasions out of ten be 'urea-stibamine or 'Brahmachari,' so deep an impression has Sir Upendranath's work, on kala-azar and his now world-famous drug made on the mind of the man in the street. To the medical man, and especially to those who have been interested in kala-azar for a number of years, the word Brahmachari means much more, for we all know him as a great chemist, and every chemist in Bengal, not to mention chemists in foreign countries who are familiar with Brahmachari's work, know him as a famous physician and research worker. His book on the subject was the first book on kalazar in the English language, and the successive editions and his more ambitious Treatise on Kala azar have taken their place amongst the world's monographs on tiopical diseases

This volume is no less than a verbatim re-publication with occasional explanatory notes by the author himself, of all the most important papers on the treatment of kala-azar contributed by him during the last 25 years And a very formidable array they make

Brahmachan made a special study of chemotherapy of antimonial compounds in kala azar infection. An extensive series of chemical and therapeutical experiments with various antimonials were carried out by him between the years 1915—1921, at the Calcutta Campbell Hospital. At first, several new inorganic antimonials were synthesized and tried. Then later following in the footsteps of that other famous chemist, Ehrlich, he turned to the organic antimonials and invented urea stibamine "—The Indian Medical Garette, October, 1941

"This is the first volume of a great work by a great man of our country. It contains 57 articles majority of which were published in various journals since 1920 onwards. The rest are resume of his lectures delivered in different

institution. It may be recalled here that since his publication of A treatise on Kala Azar. In 1925, this is the first book containing the researches arried on by him. Regarding the arrangement of the papers, the author states that there has been no attempt to observe a logical or even a chronological sequence and the papers are set out in the manner which, it is hoped as be t calculated to provide stimulating and attractive reading so the book opens with his famous observations on the cutaneous manifestations of L. D. bodies (Dermal Leishmanoid Brahmachari's Dermal Leishmani will) and its various clinical and therapeutic details appear on pages 172, 207, 212 and 233

Centuric ago Valentino in lus bool The Irrumphant Charlot of Antimony wrote. He who writes of intimony needs a great consideration and a melt ample mind. One many life is too short to be perfectly acquainted with ill it invoteries. The inspority of the author's papers show the pain along biological issue with the different antimony salts eg, sodium antimony tartrate potassium intimony tartrate ammonium antimony cortrate lithium inclinous tartrate car. As one goes through them, he is struct by the patience tarightedness mistery of complex chemistry and the various pathological and clinical data. Larly in 1921, Sir U. N. Brahma. chart discovered that are a could combine with stabanihe acid and the resulting compound surpased all his expectations in its value in the treatment of Indian Isla azar. The compound he named free Stibamine. The main advantage claimed by the author with urca stibliming in his papers are (a) There is rapid improvement in the chineal condition of the patient There are almost no signs and symptoms of intolerence (c) The drug is equally effective when given in a long course (I month) or a short course (2.3 weeks) (d) It is effective in the treatment of relapses (e) It is also effective in the cases resist nt to sodium antimony tartrate

Phere are a few papers describing the author's Globulin Precipitation Pest. This and other observations show that he has tackled the clinical as well as the therapeutic side of kala izar. Not unnaturally the names of kala azar and Bruhmachari go together. The book contains many good photographs charts, and historical pictures.—Journal of the Indian Medical Isociation, May, 1931

'The first volume of his Glean ngs from My Researches consists of 57 chapters almost exclusively devoted to kala azar. Instead of following a chronological sequence, the author has put his publications in a form in which some of his more important works appeared first, others following in later pages. This, the author thinks, would create a stimulating and attractive reading. By reading this volume one gets in idea of the author's labours that led to the discovery of Urea Stibinine which has revolutionized the treatment of kala azar with organic antimonials.

The first chapter contains the first case of dermal leishman d which was discovered by the author. The other chapters include chemotherapy of antimony in kala azar, the serum tests of the author in the disease, the chemistry of some new organic antimonials and the treatment of the disease with urea stibam ne and some new antimonials. We shall not describe these in detail here but would refer the reader to the original papers collected in this book.

The last chapter contains the author's presidential address at the Medical Section of the Annual Meeting of Indian Science Congress Association entitled the Conquest of Kala azar which gives a concise account of the curative and preventive aspects of kala azar by the use of urea stibamine especially in the province of Assam

This book is sure to create the spirit of research in the minds of the students of Medicine in India and not least amongst those whose paths are restricted to institutions where proper facilities for research are not yet available

The volume will remain as an excellent history of the monumental work of a research worker in the field of tropical diseases which has won for him an international reputation and recognition. We congratulate the author on the product on of this splendid work and the Calcutta University on having published it in a most handsome way '—('alcutta Medical lournal, August, 1941).

SOME OPINIONS ON THE 3RD EDITION OF THE BOOK

- "It is a self-contained, complete and comprehensive exposition of the Indian financial world with all its peculiarities —Indian Finance, Nov. 22 1930
- "A very comprehensive Text Book '-The Economist, London, Oct 11
- "A full description of the banking system and a criticism of the same"— The Manchester Guardian, Commercial, Oct 9, 1930
- "It is probable that it will become a standard work for those who aspire to a knowledge of the credit system in India"—The Capital, Oct 29, 1930
- "It is a masterly exposition of the subject by a person who can speak with authority and confidence"—The Leader, Illahabad, Nov. 2, 1930
- "A very masterly survey of the whole fie'd of banking '-Principal M K Ghosh, Govt Commercial School, Calcutta
- "It is a valuable contribution to the literature of Indian Economics. The presentation is admirably lucid and systematic and his book will be read with interest by bankers businessmen and the general public."—The States man, Nov. 30, 1930

The book contains collection of important banking material which will be useful to students and businessmen alike —The Indian Journal of Economics, April, 1931, p. 714

An interesting chapter for the American reader is Chapter XIV which describes the hourding habits of the native population —The Imerican I conomic Review, Much 1931, p. 169

Remarkably good book on Indian Banking. The author has a clear trasp of the main principles -- Sir B \ Sarma, Fx Executive Council Member Government of India and President of the Railway Rates Idiisory Committee

It will serve both as a useful work of reference and a dependable text both. His book is quite as much a book on Indian banking as on banking and currency in peneral. Dr. Ivin's special contribution is an examination with suggestions of his own of the question of a Central Bank of Issue for India.—The Ceulon Leonon is Journal. Dec., 1931

In his very extended examination of the condition: Dr. Rau gives a most interesting seateneat of the methods of indigenous bankers, past and proceed, and traces the development of the European system such as a this bean from the days of John Company. The book may be commended to the student of more care questions and it may be added that the whole body of Dr. Rau such tions are northy of consideration of controlling financial interests and of the legislature.—The British Trade Review Nov., 1930 p. 34

Mr Rau writes with authority and sound knowledge. The book offers constructive up estions for the immediate and practice, thems. The tender will not full to recure a comprehensive and clear who present dividently banking assemble and India A handy comple a Suable guide on this subject.—The Bengal Competative Review, Oct. 1925, p. 139

Recarches made by Indian Leonomists in recent years have thrown considerable hight on the gradual development of banking in India from earliest time, and much valuable information on the subject will be found in the book, published with a the lat five years by Ramachandra Ram.—The Central Benking Lequing Committee Report, 1931, p. 11

Calculus of Finite Differences, by Pramathanath Mitia, M.A., B.L., Lecturer in Pure Mathematics in the University of Calcutta Demy 8vo pp 2+222 Rs 7-8

The present volume has been designed to meet the requirements of students of Pure Mathematics as also of students preparing for actuarial, statistical and other natural science examinations. It inclides new materials together with recent researches on the subject and will be indispensable to students preparing for Master's degree in the subject as also advanced students and researchers.
